Welcome!

*Designing Distance Learning with an Equity Lens* will begin shortly

**Do Now:**

→ Please share your name and organization in the chat.

→ Also share one thing you are looking forward to taking away from this meeting.
Designing Distance Learning with an Equity Lens
I’m done hearing “our schools are broken”. Point to another industry during this crisis that has more quickly adapted to change, supported our most vulnerable, and served the community at large...without a bailout. I’ll wait...

-W. Kieschnick
Moving Toward Equity...

Removing the predictability of success and failure that currently correlates with any social, economic or cultural factor

Learning Dispositions

- “If I had an hour to solve a problem, I’d spend 55 minutes thinking about the problem and 5 minutes thinking about solutions”
  - Albert Einstein
- Risk-taking and a growth mindset are essential dispositions to building the capacity of an organization
- “Vulnerability is the birthplace of innovation, creativity, and change”
  - Dr. Brené Brown
Leading with an Equity-Focused Response

New York City Leadership Academy, 2020
Equity Leadership from the Inside Out

• What are your biases about remote learning? How might these affect the way you lead your team and/or impact the way your team approaches online learning?

• As we are collectively experiencing trauma, some of us are more privileged than others- What are your privileges in this current situation? How might this be impacting your design?
Stay Curious, Lean into Discomfort

• In what ways are inequities appearing in surprising or unexpected ways because of the current situation?
  
  How are these inequities making you see your school or system in a new way?

• Have there been incidents of discrimination against people who identify as Asian in your school community? African-American?
  
  How are you responding or talking about those incidents with your team and your community?

  How is your entire system an ally?
Act with Cultural Competence; Truly Understand the Community You Serve

- What data/evidence are you collecting now to inform your planning for next year?
- How do we understand the level of disruption COVID had on the families we serve?
- How are we conducting empathy interviews with staff to gauge how the school culture might resume?
Train them so well they can leave, love them so much they don’t want to

• How do you help teacher and school leadership teams connect and support each other in this time of uncertainty and grief?

  How are you being intentional about taking care of your teams during this pandemic? We are not in the best design space.

• How are you building the capacity of teachers and coaches to choose instructional curricula of high quality that is appropriate for remote learning?
Confront and Alter Institutional Biases

• How are you eliminating any attendance, grading, or other accountability structures for student learning that are not conducive to the current situation?

• How are you connecting your families to crisis supports (food pantries, rent/mortgage/utility assistance, unemployment benefits, etc)?

Instructional Continuity Learning Considerations and Support for African American Students

The purpose of this document is to provide distance learning guidance for African American students’ instructional access and is aligned to the SDCCD Instructional Continuity Learning Plan Template and the Social Emotional Supports.

Communication

Consider pre-pandemic factors:
- What was the level of engagement for African American families in the class/outreach community?
- What efforts have been made prior to the pandemic to solicit the voice of African American students and families?
- Are there individuals, groups, or processes in place to facilitate communication with African American families?

Conduct a quick communication audit:
- Has anyone reached out to African American students and families, specifically if the “who”?
- Is there a record (e.g., log, entry into SIS, etc.)
- Were they successful in making contact?
- What percentage of the African American population of the class/outreach was reached?
- What was asked? What was asked?
- What data (anecdotal, quantitative, or qualitative) was collected during the class?
- Was it recorded? If so, how?
- What were the overarching themes and needs shared?

If active communication has not taken place:
- Create questions to be asked and statements to be shared with African American families
- Design a process for communication to families
- Allocate staff to complete the task
- Ensure staff has the necessary tools to complete the task (access to phone, phone #, etc.)
- Provide a template to record data from the call (anecdotal, quantitative, or qualitative)
- Create a process to analyze the collected data and use it to inform actions

Social Emotional Supports

Consider pre-pandemic factors:
- What social emotional supports were in place for African American students prior to the pandemic?
- Who offered those supports?

Consider the current reality:
- How have these supports been translated into the current system of services being offered to students?
- Are the staff members who provided support to African American students and families prepared and available to continue to provide

What if...

We wear the mask and we stand six feet away not because we are “afraid” of each other, but because we love each other and care for your life.

We wear the mask and we stand six feet away not because you might make me sick, but because I might make you sick and I don’t want to make you sick.

Instead of othering, or being fearful of each other, what if the narrative was love and compassion for our fellow brethren? What if that became the narrative of our beliefs and behaviors as we welcome our families back and re-engage with society?
