B) Case Study

LEA Background: A medium, sized high school district in southern California has 2 high schools. The unduplicated student percentage for the district is 51%; the unduplicated student percentage for Sunrise High School is 72% and the unduplicated student percentage for Sunset High School is 32%.

Context: Sunrise High School has struggled in the past three years with a noticeable increase in the number of fights on campus. While the unduplicated student percentage for Sunrise High School is 72%, over 90% of student in the fights are unduplicated. When a fight occurs during lunch, students are often late for class; and when a fight occurs during class time, students often leave class or run to the hallways or windows to try to observe the fight. During the same 3-year period that the number of fights have increased, attendance, tardiness, and grades have slipped for the entire school, but even more so for unduplicated students, and the number of classroom visits by site administrators has declined.

Proposed Action/Service: Hire and train 2 additional campus monitors for Sunrise High School.

Explanation: Sunrise High School has seen an increase in fighting. This has a significant impact on all students, but the impact has been especially accurate on unduplicated students. The 2 additional campus monitors will help improve school climate, attendance, tardiness, and instruction.
