

# The Power of Bouncing, Tagging, and Binning for Feedback to Advance Deeper Learning

Brent Duckor, Ph.D.  
Carrie Holmberg, Ed.D.

# Context for Our Work

# Our Backgrounds

- **Dr. Brent Duckor** is an Associate Professor in the Department of Teacher Education and Core Faculty in the Ed.D. Leadership program at San José State University.
- Taught History, Economics, Civics, and Entrepreneurship at Central Park East Secondary School in East Harlem (NYC).
- Supervise pre-service teachers and collaborate with cooperating teachers across multiple counties in Northern California.
- **Dr. Carrie Holmberg** is a Lecturer in the Department of Teacher Education at San José State University.
- Taught English Language Arts and Journalism at a Title I high school in California and was a National Board Certified Teacher for 20 years.
- Supervise pre-service teachers and collaborate with cooperating teachers in 8 subject areas across multiple counties in Northern California.

We work with ELA, math, science, art, music, P.E., social science, and world language teachers.

Welcome to the 2nd of a 3-part Webinar Series on  
Formative Assessment  
in the “Leading Forward” Initiative led by CCEE

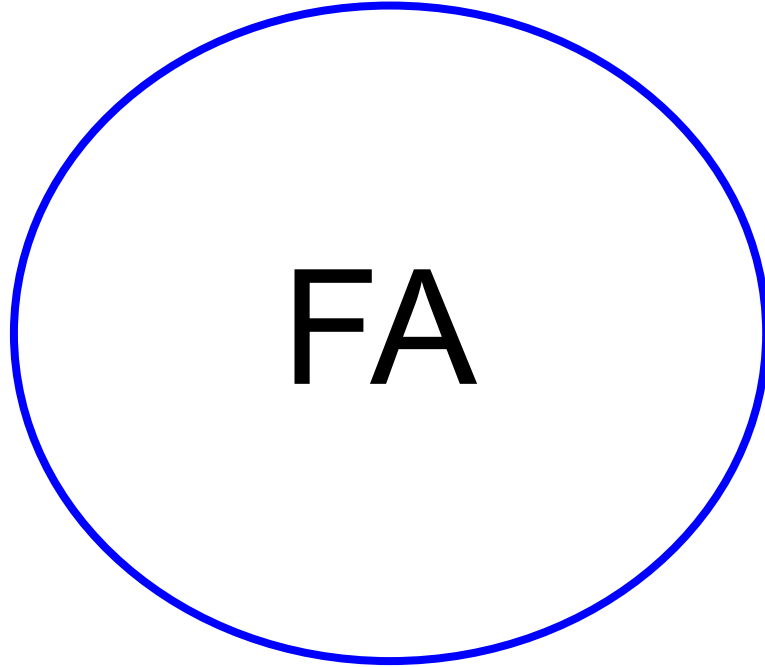

1. The Power of **Posing, Pausing, and Probing** Moves to Advance Deeper Learning (February 24, 2-3pm)
2. **The Power of Bouncing, Tagging, and Binning** Moves to Improve Decision Making During a Lesson
3. Formative Assessment Moves to Uncover Academic Language Demands and **Support English Learners** During a Lesson (**April 21, 2-3pm**)

# Activating Prior Knowledge/Warm-up

# Brainstorm

What comes to mind?

# Purposes Matter

## Assessment of Learning

- Summative
- Proficiency-focused
- End of unit, semester, or year
- Test-taking skills
- Motivation for some
- Standard met or not met

## **Assessment for Learning**

- **Formative**
- **Process-oriented**
- **Continuously occurring**
- **DURING a LESSON**
- **Feedback during the instructional cycle**
- **Progress and growth mindset**

# What the Research Tells us

# Hattie's Work Reminds us FA Still Counts

- In a massive study of over **95,000 studies**
- Formative assessment ranks 4th (out of 150) of the most **powerful educational influences** on learning
- Formative assessment is a “high-leverage” **evidence-based practice**

Bottom line: We have hard data that soft data gathered during instruction matters.

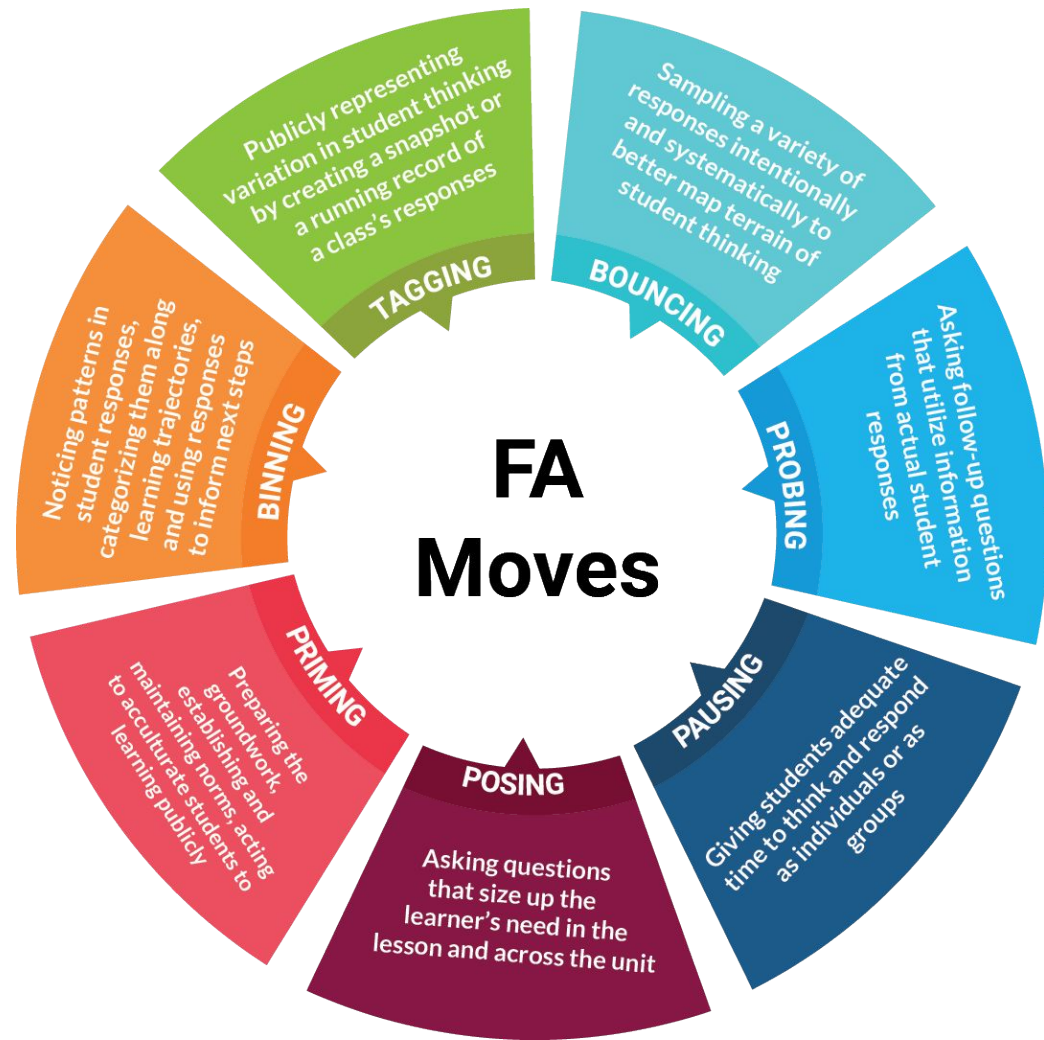

# The FA Challenge (2014)

“What makes formative assessment so effective? It depends on whom you talk to. Although experts tell us that formative assessment is one of the most powerful ways to raise student achievement...

... we don't always know **which practices** are most effective, when to deploy them, and why a **particular combination** actually worked for a **particular student** in a **particular classroom.**”

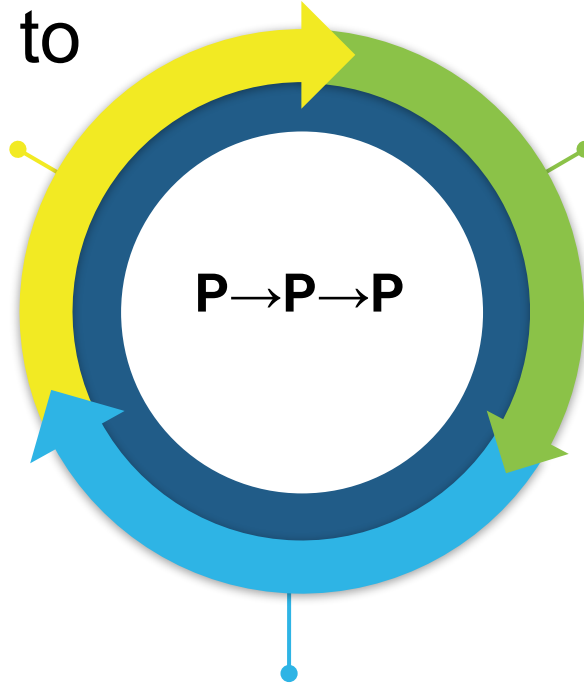

We've identified  
**7 high-leverage  
moves**  
to identify where  
students currently are,  
where they are going,  
and how to get there  
together

# FA Moves Cycle

**Posing** leads to  
inquiry

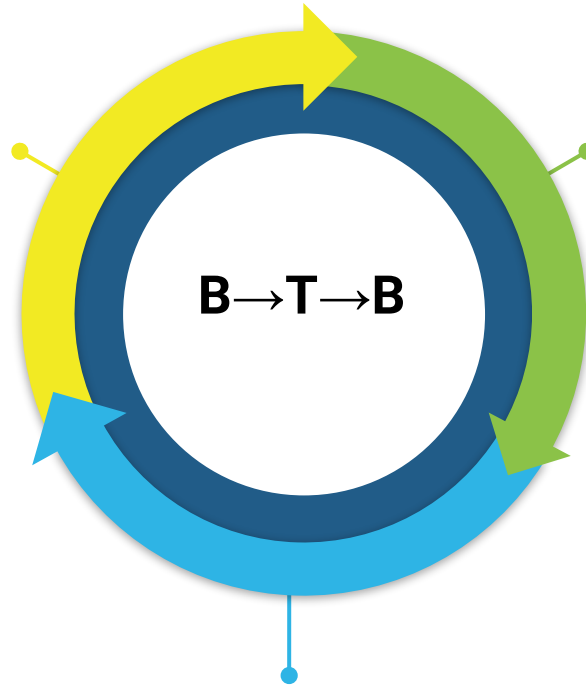

**Pausing**  
leads to  
think-time to  
form  
responses

**Probing** leads to  
elaboration

# FA Moves Cycle

**Bouncing**  
widens the  
sample of  
responses

**Tagging**  
ensures  
visibility for  
sense  
making

**Binning** sizes up current levels  
and next steps

Leveraging the Power of Bouncing, Tagging,  
and Binning for Feedback Moves to  
Uncover and Extend Student Understanding  
“on the fly”

# Today's Focus:

## Uncovering the Power of FA Moves in a Lesson

### **Bouncing**

How do we sample student thinking to aid instructional decision making?

### **Tagging**

What difference does representing students' thinking/prior knowledge where all can see it make?

### **Binning for Feedback**

How can categorizing student responses along learning trajectories improve "next steps" feedback?

Let's watch how teachers use bouncing-tagging-binning for feedback MOVES to activate prior knowledge, promote understanding, and elicit curiosity and engagement

S!

Tanner you're sorta the outlier, we'll leave that there. Maybe it's because you have a nice haircut.  
S- Yea pretty much.

# Bouncing as an FA practice

Sampling a variety of responses intentionally and systematically to better map terrain of student thinking

**BOUNCING**

# Go-to Bouncing Moves

*Equity sticks or cards*

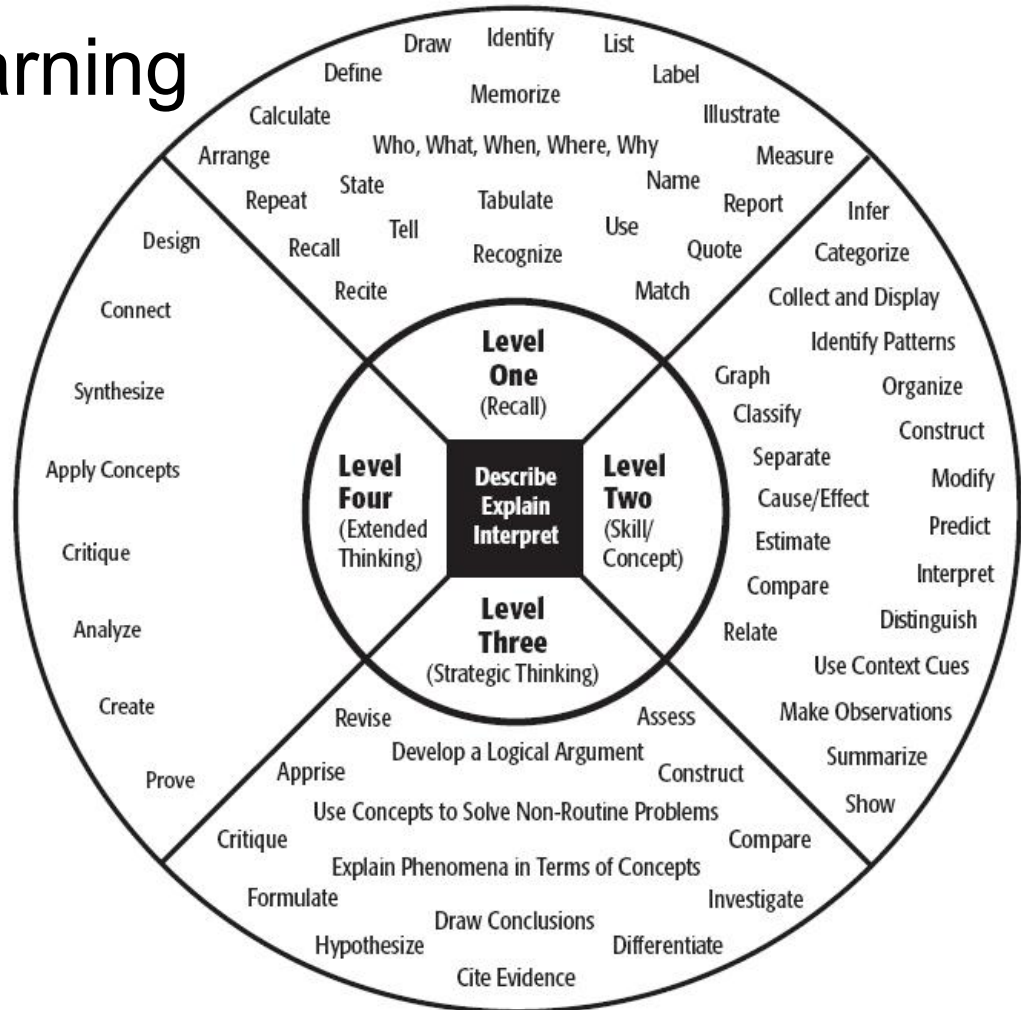

*In zoom let's hear from everyone's  
whose ...starts with...*

*Snaking, popcorn, etc*

# No matter what the Learning Targets & Goals:

## Sampling is Key

# Sampling for Equitable Learning

“It was sobering to learn that during the entire period I’d heard from only three students. There are 29 in that class.”

—Mirabelle, math teacher

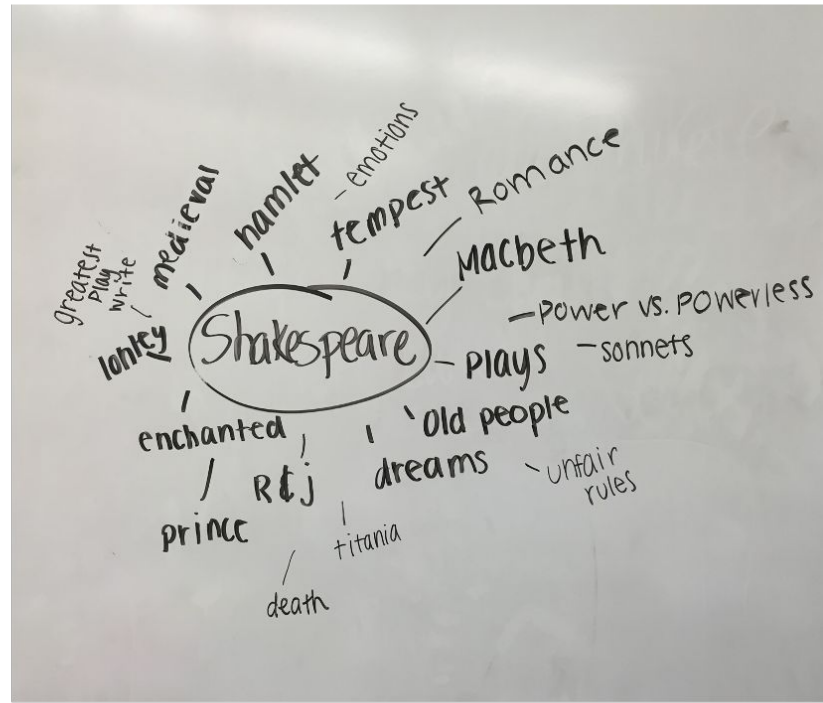

# Bouncing Moves...

Help teachers map by sampling the terrain of student thinking, systematically and intentionally

## Bouncing moves

- are intertwined with other FA moves
- are supported by effective routines for posing, pausing and probing
- can include “listening in” to S-to-S dialogue
- directly support instructional decision making by helping teachers see patterns, e.g., preconceptions

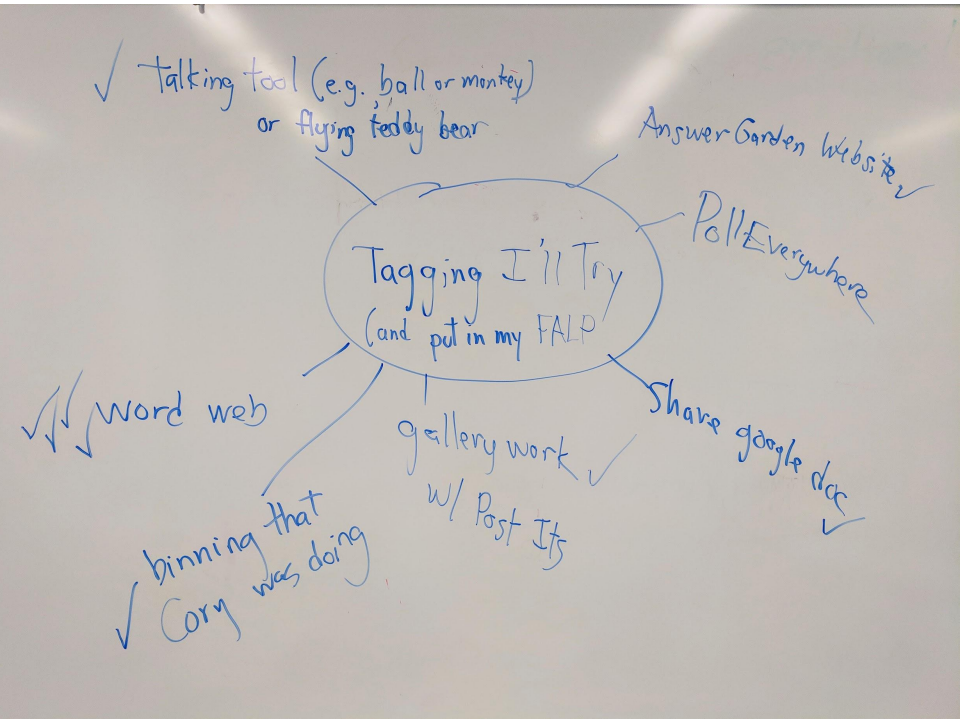

# Tagging as an FA practice

# Tagging

Publicly representing variation in student thinking by creating a snapshot or a running record of a class's responses

Publicly representing  
variation in student thinking  
by creating a snapshot or  
a running record of  
a class's responses

**TAGGING**

Collecting the students' schema of the class and having it as a reference. - Sir Hugh E. Wynn

Writing down student ideas  
-Alyssa

tagging is checking in on your students by asking them questions or having conversations -netta

checking in with students thoughts and ideas - joe

A brief, but self-identifying way for students to express themselves

Jotting down answers, replies, interactions  
-Patrice

It's a way to check what comments seem to be on every student's mind.-

visually representing students' thinking (ch)

Referencing the students/valuing their responses and reactions. Or, students referencing their classmates. Edit: recording information (scribing) for everyone to see, recognize and comprehend. -Kaitlyn

Visual representation of knowledge

IS...

Tagging is shifting questions from student to student. Mayb? - Joe NG

paying attention to what students had to say. -Randel

representing student voice; keeping it real by tagging what all students have to say; scribing for equity--bd

Recording student responses & making them publicly available to the class  
- sarah

touching base/checking in throughout a conversation to encourage ideas-Abe

# Roots of Tagging: Respecting Student Voice

“At the end of a class tagging session—with our prior knowledge of a topic all up there—I’ve put a C/S next to our work. C/S stands for *con safos*, or “with safety.” During the heart of the Chicano Movement, Los Angeles street artists would add the C/S to finished messages to let their fellow free thinkers know how to approach a message with a community purpose.

As we are building a community of learners, the C/S not only makes sense, it’s critical—especially for students used to their ideas, prior knowledge, and experiences being overlooked, unexplored, even discounted.”

Carl, high school English teacher

“If I want to support a classroom environment where students believe their voices matter, then I will need to loosely structure opportunities for all to be heard—and represented. That’s tagging.”

-Kaila, science teacher

# Tagging Moves...

Honor **all** students' thinking, experiences, prior knowledge and ideas in a shared learning space

Tagging moves support:

- where students are at the moment
- asset-based approaches to learning & teaching
- digging deeper (i.e., probing)
- respect for variation and difference
- reflection & connection-making
- meaning-making over time

Tagging is a way to collect '**soft**' data while checking for **understanding during the lesson.**

# Binning as an FA Practice

# Binning as an FA Practice

Noticing patterns in student responses, categorizing them along learning trajectories, and using them to inform next steps

# Our purposes matter... We can BIN during instruction

<b>For Grading</b>	<b>For Feedback</b>
<b>Summative</b>	<b>Formative</b>
<b>General status markers</b>	<b>Specific, actionable cycle</b>
<b>Autopsy on events</b>	<b>Progress on processes</b>
<b>Student involvement minimal</b>	<b>Student involvement essential</b>
<b>Narrow focus on “points”</b>	<b>Leads way to “next steps”</b>

# Go-to Binning on the fly

*On-off task*

*Correct, partially correct, incorrect*

*Developing, meeting, advancing,  
extending*

*Noticing patterns in  
student responses,  
categorizing them along  
learning trajectories,  
and using responses  
to inform next steps*

**BINNING**

# Dichotomous Bins

1	True	Correct	Yes	Agree
0	False	Incorrect	No	Disagree

# Trichotomous Bins

2	Correct	All	Yes	Agree
1	Partial Correct	Some	Maybe	Not Sure
0	Incorrect	None	No	Disagree

# Polytomous Bins

4	Advanced	Always	Strongly Agree
3	Proficient	Sometimes	Agree
2	Developing	Rarely	Disagree
1	Needs Improvement	Never	Strongly Disagree
X	Not observed	Not sure	Don't know

# A Progress Guide is a Tool to Support Binning for Feedback

Progress Guide for Question Map

Directions: Circle, highlight, or bold the level that most closely describes the current draft of your Question Map (QM). Next, write what your next steps are in order to improve your QM.

Circle, Highlight/Bold	Current draft of Question Map	Next steps/Request
Exemplary ****	All of previous level, plus: <ul style="list-style-type: none"> <li>Identifies corresponding assessment modality/activity for each question and</li> <li>communicates key vocabulary/academic language for the unit</li> </ul>	The next steps for me are... ...add academic language...e.g. agency, autonomy, context, setting, identity
Advanced ***	All of previous level, plus: <ul style="list-style-type: none"> <li>Has at least 3 questions for each node,</li> <li>identifies the DOK level(s) for each question,</li> <li>There are a mix of DOK levels 1-4 on the map.</li> </ul>	The next steps for me are... ...To come up with at least 2 more questions per node ...I can come up with a list of important words
Developing **	<ul style="list-style-type: none"> <li>Features a right-sized topic, overarching focus/essential/driving question, and</li> <li>an appropriate and relevant CA state standard for each node on the map.</li> </ul>	The next steps for me are...
Emerging *	Includes a "right-sized" topic, but focus/essential/driving question does not overarch all the lessons in the unit	The next steps for me are...
Beginning .	Has topic that may be too narrow or much too broad for a 2-3 week unit	The next steps for me are...
Needs Improvement	No response	The next steps for me are...

Exemplary

Advanced

Developing

Emerging

Beginning

# The Progress Guide for Teacher's Use

Making an argument	Can currently do	Next steps/feedback
	Weighs evidence	
	Adds some evidence	
	Takes a position	
	Restates	
	Not yet ready	

# The Progress Guide for Students' Use

Making an argument	Can currently do	Next steps
	I can weigh evidence and its importance	I want to...
	I have added some evidence	I want to...
	I took a position for or against	I want to...
	I restated the question	I want to...
	I am not yet ready to write	I want to...

# Binning for feedback moves...

- ❑ Identify patterns in student responses to **support learners' and teachers' "next steps"**
- ❑ Non-graded
- ❑ Focus on student ZPD with the topic
- ❑ Emphasize commitment to continuous improvement **during instruction**

# Binning for Feedback

“To provide students feedback without assigning grades to their work, I write in the margins and use stamps. Students ask, ‘What did I *really* get? What does a stamp mean?’”

-Belinda, Spanish teacher

“It took me a while to realize. Feedback isn’t just for students! I can use it to guide my decisions on what to teach next.”

-Frank, science teacher

# Putting it All Together

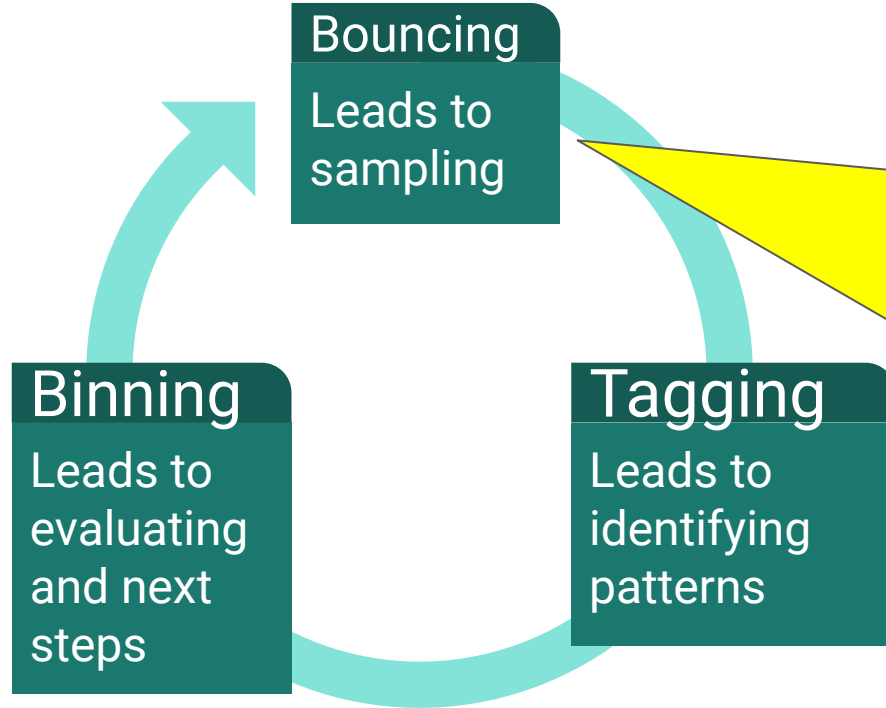

# Making Our FA Moves Work for Everyone

- ❑ Support multiple entry points
- ❑ Aim at conceptual understanding tied to Standards
- ❑ Direct and maintain attention by inviting responses from all
- ❑ Elicit curiosity and risk-taking to get to deeper learning

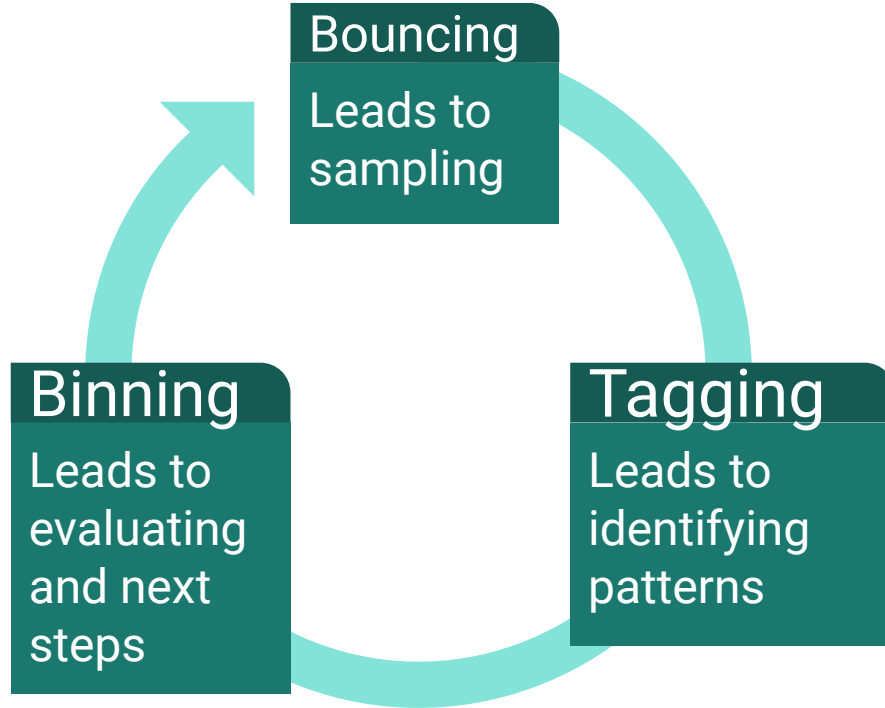

Let's share in chat

Why does sampling student thinking during a lesson matter?

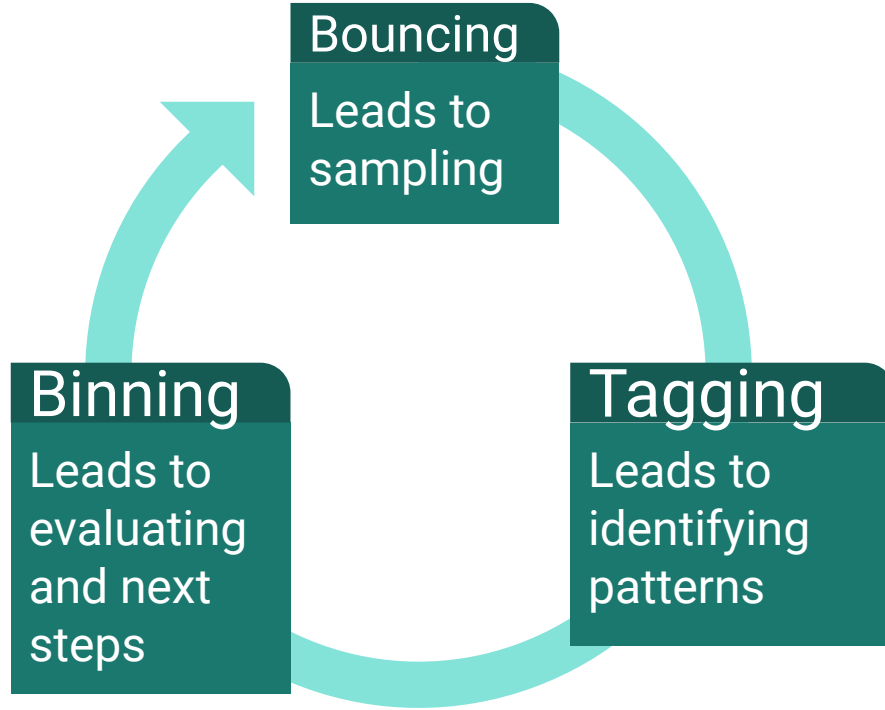

Let's share in chat

Who benefits from representing ideas publicly during a lesson?

Let's share in chat

Why does accurate evaluation of student ideas/skills “on the fly” matter?

# Formative Assessment Moves

- Build student participation
- Encourage equity of voice
- Make thinking public
- Reveal patterns in understanding in real-time
- Promote safe spaces to try out “first draft” responses
- Support academic language use on Zoom or in Class

# Ways to Connect Going Forward

## Webinars

<https://ccee-ca.org/>

Formative Assessment  
Moves to Uncover Academic  
Language Demands and  
Support English Learners  
During a Lesson

**April 21st, 2-3pm**

## Modules

<https://ccee-ca.org/>

### **Free eCourse modules:**

- **Overview of the FA Moves**
- **Priming**
- **Posing**
- **Pausing**
- **Probing**
- **Bouncing**
- **Tagging**
- **Binning**
- **Using the FA Moves to Close Opportunity Gaps**

## “Office Hours”

[cholmberg@validitypartners.com](mailto:cholmberg@validitypartners.com)

Professional development  
support:

**—5 “office hours” slots for those LEA/districts/schools who want to work with us in May-June**

—We will be collaborating with those who would like to integrate this work into their LCAP

# Thank you

**Please go to the survey link in THE CHAT to provide feedback.**
