# The Seven Norms of Collaborative Work

---

## Pausing

Pausing before responding or asking a question allows time for thinking and enhances dialogue, discussion and decision-making.

## Paraphrasing

Using a paraphrase starter that is comfortable for you: “So...” or “As you are...” or “You’re thinking...” and following the starter with a paraphrase assists members of the group to hear and understand each other as they formulate decisions.

## Probing

Using gentle open-ended probes or inquiries such as, “Please say more...” or “I’m curious about...” or “I’d like to hear more about...” or “Then, are you saying...?” increases the clarity and precision of the group’s thinking.

## Putting ideas on the table

Ideas are the heart of a meaningful dialogue. Label the intention of your comments. For example, you might say, “Here is one idea...” or “One thought I have is...” or “Here is a possible approach...”

## Paying attention to self and others

Meaningful dialogue is facilitated when each group member is conscious of self and of others and is aware of not only what she/he is saying but how it is said and how others are responding. This includes paying attention to learning styles when planning for, facilitating, and participating in group meetings. Responding to others in their own language forms is in one manifestation of this norm.

## Presuming positive presuppositions

Assuming that others’ intentions are positive promotes and facilitates meaningful dialogue and eliminates unintentional put-downs. Using positive presuppositions in your speech is one manifestation of this norm.

## Pursuing a balance between advocacy and inquiry

Pursuing and maintaining a balance between advocating a position and inquiring about one’s own and other’s position’s assists the group to become a learning organization.

## ABOUT THE CALIFORNIA LABOR MANAGEMENT INITIATIVE

Over 170 districts and county offices have participated since 2015.

### Our approach:

**CONVENE** labor-management teams from across CA to promote inquiry into the processes for effective system-wide partnership.

**CATALYZE** collaboration in districts through ongoing support and by connecting teams in regional and statewide peer networks.

**COMMUNICATE** to build awareness and access to key resources across districts, state associations, and educational stakeholder groups.

For more information, visit [www.cdefoundation.org](http://www.cdefoundation.org)

**The California Labor Management Initiative (CA LMI) fosters and supports labor-management partnerships as a foundational element of improving public schools and advancing educational equity in California.** The initiative creates safe, supportive learning environments in which public school union and management leaders can have tough conversations that lead to collective problem-solving, exploring new frameworks and research, and more effective ways to meet the needs of students and staff. A project of the CDE Foundation, the CA LMI aims to bring leaders together to co-develop structures and practices that lift staff voices and build systems for continuous improvement to create better outcomes for students and staff, parents and communities.

Since 2015, over 170 districts and county offices have participated in the CA LMI. By convening labor-management teams of administrators, union leaders and board members, CA LMI promotes inquiry into processes and structures for system-wide partnership. Convenings provide a joint learning and team building opportunity. Teams can participate in statewide, regional or local events. Direct in-district consulting is also available. State level discussions with our Steering Committee members and others serves to embed labor-management partnership into the fabric of California public education.

The CA LMI is guided by a steering committee that includes top leaders of our state education agencies and employees organizations. The steering committee is made of the following group of diverse stakeholders:

- Association of California School Administrators (ACSA)
- California Collaborative for Educational Excellence (CCEE)
- California County Superintendents Educational Services Association (CCSESA)
- California Department of Education (CDE)
- California Federation of Teachers (CFT)
- California School Boards Association (CSBA)
- California School Employees Association (CSEA)
- California Teachers Association (CTA)
- Ray Gaer, President, ABC Federation of Teachers
- Mary Sieu, Superintendent, ABC Unified
- Shannan Brown, , Exec. Director, San Juan Teachers Assoc., Director, California Teacher Union Reform Network (CaTURN)

CA LMI invites and encourages additional labor and management organizations, educators and civic leaders across California to join us in the work of collaboratively solving California's most pressing educational issues and building capacity for long term growth. CA LMI looks forward to continuing to drive deep authentic partnerships and improve school culture across the state of California.

## Frequently Asked Questions

### » Why should my team participate?

CA LMI convenings provide safe, supportive learning environments in which public school union and management leaders can have tough conversations that lead to collaborative problem-solving to collectively meet the needs of students and staff. CA LMI provides labor-management teams hands-on tools to lift up issues and develop practical solutions to improve outcomes.

### » Who should participate in my labor-management team?

Most teams typically include at a minimum, the superintendent, classified and certificated union presidents and a school board member. Additional key leaders may include the asst. supt for HR, chief academic officer and other top union executive officers. As teams continue to participate they typically add site labor-management leaders such as principals and building reps. Larger districts often roll out the effort via cohorts of school site teams once the district level leadership has engaged.

### » How do we get started?

We encourage teams to sign up to attend our convenings to begin the process. Events for new teams are held several times a year. You can find upcoming events on our [CA LMI website](#). Please contact [Gustavo Morales](#), CA LMI Program Manager, for additional information on engaging your team.

### » Can I participate as an individual?

Labor-management partnership and collaboration is a group activity. We encourage you to connect with your labor and management leadership to organize your labor-management team attendance at CA LMI events. Some virtual events such as webinars are designed for individual participation but we encourage teams to participate together whenever possible to take advantage of team building and joint problem solving opportunities.

### » How much does it cost to participate?

The CA LMI is supported by several foundations that help reduce costs for participation. Our low cost convenings can run as little as \$50 per person. Materials in our resource and video library are available at no cost.

### » What state agencies and associations are involved?

The CA LMI works closely with the California Department

of Education and the California Collaborative for Educational Excellence. State educational associations representing teachers, classified staff, administrators, and school board members, also play a critical role in advancing labor-management collaboration on a broad scale. CA LMI has had ongoing support from leaders of state associations and agencies, as demonstrated by their participation on our Steering Committee and involvement in CA LMI statewide institutes and trainings. The CA LMI Steering Committee members meet at least once a year to provide high level guidance to the CA LMI team and connections to their members.

### » What research supports this work?

Research studies have highlighted the importance of developing collective trust among school staff. Recent research from Saul Rubinstein and John McCarthy from Rutgers and Cornell Universities has shown the impact of labor-management partnership and collaboration on student achievement and staff retention. These impacts are particularly pronounced in high poverty schools. Rubenstein & McCarthy found that formal union-management partnerships at the district-level seem to be a catalyst for building highly collaborative schools, finding that district partnerships are positively associated with school collaboration.

### » How do labor-management partnerships interact with our bargaining processes?

Developing labor-management partnerships is not a substitute for collective bargaining and the CA LMI does not get involved in negotiations. Participating with the CA LMI and building labor-management partnerships is often cited by labor and management leaders as being helpful in providing additional problem-solving strategies, relationship building, and opportunities outside the formal bargaining process.

### » Is this work supported at the national level?

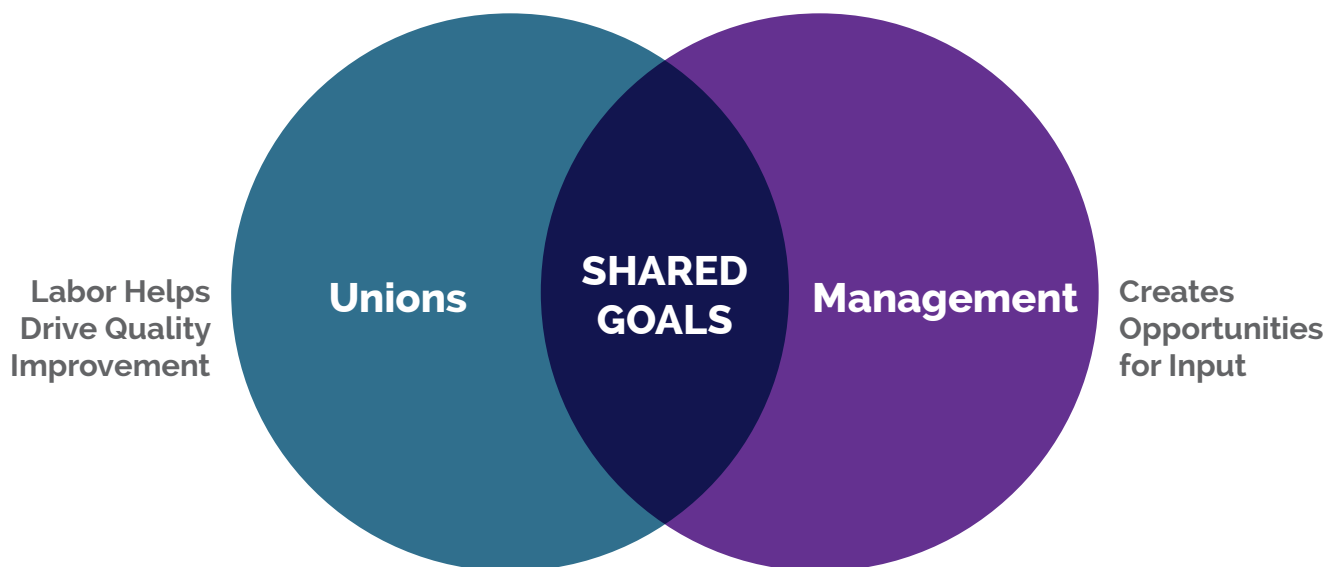

The focus on labor-management partnerships has been growing at the national level as evidenced by the activity of National Labor Management Partnership (NLMP). The NLMP is a working group comprised of the American Association of School Administrators, American Federation of Teachers, National School Boards Association, and the National Education Association (NEA). From their [2018 National Call to Action](#) to the recent NEA workbook [Collaborating for Student Success](#), there is a growing recognition of the importance of effective labor relations in improving public education.

## What is Labor-Management Collaboration?

**Schools and school systems are driven by how staff and students feel while interacting with each other.** The student experience often echoes the experience that staff have. School and district cultures that value student and staff voice provide spaces that allow all members of the organization to drive improvement and deep learning. Labor-management partnership is the vehicle to organize education stakeholders and catalyze opportunities for educators to design more equitable learning experiences that empower students and staff.

Labor-management partnership is the intentional partnering of management and labor leaders within an education system focused on improving district culture and climate and student outcomes. Moving beyond the traditional frames of interactions, labor-management partnership allows for deeper coherence, goal alignment and impact. Leaders that intentionally focus on building trust and psychological safety for staff can shape an organizational culture that supports continuous improvement and the needs of our students and communities. Creating opportunities for educator voice, and the insight of the staff closest to the work and their union representatives, to impact decision making improves outcomes for all and builds leadership and accountability across the system.

### Working Differently Together

### The National Labor-Management Partnership (NLMP)

is a working group that includes the American Association of School Administrators, American Federation of Teachers, National School Boards Association, and the National Education Association, which together represent the professional voices of educators, school board leaders, and administrators. The NLMP was founded in 2011 to acknowledge and promote a unified philosophy: Improving student learning and equity requires strong, consistent, and sustained collaboration among parents, teachers,

school boards, superintendents and administrators, business leaders, and the community. And such improvements require that we all take responsibility for the well-being of the students in our charge. As a national-level partnership, the NLMP supports local-level transformation, including greater shared responsibility and leadership toward the educational outcomes we seek. Additional materials and resources from the NLMP are linked [here](#).

## Purpose of this Guidebook

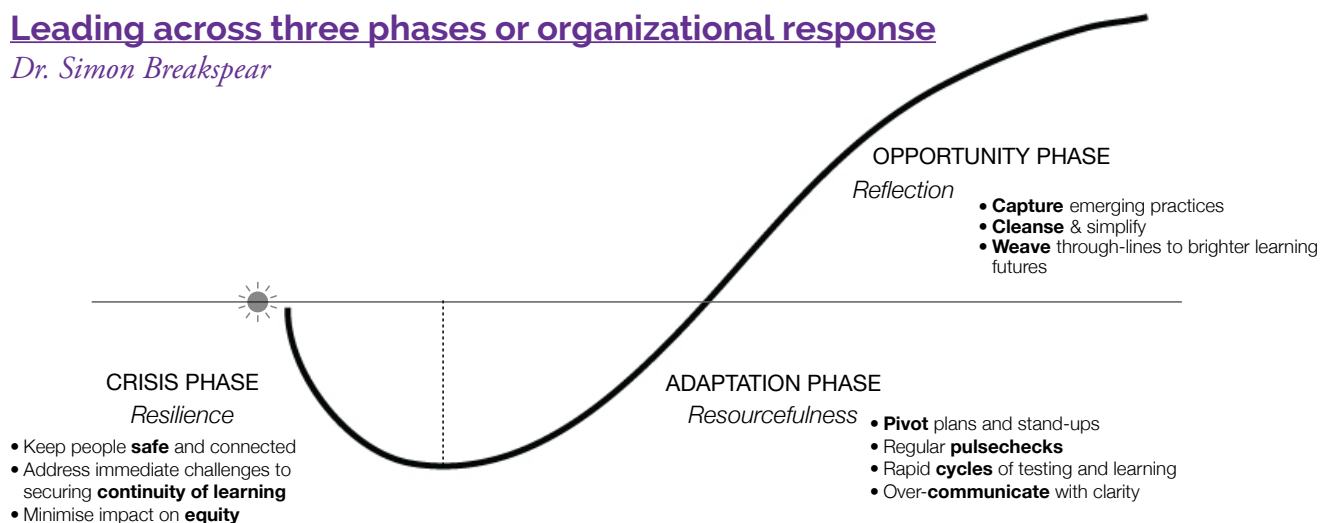

The CA LMI Resource Guidebook is designed to support education leaders in developing deeper labor-management partnerships and augment CA LMI convenings for labor-management teams. The Guidebook provides an organized platform for tools, research and strategies which help build and sustain labor-management partnerships engaged in collaborative solution-building. The Guidebook includes short descriptions of resources, suggestions for how to implement each element, and opportunities for joint reflection towards improvement.. The guidebook is designed to be a working document for labor and management leaders throughout the school district or county office of education. The guidebook is a tool and not a step by step outline for building collaborative practices. Revisit sections as often as you need. We encourage you to use a highlighter, write on the book and focus on adapting the resources to your own context. This Resource Guidebook is an evolving document. We will continue to add tools and information. We encourage your feedback and submission of examples and materials for the continued development of this resource.

With this Guidebook in hand, education leaders will,

- Build, navigate and sustain effective labor-management partnerships
- Deepen their understanding of the issues of trust, equity and communication
- Review and practice learnings outside of structured convenings
- Improve the culture and climate of their school or system to improve outcomes for students and staff
- Develop solutions to the unique challenges of their community

## Leading across three phases or organizational response

*Dr. Simon Breakspear*

© 2020 Simon Breakspear. All rights reserved.

This descriptive graphic from Simon Breakspear illustrates the three phases of organizational response to crises. COVID 19 was a crisis unlike any we had experienced. With the initial spread of the pandemic, organizations focused on the resilience needed to get through the crisis moment. But after that initial shock, institutions, including educational systems were in a period of necessary adaptation. It was clear at that time that the pandemic was not going to end quickly and educators had to adapt to the new reality. It is often noted that the pandemic put into plain view the many inequities of the education system. During the adaptation phase, new ideas began being tested for addressing the now starkly exposed education system deficiencies. In the Breakspear curve, and in life, the progression from crisis to adaptation leads to opportunity. Using collaborative problem solving, it is time for unions and management to come together to remove outdated and unuseful programs and strategies, grow the adaptations that show promise, and create a coherent education system that empowers its employees to collectively focus on meeting the needs of all learners.

## Using This Guidebook

**This Resource Guidebook is designed to provide labor and management leaders and teams with accessible tools to build a sustainable culture that encourages teams to be engaged in problem solving using collaborative professionalism.** This is not a one-size-fits all, rather, this Resource Guidebook is designed to assist you with implementing a labor-management partnership that best suits the needs of your education system.

CA LMI recognizes three key pillars: Trust, Equity and Communication. CA LMI's six Elements of Partnership details the component parts of a functioning labor-management structure, from launch to sustainability. In this Guide, there is a detailed section focused on each Element and its component parts including resources, tools, guiding questions and indicators of progress that can help teams and team leaders implement that Element. Because every team and every community is unique, this Resource Guidebook is organized to encourage your visit to the section(s) that best meet your needs. You can skip to the resource or tool of interest or work through the entire guidebook section by section. Additional resource links can be found in the back of this guidebook. This guidebook does not provide enough detail to serve as the sole source of information; however, reviewing it will help you and your labor-management team understand the basic aspects and components of forming and sustaining a labor-management initiative, organized to solve problems and develop solutions. Most importantly, we encourage your team to adapt this to your own needs and experiences and develop your own contextual approach to building and sustaining vibrant labor-management partnerships.

Tools, frameworks and materials throughout this guidebook are meant to help education leaders deepen their ability to create positive change in their organizations. That effort requires education leaders to continuously focus on two key areas, self awareness and systems awareness. Tools in this resource provide an insight into both.

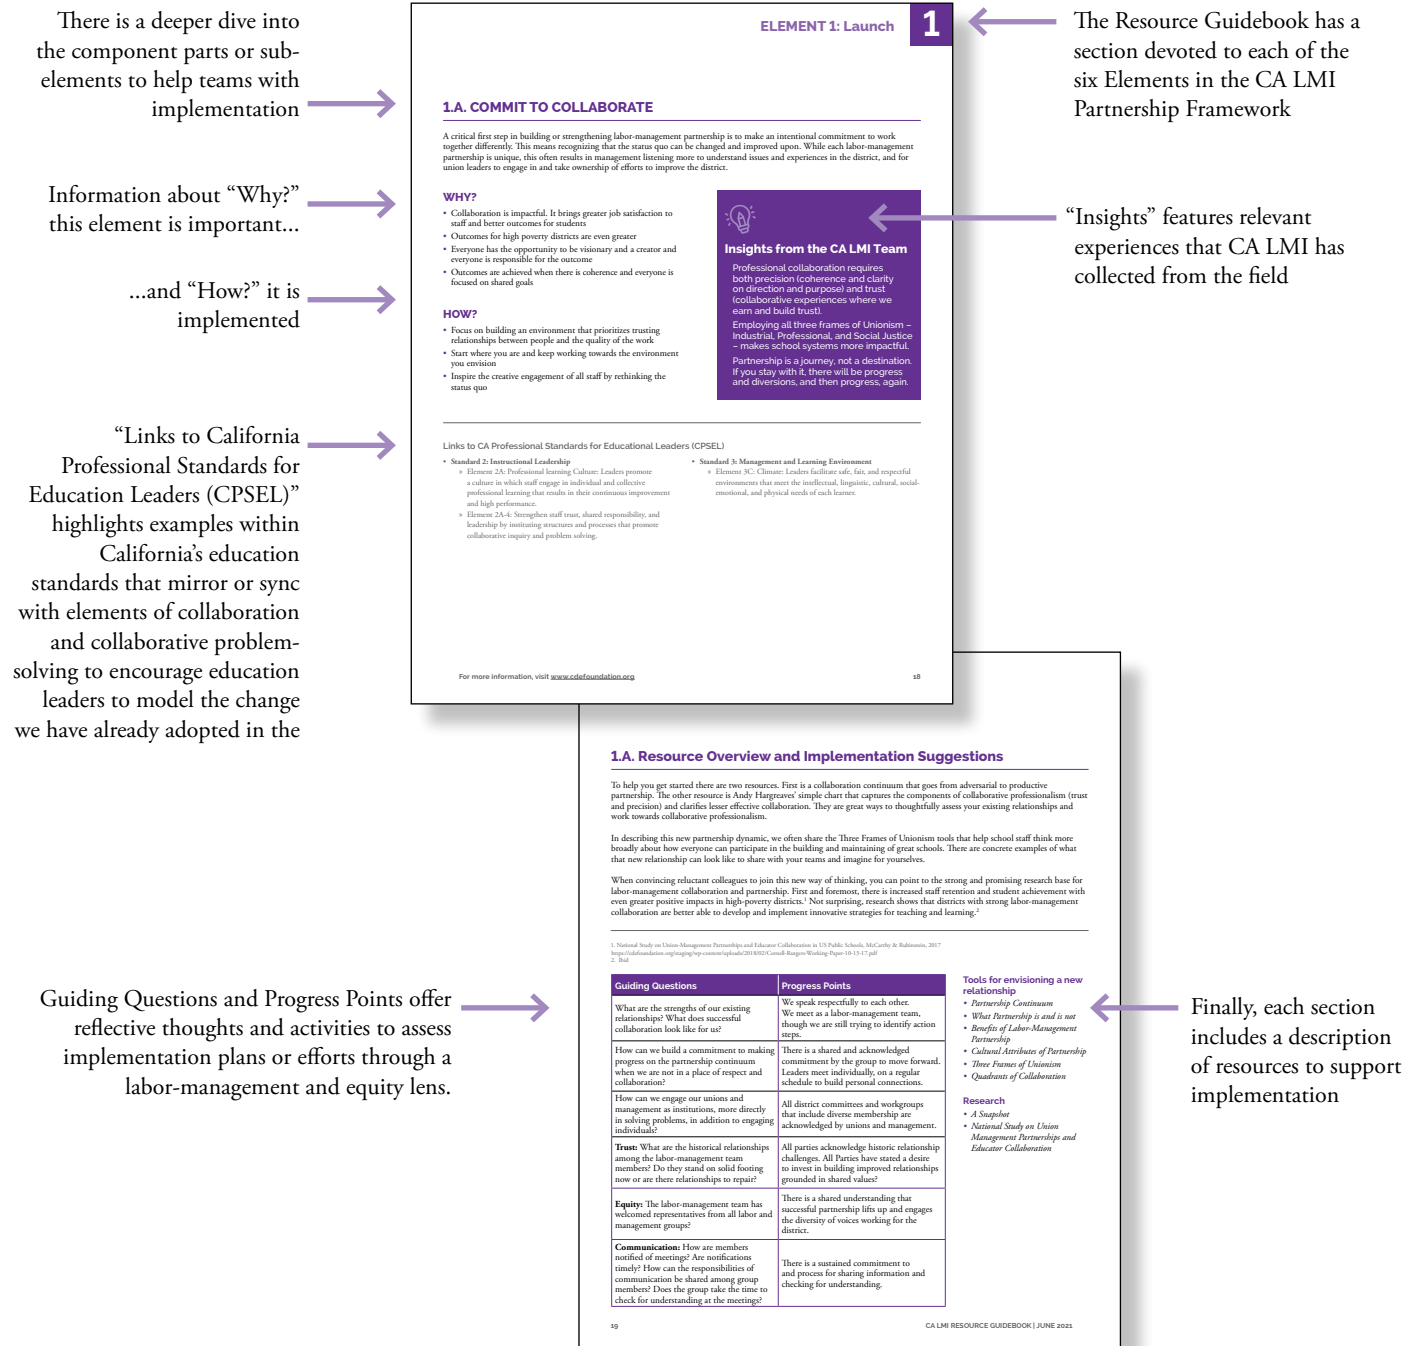

- This Resource Guidebook is informed by the ABC's of Partnership, CEC's Resource Guidebook: Cultivating a Culture of Collaboration Focused on Student Learning, NEA's Collaborating for Student Success and the California Professional Standards for Educational Leaders (CPSELs).

## Diagram of an Element (What you'll see inside)

Each chapter or element in this guidebook is formatted in a similar way.

## CA LMI Overview of Support Opportunities

If you are interested in learning more about the CA LMI and would like to participate, the California Labor Management Initiative provides districts and county offices with three tiers of support to advance labor-management collaboration.

### Universal Convenings

**Universal Convenings** provide labor-management teams across the state opportunities to learn about labor-management partnership, understand key collaborative frameworks and are designed as a shared learning and team building experience for school districts and county offices. Universal convenings are provided in various regions of the state as well as online virtual offerings. These convenings provide a place for unions and management to learn together and build trust and relationships. See the CA LMI website for upcoming events, materials and our [CA LMI Resource Library](#).

### Regional Networks

**Regional Networks** connect multiple districts within a geographic region and support localized networks which build capacity and peer learning opportunities over time. Regional Networks support sustained peer-to-peer learning, and they provide a structure for teams to share resources, celebrate successes and navigate challenges. We have worked to connect our Regional Networks to County Offices of Education as a hub for convening districts and develop labor-management regional planning committees to further our networks.

### Individualized Supports

**Individualized Supports** provide an opportunity for districts or county offices to work with the CA LMI staff or consulting partners to further support their labor-management teams. The support is tailored to the individualized context of the district or county office. Teams can contract with the CA LMI staff or our consulting partners directly to develop a customized scope of work to advance their labor-management partnership efforts via in-district coaching.

## The Three Pillars of Collaboration

Underlying and supporting the work of building labor-management partnerships are the 3 Pillars of Collaboration - Trust, Equity and Communication. These foundational elements are connected to every part of the work. Partnerships between labor and management are built around trust, equity and communication as are school system and educator relationships with students, parents and community. Additional resources and linked materials connected to the *Three Pillars of Collaboration* can be found following the article below on the relationship between trust and district effectiveness.

### TRUST

"Trust is institutionalized in an organization's rules, roles and relations. That means it is embedded in everything an organization does or tries to do. It is explicit and implicit. It is in the climate and culture. It is found in every interpersonal encounter, at every meeting. It is displayed in how outsiders are treated. It permeates organizations."

-Anthony Carnevale,  
Dir. of Education and the Workforce,  
Georgetown University

Relationships are the building blocks for trusting interactions among staff and leaders within a school system. If school systems are to become effective agents in supporting student learning, educational leaders should prioritize the importance of trust. Trust is built through shared responsibility, mutual accountability, follow-through, integrity and a willingness to be vulnerable. Creating a culture of trust is a foundational element of continuous improvement.

Education leaders can build trust by creating structures and processes that promote interaction, dialogue, and collaboration which engage staff and constituents in decision-making at all levels of the organization. Socio-demographic and cultural factors also affect organizational trust levels as the shared values, beliefs, and behavioral norms reflect the members of the community.

### EQUITY

"Within each of us lies the most powerful, and still untapped, resource to turn schools and entire school systems into places for powerful learning. This resource, the resource most equally distributed among us humans, is our capacity to act, learn, and change the world. I've seen it work, and I trust we'll see it work more and more in the coming years."

- Santiago Rincon-Gallardo  
Chief Research Officer, Michael Fullan  
Enterprises

Students and employees are more likely to succeed when labor-management relations are healthy, inclusive and diverse. Including the voices of typically marginalized staff and stakeholders creates a diversity of perspectives that improves decision-making, collaborative practices and the ability to address learning gaps.

Structures and processes that allow for the insight from teachers and support staff to impact decision-making lead to more equitable outcomes for all. Creating access, maximizing opportunities for diverse voices and dismantling racial inequities is the work of both labor and management. Management should create more opportunities to listen to the voice of staff and unions should embrace their role in driving improvement.

### COMMUNICATION

"When we listen with the intent to understand others, rather than with the intent to reply, we begin true communication and relationship building. Opportunities to then speak openly and to be understood come much more naturally and easily."

- Stephen Covey  
Author, *7 Habits of Highly Effective People*

Communication requires consistent, honest and authentic dialogue. Leaders that foster an open psychologically safe space for questioning and reflection increase communication and cause us to view each other as resources. Open communication and transparency builds an organizational culture that supports collective learning and shared responsibility.

Ongoing open dialogue and shared information between school staff, labor and administrative leaders builds a shared understanding and a common language of the assumptions of the assumptions and processes used for decision making. Structures that enable communication like joint committees and labor-management learning teams help institutionalize collaborative practices. Effective communication also provides necessary feedback, supports shared goals and helps us listen and understand each other.

## Fostering a Culture of Trust Within and Outside a School System

*Excerpt from Toronto District School Board research compilation (read the original paper [here](#))*

### What is the Relationship between District Effectiveness and Trust?

Since the 1990s, there has been a renewed interest in the role of school districts in educational improvement and reform. In the accountability systems of recent years, it has become increasingly clear that schools are unable to meet these demands without the support and influence of the district. As a result, researchers have attempted to identify characteristics of effective and high-performing districts in the same way as effective schools research has done to identify characteristics of effective schools (Anderson, 2003; Togneri & Anderson, 2003; Trujillo, 2013). The literature on district effectiveness characterizes effective districts as having working relationships with open communication, collaboration, and trust among constituents in the district. As illustrated in the following section, these elements are embedded in the language of effective and improving districts.

Fullan, Bertani, and Quinn (2004) described 10 essential components for district improvement based on their study of school districts undergoing reform. We describe three of these components as they reveal the importance of communication, relationships, and trust in district improvement.

- **Districts need to have a ‘collective moral purpose’** - This means that everyone in the district needs to be responsible for student achievement and have an interest in the success of all schools, not only an individual school. This commitment to a common moral purpose requires trust, whereas competition between schools weakens “interdependence, trust and loyalty” (p. 43).
- **There is a need for ‘productive conflict’** - As Fullan et al. (2004) explain, the changes that come about through district reform are complex and may lead to disagreement among various parties. As part of this process, district leaders need to be able to distinguish between productive and unhealthy conflict. They also need to allow for different points of view and “work through differences” (p. 45). This component implies the need for communication, collaboration, and respect, which have a bearing on trust.
- **There needs to be a ‘demanding culture’** – This means that in order to engage and motivate schools to succeed and work through demanding situations necessary for district reform, there is a need for a culture of trust.

One of the features of strong school districts noted in the literature is the good working relationships with constituents in the district (Leithwood, 2010; Leithwood, 2013). In a paper commissioned by Ontario’s Institute for Education Leadership and Council of Ontario Directors of Education, Leithwood (2013) notes:

The relationships that matter most and that are the focus of development in strong districts lie within the central office and between the central office and its schools, parents, local community groups and the Ministry of Education. Communication throughout the system and within schools is nurtured by structures which encourage collaborative work. (p. 20)

Collaboration is a key element for district improvement, as noted by many authors (Anderson, 2003; Bjork & Bond, 2006; Leithwood, 2012; Togneri & Anderson, 2003).

The district-wide emphasis on collaboration and team work in professional learning communities leads districts on a continuous improvement cycle and supports the development of “shared beliefs” and a “commitment to reform” (Anderson, 2003, p. 12). In strong districts, collaboration is an inclusive process that involves many groups of stakeholders across the district, including board members, principals, teachers, and union leaders (Togneri & Anderson, 2003).

To achieve good working relations, stakeholders need to learn to work together in order to improve teaching and learning (Togneri & Anderson, 2003). As Togneri and Anderson (2003) note, in their study of U.S. school districts that made improvements in student achievement:

Collaboration and trust did not simply happen in the districts; rather, they were the result of deliberate and involved processes. Led by their boards and superintendents, the most collaborative districts in the study worked on working together. They engaged in ongoing dialogue, created cross-role leadership structures to facilitate communication among stakeholders, and intentionally sought tools to facilitate collaboration. (p. 32)

## Fostering a “Culture of Trust” Within and Outside a School System

*Continued from previous page*

Research indicates that collaborative districts have an easier time introducing innovations, have strong positive interactions, and have educational leaders who bring together stakeholders to address issues and challenges within the district. Studies indicate that these collaborative processes increase trust (Togneri & Anderson, 2003).

Furthermore, in research on high-performing districts, collaboration seems to give staff the perception of a “flat” organization where they feel “organizationally close to those working in the central office” (Leithwood, 2010, p. 260). In these districts, there is more communication both vertically and horizontally which can lead to greater collaboration and shared values.

A key variable for district improvement is high quality governance characterized by strong working relationships between board members and educational leaders who foster trust, respect, confidence, support, and open communication (Anderson, 1992; Carol et al., 1986; Goodman, Fulbright, and Zimmerman, 1997, as cited in Land, 2002; the International Association of School Boards, 2000, as cited in Agullard & Goughnour, 2006). Quality governance also includes having good relations between the Board Chair and senior educational leadership, as well as between board members (Land, 2002).

Open communication and trust are also noted as key elements for improving districts. According to Agullard and Goughnour (2006), these elements are essential to create a ‘cohesive theory of action’ for district-wide improvement and for understanding the roles and structures needed to support improvement. To support the district’s improvement efforts, it is also important for central office staff to provide opportunities for input from principals, teachers, and staff on the district’s continuous improvement efforts (Agullard & Goughnour, 2006). As Agullard and Goughnour (2006) point out:

- **Continuous improvement is a dynamic process requiring constant reflection and questioning.** Dialogue among school staff, among central office staff, and between the two provides opportunities to reflect and examine the process and the results of actions. Creating and sustaining a trusting and open relationship between central office and school staff is crucial to establishing open dialogue. (p. 11)

There are two other characteristics noted in the literature on strong districts that should be noted. First, the governing board should have a clearly defined policy-making role and hold the educational leadership responsible for administration of schools. The clearly defined roles of the board create a climate of trust (Agullard & Goughnour, 2006; Togneri & Anderson, 2003, p. 33).

Finally, there is some evidence to indicate that high-performing districts have a distributed or shared approach to instructional leadership. This is illustrated in the case of a principal who shared leadership with central office administrators by asking for their expertise and help with consultation, coaching, and mentoring support in classrooms (Eilers & Camacho, 2007, as cited in Leithwood, 2010). Section V addresses the topic of distributed leadership.

## Leading Collaborative Professionalism

*Andy Hargreaves & Michael T. O'Connor*

### How Should We Collaborate?

People cannot always mix things up by themselves. They need deliberate designs to help them do that—without sacrificing and, indeed, also actively enhancing the quest to build deeper and stronger relationships of trust, support and solidarity throughout the school, network or system.

One way to think about all this is in terms of high and low emphases on trust in working relationships on the one hand, and structure, tools and precision in work organization, on the other. These are represented in the chart below.

Adapted from the 2018 Centre for Strategic Education Seminar Series Paper #274 April 2018, Andy Hargreaves

### Quadrants of Collaboration:

#### No Collaboration

» Low trust, low precision

No collaboration is a culture of teaching that has to be left behind wherever it can. It insulates teachers from ideas and makes them anxious about themselves and envious or suspicious of others. There are no clear frameworks for meeting, planning or decision-making, or ways of sharing and giving feedback on practice. Improvement stalls, teachers get overwhelmed and lose heart, quality deteriorates, and many teachers leave.

#### Contrived Collegiality

» Low trust, high precision

Contrived collegiality is top-down and enforces teamwork to implement requirements set by others. Contrived collegiality fails to maintain motivation or anything more than superficial compliance. It is high threat, low yield and also leads to teachers being lost to the school or the profession.

#### Informal Collaboration

» High trust, low precision

Informal collaboration builds strong and enduring relationships, supports professional conversation and maintains teacher motivation. However, it tends to persist only where teachers have a strong affinity for each other and their values and styles, and it has difficulty translating promising conversations into positive action.

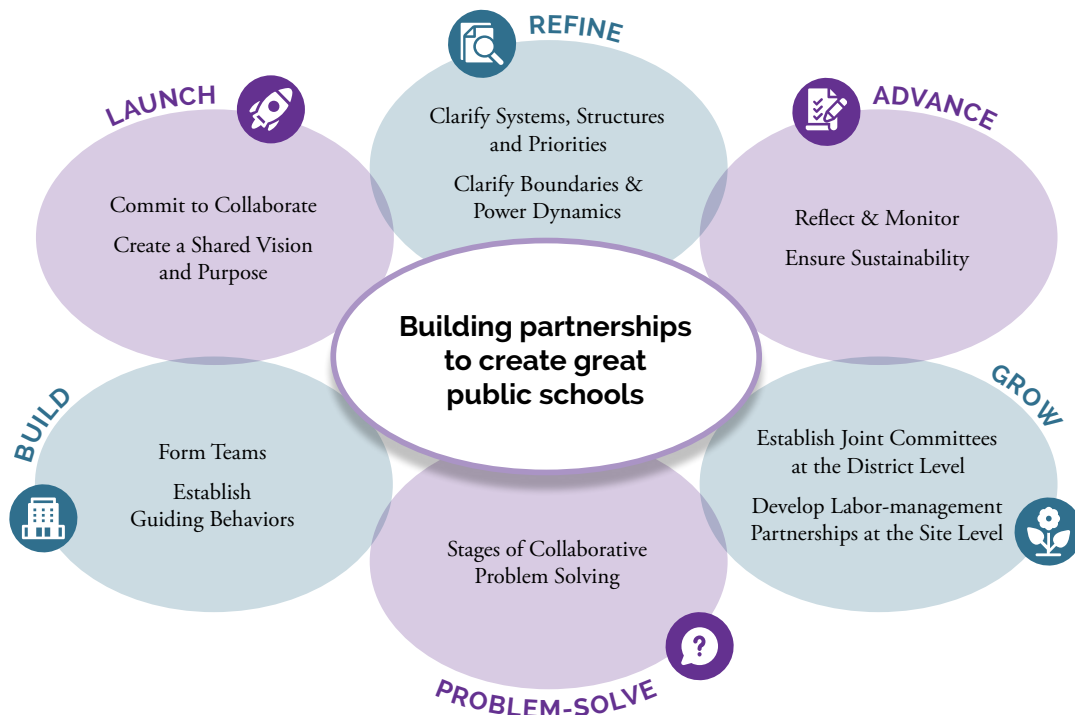

#### Collaborative Professionalism

» High trust, high precision

Collaborative professionalism is the golden cell of professional collaboration, where teachers have strong relationships, trust each other and feel free to take risks and make mistakes. There are also tools, structures and protocols of meeting, coaching, feedback, planning and review that support practical action and continuous improvement of the work undertaken together.

## The Six Elements of Partnership

**The Elements of Partnership graphic describes key stages of establishing, deepening and institutionalizing labor-management partnership.** The CA LMI Resource Guidebook is organized around the six Elements. Each Element has sub-components that allow labor-management teams and leaders to explore key aspects of shared work and engage in group discussions that lead to common understandings and shared investment. Building partnerships is a process not a sequential set of proscribed steps. Each team needs to adapt the work to its local context and make it its own definition of a labor-management initiative. This is not about establishing a CA LMI committee in your district, rather this should be viewed as developing an organizational culture that promotes labor-management partnership and supports colleagues to do their best work with shared goals through the foundational pillars of collaboration, Trust, Equity and Communication. CA LMI is your learning partner.

- 1. LAUNCH.** The launch element is about building a shared understanding of collaboration, collaborative professionalism, and the value of partnership. Teams explore the research supporting the benefits of labor management partnership and build a commitment to work together to move across the partnership continuum and implement a shared vision.
- 2. BUILD.** This element focuses on establishing a structure and operating norms for labor and management to regularly meet, build foundational pillars and engage in reflective discussions of problem solving and improvement. Teams are encouraged to create a district level learning team and establish group norms that support collaborative professionalism.
- 3. REFINE.** Deepening the work of partnership requires an examination of power dynamics within school systems and across key stakeholders and the intentionality to address it. This element focuses on the connection between collaboration and equity and the clarity required for effective collaborative professionalism. It also encourages an examination into decision making; whether there is clarity and transparency around decision-making processes, and if not, ways to think about building an updated, more engaging and equitable system.
- 4. PROBLEM SOLVE.** The stages of collaborative problem solving is the focus of this key element. The Stages of Collaborative Problem Solving tool is an action- framework for teams to reflect and act upon key issues from a labor-management perspective while keeping equity at the center. The goal is to create practices that build trust and make collaborative professionalism a way of doing business.
- 5. GROW.** The Growth Element is about deepening the work across the system to build coherence, shared ownership and accountability. Expanding the work of collaborative problem solving and partnership requires that site leaders are engaged and that central office departments are working with joint labor-management committees to focus on priority topics and shared goals.
- 6. ADVANCE.** Building on the initial elements this stage focuses on sustainability and supporting a continuously learning team and organization. Creating safe spaces for organizational reflection and monitoring, data collection and using shared tools across the organization can be institutionalized through process, policy and contract language.

# ELEMENT 1:

## Launch

In the Launch stage, teams develop a shared understanding of collaboration, collaborative professionalism, and the value of partnership. Teams explore the research supporting the benefits of labor-management partnership and build commitment to work together in collaborative professionalism.

### Contents:

<b>1.A. - Commit to Collaborate.....</b>	<b>18-27</b>
<b>1.B. - Create a Shared Vision and Purpose.....</b>	<b>28-36</b>

“

**“The deep shift is a process shift of the way you work together. The culture of working together - risk taking, truth telling, openness, and so forth. You can’t learn that in a seminar. You must learn that in action research working and listening to each other in a healing way.”**

—Dr. Patrick Dolan  
labor-management leader and author  
of *Restructuring Our Schools*

”

## 1.A. COMMIT TO COLLABORATE

A critical first step in building or strengthening labor-management partnership is to make an intentional commitment to work together differently. This means recognizing that the status quo can be changed and improved upon. While each labor-management partnership is unique, this often results in management listening more to understand issues and experiences in the district, and for union leaders to engage in and take ownership of efforts to improve the district.

### WHY?

- Collaboration is impactful. It brings greater job satisfaction to staff and better outcomes for students
- Outcomes for high poverty districts are even greater
- Everyone has the opportunity to be visionary and a creator and everyone is responsible for the outcome
- Outcomes are achieved when there is coherence and everyone is focused on shared goals

### HOW?

- Focus on building an environment that prioritizes trusting relationships between people and the quality of the work
- Start where you are and keep working towards the environment you envision
- Inspire the creative engagement of all staff by rethinking the status quo

### Insights from the CA LMI Team

Professional collaboration requires both precision (coherence and clarity on direction and purpose) and trust (collaborative experiences where we earn and build trust).

Employing all three frames of Unionism – Industrial, Professional, and Social Justice – makes school systems more impactful.

Partnership is a journey, not a destination. If you stay with it, there will be progress and diversions, and then progress, again.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 2: Instructional Leadership**
  - » Element 2A: Professional learning Culture: Leaders promote a culture in which staff engage in individual and collective professional learning that results in their continuous improvement and high performance.
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 3: Management and Learning Environment**
  - » Element 3C: Climate: Leaders facilitate safe, fair, and respectful environments that meet the intellectual, linguistic, cultural, social-emotional, and physical needs of each learner.

## 1.A. Resource Overview and Implementation Suggestions

To help you get started there are two resources. First is a collaboration continuum that goes from adversarial to productive partnership. The other resource is Andy Hargreaves' simple chart that captures the components of collaborative professionalism (trust and precision) and clarifies lesser effective collaboration. They are great ways to thoughtfully assess your existing relationships and work towards collaborative professionalism.

In describing this new partnership dynamic, we often share the Three Frames of Unionism tools that help school staff think more broadly about how everyone can participate in the building and maintaining of great schools. There are concrete examples of what that new relationship can look like to share with your teams and imagine for yourselves.

When convincing reluctant colleagues to join this new way of thinking, you can point to the strong and promising research base for labor-management collaboration and partnership. First and foremost, there is increased staff retention and student achievement with even greater positive impacts in high-poverty districts.<sup>1</sup> Not surprising, research shows that districts with strong labor-management collaboration are better able to develop and implement innovative strategies for teaching and learning.<sup>2</sup>

<https://cdefoundation.org/staging/wp-content/uploads/2018/02/Cornell-Rutgers-Working-Paper-10-13-17.pdf>

2. Ibid

Guiding Questions	Progress Points
What are the strengths of our existing relationships? What does successful collaboration look like for us?	We speak respectfully to each other. We meet as a labor-management team, though we are still trying to identify action steps.
How can we build a commitment to making progress on the partnership continuum when we are not in a place of respect and collaboration?	There is a shared and acknowledged commitment by the group to move forward. Leaders meet individually, on a regular schedule to build personal connections.
How can we engage our unions and management as institutions, more directly in solving problems, in addition to engaging individuals?	All district committees and workgroups that include diverse membership are acknowledged by unions and management.
<b>Trust:</b> What are the historical relationships among the labor-management team members? Do they stand on solid footing now or are there relationships to repair?	All parties acknowledge historic relationship challenges. All Parties have stated a desire to invest in building improved relationships grounded in shared values?
<b>Equity:</b> The labor-management team has welcomed representatives from all labor and management groups?	There is a shared understanding that successful partnership lifts up and engages the diversity of voices working for the district.
<b>Communication:</b> How are members notified of meetings? Are notifications timely? How can the responsibilities of communication be shared among group members? Does the group take the time to check for understanding at the meetings?	There is a sustained commitment to and process for sharing information and checking for understanding.

## What leaders should expect from labor-management partnerships?

*Insight from ABC Unified*

### The Labor-Management Partnering Process **IS**:

- Finding at least one things in common to work on together
- Seeking ways to jointly accomplish that goal
- A vehicle for bringing together the key workplace stakeholders
- Built on shared ownership

### The Labor-Management Partnering Process is **NOT**:

- Denial of identity or personal power of either party
- Absence of differences, disagreements or conflict
- A substitute for collective bargaining
- Just the act of working together
- The act of doing everything together
- Forced cooperation
- Collaboration is not an answer for all ills

## Benefits of Labor-management Partnership

**Who Benefits from Labor-Management Partnerships**

IMPROVEMENTS	BENEFITS MANAGEMENT	BENEFITS UNION
IMPROVED PROBLEM-SOLVING CAPABILITIES leading to improved conflict resolution	✓	✓
FEWER ARBITRATIONS due to above plus more effective grievance processes	✓	✓
IMPROVED OUTCOMES AND GREATER STAFF BUY-IN due to more frontline staff involvement in shaping decisions	✓	✓
IMPROVED STAFF SATISFACTION	✓	✓
IMPROVED PATIENT/RESIDENT SATISFACTION	✓	✓
MORE EFFICIENT, HIGHER-QUALITY SERVICES due to redesigned work processes, performance improvement	✓	
ADDITIONAL BARGAINING UNIT POSITIONS due to redesigned jobs and new roles		✓
CONTINUOUS QUALITY IMPROVEMENT aided by information about industry trends and best practices	✓

### Partnership Quality

The relationship between the union and management. High quality partnerships are demonstrated by shared decision-making, collaboration, and mutual respect between formal union leaders and administrators.

### Cultural Attributes

Attribute	<u>District</u> Culture Attribute Description *	<u>School</u> Culture Attribute Description **
<b>Peer Collaboration</b>	The amount and quality of collaboration among administrators within a district. It encompasses information sharing, social support, and the extent to which administrators successfully work together to accomplish goals.	The amount and quality of collaboration among teachers and faculty members within a school. It encompasses information sharing, social support, and the extent to which faculty successfully work together to accomplish goals.
<b>Discretion</b>	The amount of autonomy afforded to school administrators within a district. In high employee discretion settings, administrators have the latitude to make school-level decisions independently.	The amount of autonomy afforded to teachers and faculty within a school. In high employee discretion settings, teachers have the latitude to make classroom-level decisions independently.
<b>Goal Alignment</b>	The extent to which administrators work towards common goals. High goal alignment is demonstrated by a common purpose and shared priorities.	The extent to which teachers and faculty members are working towards common goals. High goal alignment is demonstrated by a common purpose and shared priorities.
<b>Psychological Safety</b>	The extent to which school administrators are comfortable voicing their concerns and sharing their opinions. Administrators that experience psychological safety believe that they will not be harshly judged for making mistakes or voicing concerns about district policies. Psychologically safe environments allow for respectful discourse that includes all viewpoints.	The extent to which teachers and faculty are comfortable voicing their concerns and sharing their opinions. Teachers and faculty that experience psychological safety believe they will not be harshly judged for making mistakes or voicing concerns about school policies. Psychologically safe environments allow for respectful discourse that includes all viewpoints.
<b>Shared Decisions</b>	The extent to which school administrators, district administrators, and the superintendent collaborate on important decisions. In environments high in shared decision-making, the superintendent and district administrators regularly consult with school administrators for input on significant issues.	The extent to which school management and teachers/faculty collaborate on important decisions. In environments high in shared decision-making, school administrators regularly consult with teachers/faculty for input on significant issues.

\* District refers to Administrators at the site and district level, \*\* School refers to non-administrative staff across the organization

## Integrating the Three Frames of Comprehensive Unionism

*Adapted from “A Vision of Comprehensive Unionism,” Anderson, Jo; Consortium for Educational Change, 2018*

---

## Constructing “Comprehensive Unionism” Out of Three Frames

*Adapted from MTUL Cohort Draft 5.0 March 2011 by Consortium for Educational Change, May 2019*

### Industrial Unionism

“Collective power to meet bread and butter needs and ensure fairness from management”

### Professional Unionism

“Assuming responsibility for the quality of the profession”

### Social Justice Unionism

“Equity for our students through active engagement in the community”

## Orientation

- Emphasizes separation of management and union roles in defining members’ work. “Boards make policy, administrators lead, teachers teach.”
- The role of the union is to advocate for its members rights, focusing on working conditions, wages and benefits.

- Emphasizes building professional learning communities and building the craft and the profession of teaching.
- The Union promotes and protects high quality professional skills, resists threats to the profession and asserts member leadership and engagement in decisions that impact the teaching & learning conditions.

- Emphasizes alliances with parents and the community to organize for social justice to help all children succeed – schools and the conditions around schools must both change to improve educational outcomes.
- Race and class challenges and socio-economic segregation must be addressed if achievement gaps are to be narrowed.

## View of Management

- Assumes labor-management relations are hostile and adversarial. Defends member rights & responds to grievances.
- Fights for member priorities and standard of living in the budget. Organize members as an independent force.

- Values labor-management collaboration and partnership to improve and preserve public education and the profession.
- Emphasizes programs and priorities to improve education quality and student achievement in the public interest

- Management and labor are partners in engaging families, community and ethnic groups to build support for public education.
- Advocate together for bonds/parcel taxes, grants, foundation support, and to resist inequitable solutions based on race & class.

## Role of Parents

- The Union reaches out to Parents when engaged in bargaining crisis or labor/mgmt. conflict.
- Limit parent intrusions into the classroom to protect teacher autonomy.

- The Union works with parents to improve individual parent support for their child’s learning and work as partners with the education professionals.

- The Union reaches out to parent and community allies in strategic alliances to improve the quality of teaching, teacher cultural competency and increase opportunities for all students to be successful.

## Bargaining

- Limit scope of bargaining to bread and butter issues of salary, hours, and “working conditions.”
- Views the Contract as way to institutionalize all changes.

- Broad scope and interest-based bargaining are a way to address teaching quality and support issues.
- Agreements are also sought outside the contract.
- Contracts are a way to codify and sustain change.

- Infuse bargaining with concerns that address race, class, democracy, empowerment and equity issues.
- Change can only be institutionalized and sustained by organizing rank-and- file members and the community.

## Constructing “Comprehensive Unionism” Out of Three Frames

Industrial Unionism	Professional Unionism	Social Justice Unionism
<b>Decision-Making</b>		
<ul style="list-style-type: none"> <li>• Management prerogatives respected on a school and district level.</li> <li>• Teachers grieve management decisions through their union.</li> </ul>	<ul style="list-style-type: none"> <li>• Expands member decision-making and instructional leadership at school and district level. Joint decision-making expands member and union ownership.</li> </ul>	<ul style="list-style-type: none"> <li>• Democratic input by all stakeholders creates processes for institutionalized administrator, member, parent, and student empowerment.</li> </ul>

### Teaching and the Achievement Gap

<ul style="list-style-type: none"> <li>• Teachers and Support Professionals have limited ability to control conditions that cause the gap in student achievement.</li> <li>• Efforts to close the achievement gap must not be based on unreasonable expectations and the union’s role is to ensure that training and accountability measures don’t contribute to an unsustainable working &amp; learning environment.</li> </ul>	<ul style="list-style-type: none"> <li>• Professional quality in education is critical to closing the achievement gap. It is possible to define and measure quality teaching and supports. The union’s role is to make sure good methods and tools are implemented with fidelity.</li> <li>• Union takes a leadership role in improving the quality of teaching &amp; learning and professional development.</li> </ul>	<ul style="list-style-type: none"> <li>• Belief in “effort-based intelligence”--all students can learn if adequate resources are equitably distributed and available.</li> <li>• Cultural competency/proficiency for teachers to reach all students.</li> <li>• School district funding, equitable distribution of accomplished teachers and school resources are priorities.</li> </ul>
--	---	--

### Teaching Working Conditions

<ul style="list-style-type: none"> <li>• The union works to improve conditions of teaching (Class size, adequate text books and supplies, hours, etc.)</li> <li>• Union emphasizes protection of members’ rights – files grievances to resolve conflicts.</li> <li>• Seniority provisions are the best protection against employer favoritism.</li> </ul>	<ul style="list-style-type: none"> <li>• The union is willing to take control of the improvement of teaching, support for teacher and support personnel effectiveness.</li> <li>• Alternatives to seniority-based transfer, assignment and layoff procedures are developed by the union to balance needs of younger and older teachers and the program needs of the educational enterprise.</li> </ul>	<ul style="list-style-type: none"> <li>• Assignment of teachers and support personnel to schools ensures high-quality, experienced members in hard-to-staff schools.</li> <li>• The union supports preferential teaching and learning conditions (e.g. lower class sizes) for high poverty schools.</li> <li>• Seniority-based Reductions-in-Force will be modified by the union so as not to disproportionately impact high-poverty, high-turnover schools.</li> </ul>
---	--	---

### Curriculum, Instruction & Assessment of Student Learning

<ul style="list-style-type: none"> <li>• Primary role of union is to improve wages, benefits, retirement, and equal treatment for all members.</li> <li>• Curriculum, professional development, assessment and grading policy are the responsibility of the district management.</li> <li>• Teachers are responsible for teaching and students are responsible for learning.</li> <li>• Teachers must not be evaluated primarily based on student test scores because that unfairly and inaccurately credits teachers for low performance that has other causes.</li> </ul>	<ul style="list-style-type: none"> <li>• Union promotes additional responsibility and pay for teacher instructional leaders.</li> <li>• Union brings the teachers’ voice to the design, implementation and evaluation of curriculum, assessment and instruction.</li> <li>• The role of student test scores and other factors in teacher evaluation is negotiated and monitored by the union.</li> <li>• Union accepts necessary role of student achievement/learning in teacher and school accountability, because that is how public schools are judged.</li> </ul>	<ul style="list-style-type: none"> <li>• Union safeguards teachers’ role in promoting critical thinking, critical pedagogy, and a broad curriculum, not aimed primarily at standardized tests.</li> <li>• Teachers encouraged to make curriculum relevant to students’ lives and to incorporate student’s lives into learning – cultural competence.</li> <li>• Union advocates for a “Broader Bolder Approach” to building a movement to improve the social context for schooling – health care, jobs, housing, etc.</li> </ul>
---	---	--

## THE BENEFITS OF COLLABORATION: A SNAPSHOT

### COLLABORATION MITIGATES THE NEGATIVE IMPACTS OF POVERTY

#### MORE STUDENTS ACHIEVE

When there is greater collaboration in schools, more students perform at or above grade level standards.

**+4.5%**  
MATH

**+12.5%**  
ENGLISH  
LANGUAGE  
ARTS

#### MORE TEACHERS STICK AROUND

When collaboration is low, teacher retention is 3.5x lower in high-poverty schools than in low-poverty schools. But, when collaboration is high, there is no statistical difference in teacher retention between high-poverty and low-poverty schools.

### COLLABORATION INCREASES EDUCATOR EMPOWERMENT

Improved  
Goal Alignment

Increased Educator  
Confidence

Association Rep and  
Principal Seen As  
Professional Resources

### THE ROLE OF THE ASSOCIATION IS TRANSFORMED

COMMUNICATING  
ABOUT SCHOOL  
IMPROVEMENT

ENSURING  
EDUCATOR VOICE IN  
EDUCATION QUALITY

COMMUNICATING  
ABOUT GRIEVANCE  
ISSUES

ENSURING  
SHARED  
DECISION-  
MAKING

Building representatives see their roles shift from primarily transactional, to more balanced and transformational roles.

In collaborative environments, the association/union's natural network facilitates sharing of innovative practices across schools and districts.

(Infographic based on research by McCarthy and Rubinstein, 2017)

RUTGERS

[cdef.ink/CR\\_Nat\\_Study](https://cdef.ink/CR_Nat_Study)

Over the past 16 years, federal efforts to improve public education have focused on market reforms (charter schools and voucher programs). To date, there is little evidence that these reforms have produced the promised benefits. However, for the past 10 years, we have been studying a different approach to improving and reforming public education—one based on building strong relationships among teachers' unions and school administrations, and developing collaborative institutions in schools and school districts focused on improving teaching and learning. We have been conducting a national study on union-management partnerships and educator collaboration in public schools across the country, which includes over 400 schools in 21 school districts in six states: California, Illinois, Maine, Massachusetts, Minnesota, and New Jersey.

We focus on school and district decision-making and problem-solving, particularly as they apply to the relationship among administrators, teachers, and their unions. We are interested in how collaborative processes at the school level—specifically shared decision-making; goal alignment; and teacher discretion, voice, and psychological safety<sup>1</sup>—impact student performance, teacher turnover, and engagement, and the extent to which teachers view their principals and union leaders as educational resources. In addition, we study how union-management partnerships in school districts shape school culture. Our findings reveal that union-management partnerships help to catalyze productive collaborative behaviors that benefit students and educators alike.

<sup>1</sup> Psychological safety is the extent to which one perceives that he or she can be open and question policies or decisions without fear of reprisal.

### Summary of Findings:

- » School-level collaboration **improves student performance** (ELA and math), even after we control for poverty.
- » School-level collaboration **reduces voluntary turnover and increases school commitment.** (These effects are particularly strong for high-poverty schools.)
- » Highly collaborative schools and strong union-leader networks **increase cross-school knowledge sharing.**
- » Formal union-management partnerships at the district-level seem to be **a catalyst for building highly collaborative schools**, as we find that district partnerships are positively associated with school collaboration.
- » School representatives in high-partnership districts are more likely to **view** collaboration-building as central to their union roles and responsibilities.

In addition, we also found that collaboration, including shared decision-making, goal alignment, teacher discretion, voice and psychological safety, are all positively associated with teachers' perceptions of:

- » Individual teacher and collective faculty effectiveness;
- » Principal resourcefulness;
- » Union representative resourcefulness.

## 1.B. CREATE A SHARED VISION AND PURPOSE

An essential element of “launching” a labor-management initiative is creating a shared purpose, a collective vision for what is possible. It is the “North Star” for a labor-management team’s collaborative work and drives the priorities and activities. It sets the expectation that the team’s work is owned and implemented collectively by all team members. When teams do this, participants see themselves in the work and they feel ownership and accountable for the outcome. Working together to develop a shared vision also builds trust among team members and fosters a culture of inclusivity and respect for each other’s opinions and perspectives.

To be meaningful, the vision and purpose is based upon the passions that inspire the labor-management team members to work in education, or as Simon Sinek calls it, the WHY, or the noble purpose that motivates each of us.

It is important to note that the vision and purpose are not action steps themselves. They are the guidepost for the activities that the labor-management team designs and the inspiration that drives participation.

### WHY?

- Teams with shared purpose generate collective impact and results
- Shared vision and purpose are foundational to building trust
- There is transparency about the big picture and everyone feels invested
- Everyone becomes an ambassador and accountable for success

### HOW?

- Create a safe space for people to be honest and share their personal stories
- Share the personal stories that motivate you
- Develop shared core beliefs and a vision based upon what matters to you, your team and your community
- Inspire everyone on the team to be a leader and invested in the success of this work

### Insights from the CA LMI Team

This work is about systems change and continuous improvement, it does not live just in the HR Department in school systems.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1B-1: Embrace diverse perspectives and craft consensus about the vision and goals.
- **Standard 2: Instructional Leadership**
  - » Element 2A: Professional learning Culture: Leaders promote a culture in which staff engage in individual and collective professional learning that results in their continuous improvement and high performance
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 3: Management and Learning Environment**
  - » Element 3C: Climate: Leaders facilitate safe, fair, and respectful environments that meet the intellectual, linguistic, cultural, social-emotional, and physical needs of each learner.
- **Standard 5: Ethics and Integrity**
  - » Element 5B: Leaders Guide and support personal and collective actions that use relevant evidence and available research to make fair and ethical decisions.
  - » Element 5C-3: Encourage and inspire others to higher levels of performance, commitment, and motivation by modeling transparent and accountable behavior.

## 1.B. CREATE A SHARED VISION AND PURPOSE

In the world of change making, shared vision is a core component of collective impact and a critical element for teams of people tackling complex problems. The road to action starts with a shared understanding of what's important and where the team is headed. Michael Fullan's educational change research and implementation strategies are a good example of change work starting with a shared understanding of values and goals. He highlights that once everyone shares the same vision, people can bring their individual creativity and skills to building a plan to achieve it. This is the beginning of the Coherence Framework. It is also seen in community movements for change. The work underlying mobilizing is exploring the passions and interests of diverse people and consolidating them into a shared statement of purpose or vision. How might teams launch the conversation that creates the unifying statement or list of beliefs that emotionally pulls colleagues to action? How does it happen so that it doesn't feel like another irrelevant activity that sits on the shelf?

**Leaders must believe that 1) the exercise is meaningful, 2) that it will help their team build honest and trusting relationships and 3) that the purpose developed will be used to focus the team and guide decisions.** Leaders must be invested in sharing their personal stories and listening to and understanding the stories of others. By sharing stories, it is possible to see where visions overlap, and understand the breadth of the challenge from new and different perspectives. Then a vision that resonates for everyone can be created

To begin, get team members thinking about their motivation for being in the world of education. There are two great leaders in the field to lean on. The first is Simon Sinek. He is well-known for his books and international speaking on tying business success to the importance of “why.” More recently, he has advocated for the renaming of a shared mission or vision statement with identifying a “Just Cause.” You can share either of his Youtube videos (see the Additional Resources section) as a conversation starter. Then capture what is important to you and your teammates and draft your guiding values or “Just Cause” from those meaningful sharings.

The second powerful resource is Harvard professor Marshall Ganz. His worksheet on “What is Public Narrative: Self, Us & Now” can help teams develop a common, connecting purpose.

- **The Story of Now:** What urgent challenge do you hope to inspire others to take action on?
- **The Story of Us:** To what values, experiences, or aspirations of your community – in this case your teammates will you appeal when you call on them to join you in action?
- **The Story of Self:** Why were you called to motivate others to join you in this action?

Leadership is an important theme for both Sinek and Ganz (see the Additional Resources section of the Guidebook for videos and an article about this). This is not leadership in the hierarchical sense but rather, each member of the team is a leader and their responsibility is to support the vision or Just Cause and motivate others to be part of the work. This may be a very different mindset for educators and school personnel. If so, make sure that everyone shares this definition and then be prepared to build the trust and confidence among team members that this is the definition of leadership that matters. The CPSELs are a good reminder that leadership is about building a collaborative culture and promoting leadership in others. Also included in this section are examples of school district labor-management team vision and mission statements from Mountain View, Alisal and Dinuba. There are two examples of belief statements, one from ABC Unified where the beliefs are front and center with their expected behaviors and the second from Monterey County Office of Education where the shared beliefs form the foundation for the County Office Learning Team's Theory of Change planning tool.

## 1.B. CREATE A SHARED VISION AND PURPOSE

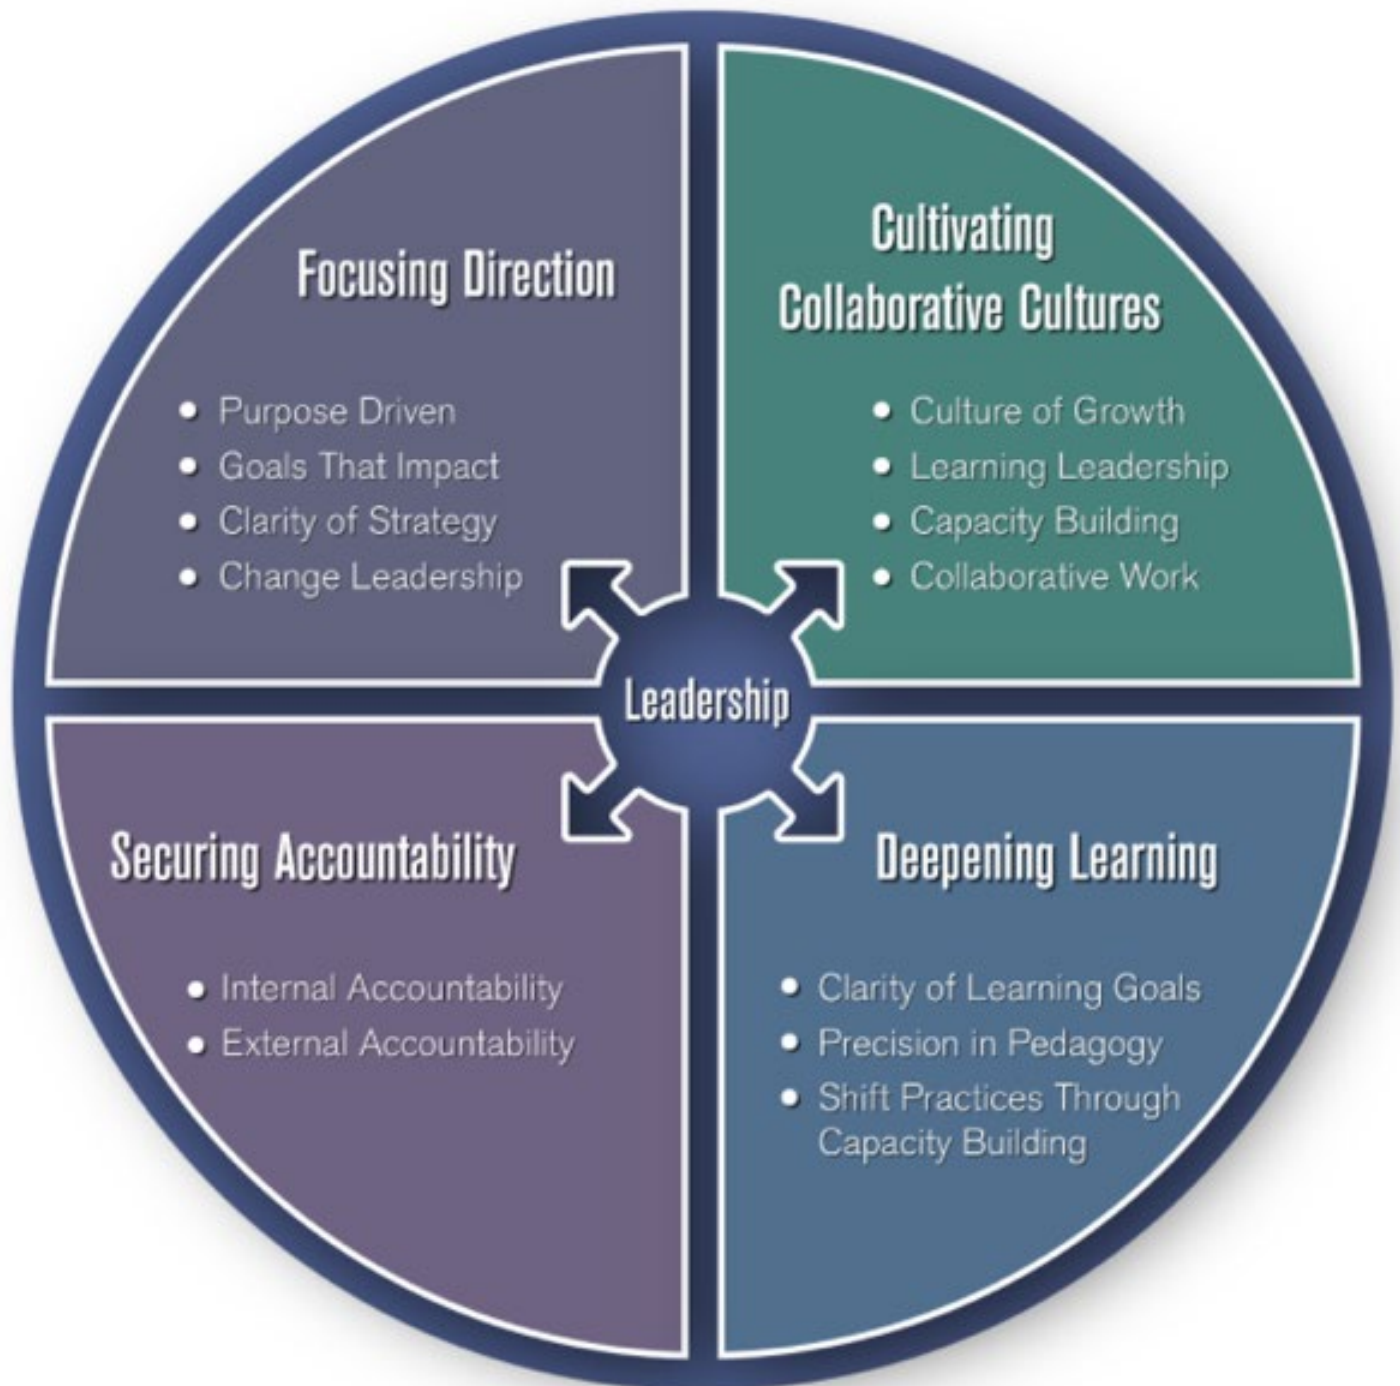

Guiding Questions	Progress Points
How can we learn what is motivating and inspiring to others on the team?	People on the team have shared their personal “WHY” story and a story of “us” and “Just Cause” became connected to the vision and purpose
What do we need to do to make this experience meaningful and not a superficial repeat of previous good intentions?	The vision and beliefs are easily retrieved by all members of the team. The vision and beliefs are referred to when the team loses focus.
<b>Trust:</b> What do we need to do to create a space where team members feel safe to share their honest feelings and stories?	Team and trust building exercises opened the door to personal stories.
<b>Equity:</b> How will you engage the diversity within your organization?	The vision and belief statements reflect the breadth of the community.
<b>Communication:</b> Why, how and when will we promote the vision and purpose to our members and constituents?	Other members in the organization are aware of the vision and purpose and feel connected to it. Other places in the organization are sharing personal stories to build trust.

## Coherence Framework: Focusing Direction

*Coherence - The Right Drivers in Action for Schools, Districts and Systems, Fullan & Quinn, 2016*

<https://michaelfullan.ca/coherence-the-right-drivers-in-action-for-schools-districts-and-systems/coherence-framework-extended/>

All four quadrants of the coherence progressions and coherence questions are linked here.

## Coherence Progression: From Thinking to Doing

*Adapted from: Taking Action Guide: Building Coherence in Schools, Districts and Systems, Fullan, Adam & Quinn, 2016*

Coherence Progression Components		Emerging	Accelerating	Mastering	Opportunity
Focusing Direction	A. Shared Purpose drives action				
	B. A small number of goals tied to student learning drive decisions				
	C. A clear strategy for achieving the goals is known by all				
	D. Change knowledge is used to move the district forward				

“

“People don’t trust you until they know your story. The most effective rebels and change makers are great storytellers. They share what’s at stake, paint a picture of what could be, make the status quo look unappealing and show how a proposed idea can work, even while pointing out the risks. They also tell insightful personal stories. Why? Before people will trust you or your idea, they want to know why you believe what you believe.

—Carmen Medina,  
Author, *Rebels at Work*

## Coherence Progression: Focusing Direction

	Emerging	Accelerating	Mastering
<b>Shared purpose drives action</b>	<ul style="list-style-type: none"> <li>A stated purpose or focus for the organization exists in formal documents but is not widely shared and does not drive decisions.</li> </ul>	<ul style="list-style-type: none"> <li>The stated purpose and focus are clearly articulated formally and groups are beginning to articulate this focus in their work. ## ABCFT and ABCUSD's Partnership Between Administration and Labor (PAL)

*ABC Unified School District*

---

### Guiding Principles

All students can succeed, and we will not accept any excuse that prevents that from happening. We will work together to promote student success.

All needed support will be made available to schools to ensure every student succeeds. We will work together to ensure that happens.

The top 5% of teachers in our profession should teach our students. We will work together to hire, train, and retain these professionals.

All employees contribute to student success.

All negotiations support conditions that sustain successful teaching and student learning. This is the MAIN THING!

**WE WON'T LET EACH FAIL.**

## Theory of Change: Labor-Management Partnerships

Monterey County Office of Education

Beliefs	Resources	Activities	Outputs	Impact
The assumptions that underlie our work	What we draw upon to do our work	What we do or deliver	What immediately happens from our implementation	What benefits and changes we expect over time
<p>Both students and employees are more likely to succeed when Labor-Management relations are healthy, diverse, and inclusive</p> <p>Employing all three frames of Unionism – Industrial, Professional, and Social Justice – makes us more impactful</p> <p>Healthy organizations use Professional Collaboration to problem solve and adapt successfully</p> <p>Professional Collaboration requires both Precision (coherence and clarity on direction and purpose) and Trust (collaborative experiences where we earn and build trust)</p> <p>Organizational culture does not change by mandate; it requires consistently applied behaviors and actions that are modeled and reinforced by leaders at all levels</p>	<p><b>Human</b> A committed staff</p> <p><b>Financial</b></p> <p><b>Organizational</b></p> <p><b>Community</b></p>	<p>MCOE Learning Team meetings to set organizational direction and monitor MCOE progress</p> <p>Professional development and training to build the capacity of MCOE staff to change organizational culture in line with labor-management collaboration</p> <p>Facilitated use of the 3-Box Framework for collaborative problem-solving throughout MCOE focused on refinement, prioritization, and innovation</p> <p>LMI Summer Institutes and regional (county-wide) convenings to deepen and disseminate professional learning in MCOE</p> <p>Integration of Educational Services to assist with LMI promotion and implementation both internally within MCOE, and externally with partnering districts in the county</p>	<p>Establishment of a multi-stakeholder forum for organization-wide leadership decisions</p> <p>Identification of leaders and influencers throughout MCOE</p> <p>Training and support to this diverse set of leaders and influencers</p> <p>Clarity of direction and purpose (staff who understand the WHY of MCOE priorities)</p> <p>Coherence and alignment of expectations (staff who co-construct the WHAT of implementation)</p> <p>Increased opportunities for leadership development (staff who own the HOW of implementation)</p> <p>Increased active presence of MCOE in county- and state-wide educational gatherings</p>	<p><b>Short (Year 1)</b></p> <ul style="list-style-type: none"> <li>Improved employee job satisfaction, sense of efficacy, and perceptions of MCOE direction</li> <li>More efficient and beneficial MCOE team meetings</li> </ul> <p><b>Medium (Years 2-3)</b></p> <ul style="list-style-type: none"> <li>Reduced staff absenteeism</li> <li>Improved intra-MCOE communication (sharing of information and data)</li> <li>Well established norms of internal accountability</li> <li>Increases in school districts reporting satisfaction with County-provided services</li> </ul> <p><b>Long-Term (Years 4-5)</b></p> <ul style="list-style-type: none"> <li>Increased staff retention (less turnover)</li> <li>Increased applications for employment within MCOE</li> <li>Distributed leadership structures that empower teams throughout MCOE</li> <li>Improved program/ service implementation leading to student/staff outcomes</li> </ul>

## Examples of Vision/Purpose

---

### Mountain View

"The Mountain View Partnership for Learning Team will foster strong, positive relationships among all employees where collaboration, transparency and trust will be seen as the norm. This will be accomplished by putting structures in place to address concerns and tackle issues together in order to benefit the entire Mountain View community."

### Alisal

"The Alisal Labor Management Accord (ALMA) Team, composed of District Staff, focuses on collaboration and communication by all stakeholders to create a culture of "we" that will teach the whole child and close the achievement gap for our students. The ALMA Team will model and support a culture of collaboration where all stakeholders are a part of supporting AUSD initiatives that will lead to continuous improvement in our district as a system."

### Dinuba

District Vision: "To end generational poverty through education"  
 --- Labor-management team purpose: "Cultivating trust and collaboration as Labor and Management teams"

# ELEMENT 2:

## Build

This element focuses on launching a labor-management team and establishing a structure for labor and management to regularly meet and engage in reflective discussions of problem solving and improvement. Teams are encouraged to start by developing a district level learning team, though labor-management teams can also be created at school sites and throughout the district. Once identified, the team should establish norms that support collaborative professionalism.

### Contents:

“

**If there is more truth in the  
hallways than in meetings,  
you have a problem.**

—Ed Catmull  
CEO, Pixar

”

## 2.A. FORM TEAMS

### What does a labor-management team look like?

To start, a District Learning Team (DLT) should be created with broad participation from across the organization including the superintendent, leadership from classified and certificated labor unions, as well as key district management. In some cases school board members are also included in the DLT, however, it is important that board members focus on their policy role, as outlined by CSBA, and not get enmeshed in the work of management and implementation. In addition to a district-level labor-management team, similar teams may be formed at the individual site level (see Element 6.B for additional detail). Labor-management collaboration goals and strategies may also be incorporated into learning communities and other district or school teams. Establishing multiple teams can generate an ecosystem of labor-management partnership in which teams with more specific focuses (such as site- or grade-specific teams) are informing those with a broader or policy-level focus, such as the district learning team. It is common for districts and school sites to build a variety of teams to work on a particular issue, but those initiatives are rarely viewed as a labor-management activity. Think about how these workgroups can be supported by and connected to labor-management collaboration.

It is important to recognize that no one loses power or authority in a labor-management partnership. When launching a labor-management initiative, constituents should ask, “what’s in it for me?” In addition to expanding and improving communication channels among team members and the organizations they represent, here are examples of specific benefits of building a robust labor-management team:

- **District administrators** benefit when decision making includes a broader, more diverse group of participants, especially a labor-management learning team. When problem solving and decision making are shared and discussed with this broader group, it makes roll-out of initiatives more effective, elevates topics from the learning team into the organization, and conveys greater organizational support for complex or potentially difficult decisions. It also lays the foundation for shared responsibility and accountability for implementation.
- **Teacher (certificated) association and union leaders** gain more opportunities to provide input on district-level decisions and implementation strategies, elevating educator voices, and increasing their understanding of the context and rationale for district-level decisions.
- **Classified employee association and union leaders** similarly gain more opportunities to be involved in district-level decision making, elevating the experiences of their members, and providing useful insights into implementation considerations from the staff perspective. Classified employees also gain a greater understanding of the overall district operation.
- **School board leaders** can gain a clearer understanding of the district context and the perspectives of key stakeholder groups. They can help make labor-management partnership sustainable by using their policy and goal setting role to prioritize building collaborative culture and climate within the school system and translating actions of the leadership team into policy.

### An additional benefit of starting with a broad sector team is the diversity it brings.

The life and education experiences are typically not the same for managers, certificated and classified staff. Further, classified staff often reside in the district and can help shed light on the parent, family, and community perspectives.

## 2.A. FORM TEAMS (Continued)

### WHY?

- The work of school districts is complex. More diverse perspectives at the leadership table helps identify root cause issues and brings forward a greater breadth of solutions.
- To tackle the large goal of organizational culture change, it is best to include leaders who have influence and who can help promote the work of the district and labor-management team.

### HOW?

- The team should be representative of the board of education/ trustees, superintendent, all unions and employee organizations, as well as members of the cabinet to launch a labor-management collaboration effort.
- The district level team should be large enough to include representation from all facets of the organization and have enough members that if one or two people are unable to attend a meeting, the group has enough participation to continue.
- Meetings should be scheduled regularly throughout the year.

### Insights from the CA LMI Team

Many teams choose to create their own names for their labor-management team such as the Solutions Team. We encourage teams to personalize this work. Get creative and develop terminology that is meaningful to you.

If an administrative association exists in the district it is a good practice to include their leadership in the district learning team from the start. If they are excluded, principals often feel left out.

Consider building upon or adapting successful organizational strategies that are already in place, such as meeting norms or existing joint committees. Alternatively, be respectful, but purposeful when integrating new norms and practices into existing groups.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1C-1: Include all stakeholders in a process of continuous improvement (reflection, revision, and modification) based on the systematic review of evidence and progress.
- **Standard 2: Instructional Leadership**
  - » Element 2A: Professional Learning Culture: Leaders promote a culture in which staff engage in individual and collective professional learning that results in their continuous improvement and high performance.
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 3: Management and Learning Environment**
  - » Element 3C-1: Strengthen school climate through participation, engagement, connection, and a sense of belonging among all students and staff.
- **Standard 5: Ethics and Integrity**
  - » Element 5B: Leaders guide and support personal and collective actions that use relevant evidence and available research to make fair and ethical decisions.

## 2.A. Resource Overview and Implementation Suggestions

**Creating a diverse team is the first step in building intentionality into your practice.** Random acts lead to random outcomes, but work that is focused and intentional will more likely result in the desired outcomes. Be thoughtful and strategic in your team development. Does it include leadership from all labor groups within the district? Is there appropriate representation from the school board? Is there adequate representation from the cabinet and the unions so that the work of the labor-management team can be embedded in the work of the district and the unions and no group can point a finger and say they weren't included?

**Does the proposed team reflect diverse perspectives and experiences?** Consider the ethnic, racial and socio-economic makeup of the district, the community, and the staff and determine if those voices are adequately included in the team? If not, what will be done to address the gap? Keep the overall team size manageable while including each stakeholder group. Consider what strategies, tools, and ideas can be adopted that ensure that the work is shared with others and inclusion goals are being met.

Included in this section is a diagram of a district labor-management structure that includes a learning team at the district level, school teams at school site levels, and professional learning teams within sites. Consider using this diagram with your learning team as a prototype when designing your district labor-management structure. Start small and realistic, and accomplish something before setting another goal! It is always effective, and a great trustbuilder to report to constituents that something that was planned was accomplished!

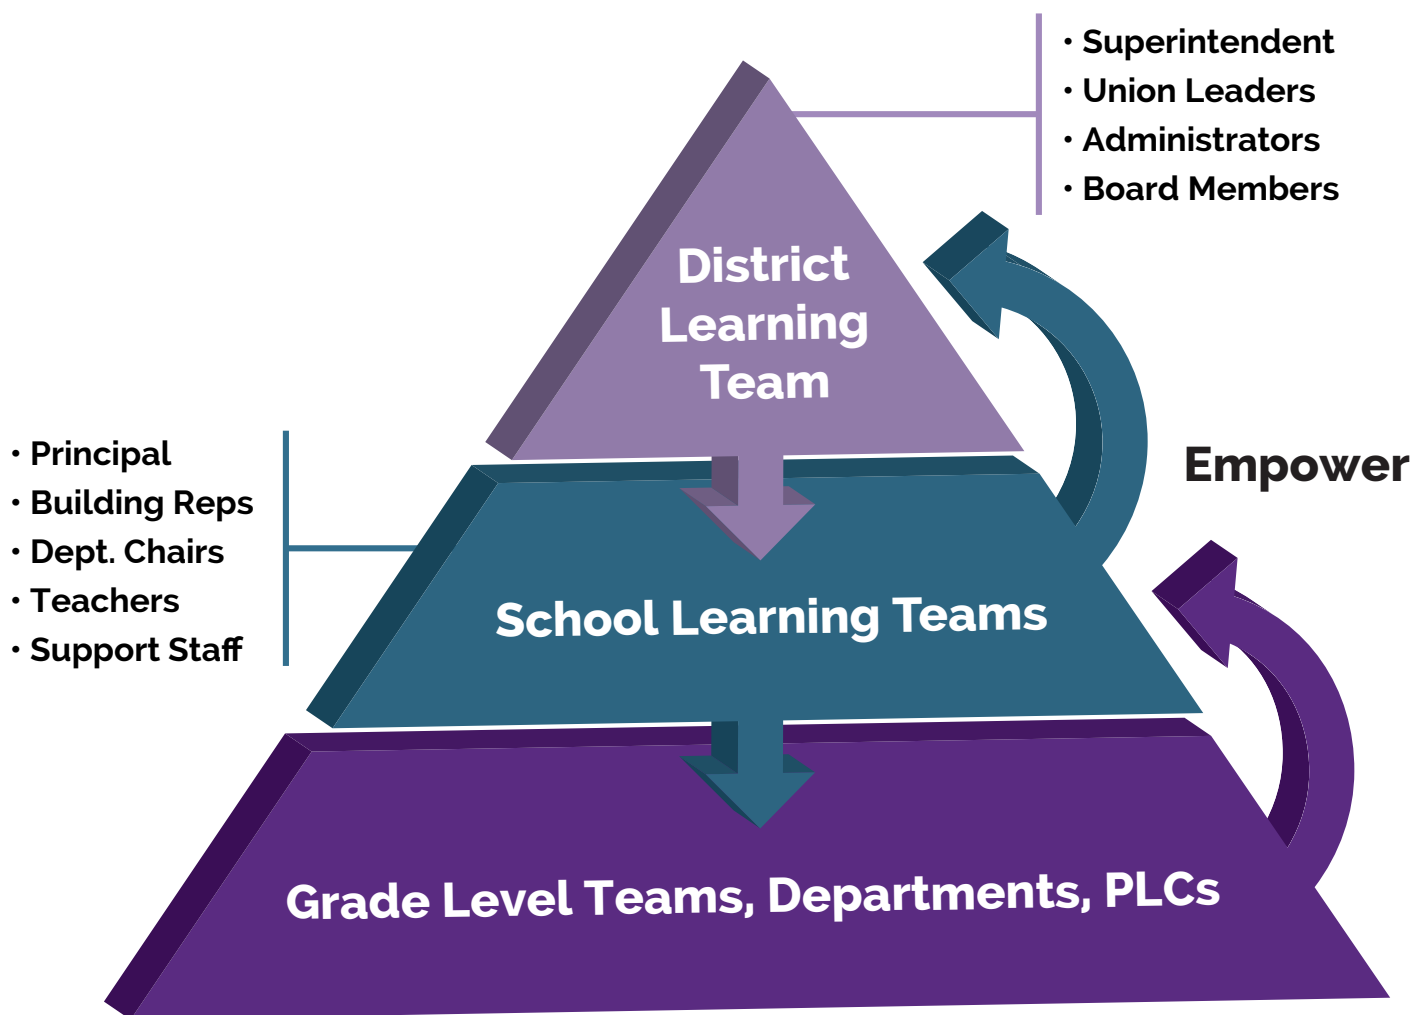

Guiding Questions	Progress Points
Have you identified all of the ways that your team reflects the leadership within your district and considered whether this is adequate?	Your team includes all bargaining units, a member of the school board and district management.
<b>Trust:</b> How were your team members identified and asked to participate? Who are the organizationally selected representatives of leadership and have they been invited to the team?	Your district learning team includes the representatives selected by the unions, a board member(s) selected by the school board, and all members of the cabinet.
<b>Equity:</b> Does your team adequately reflect the diversity of your community? Staff?	There are members on your team that reflect the racial, ethnic, and socio-economic diversity of the staff, students, and families.
<b>Communication:</b> How have you shared about the creation of your labor-management team? Have you emphasized the importance of diversity and equity? Have you been clear about why these individuals are participating and how they will interact with the district, community and staff?	A joint announcement about the formation of the DLT and its purpose was released by all members of the new learning team and was shared with district staff and stakeholder groups.

- *Collaborative Structures*
- *CEC's Leadership Structure: District Learning Team*

## Collaborative Leadership Structures

### Implementing Continuous Improvement in a Labor Management Context

## Collaborative Leadership Structures

*Adapted from the Consortium for Educational Change*

### District Learning Team

#### Purpose

The District Learning Team (DLT), comprised of representatives of district management and union leaders, focuses on listening and learning together. The DLT reflects on the feedback from sites and joint committees to improve the effectiveness of teaching, support services and student learning. The DLT provides opportunities to model and support a culture of collaboration where all stakeholders are engaged in building a system that is focused on continuous improvement.

#### Guiding Principles

- Model and support a culture of collaboration.
- Encourage active engagement of unions, district, and school communities.
- Identify and diagnose needs.
- Form project-based working committees to address district-level projects.
- Commission, empower, and support School Learning Teams (SLTs).
- Track and monitor overall progress and document lessons learned.
- Create accountability & transparency through communications

#### Composition

- Represents district and school administrators, classified and certificated unions, and a board liaison(s).
- A district administrator and a union leader may serve as co-chairs.
- Members of the District Learning Team are jointly nominated by the DLT co-chairs or a system is defined by labor & management to populate the DLT as a representative group.
- Team members are representative of the district and school community.
- District representation should include representatives from the departments of curriculum and instruction, human resources, and/or students support services.
- Union representation may include executive committee members, negotiations committee members and other committees focused on improving professional practice.
- School-level representation may include principals, assistant principals, teachers, union leaders, and support professionals.

#### Function

- Establishes a shared labor-management vision focused on creating a school system rather than a system of schools.
- Builds system-wide capacity focused on listening and learning together – a culture of “we”.
- Helps set district direction to empower students through learning.
- Identifies and diagnoses needs and targeted supports.
- Tracks and monitors progress – focused on “How are we doing?” and “How do we know?”
- Broadcasts results system-wide about accomplishments, challenges and opportunities for improvement.
- Monitor and advise SLTs on project progress and collaboration skills.
- Communicates and broadcasts to the internal and external communities what is being learned in the system
- Does not take the place of the collective bargaining process.

## 2.B. ESTABLISH GUIDING BEHAVIORS

As an important initial collaborative activity, teams are encouraged to develop a set of guiding behaviors or norms to establish parameters for meetings. When the newly launched team creates them, the group establishes what is necessary for building trust and psychological safety. Further, when the norms are actively referred to and collaborative culture is a focus, the likelihood of the team's success is increased. These guiding behaviors should be referenced regularly (for example, at the start of each meeting), and team members should hold themselves and each other accountable to following the guiding norms/behaviors.

### WHY?

- Having norms can increase the likelihood of achieving trust and precision
- Developing norms together increase joint accountability and commitment
- Regularly revisiting norms helps ensure they are impacting group behavior and culture

### HOW?

- Review examples of guiding behaviors and norms from other teams (several examples are embedded below)
- Reflect on particularly effective meetings and what aspects contributed to their success

### Insights from the CA LMI Team

Organizational culture does not change by mandate; it requires consistently applied behaviors and actions that are modeled and reinforced by leaders at all levels. A positive environment founded on respect, openness and shared learning generates opportunities to work together to transform systems.

Teams may want to print team norms/behaviors on their agenda documents to reinforce desired norms and help ensure the team regularly reflects on their behaviors.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1C: Leaders guide and monitor decisions, actions, and outcomes using the shared vision and goals.
- **Standard 2: Instructional Leadership**
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 5: Ethics and Integrity**
  - » Element 5B: Leaders Guide and support personal and collective actions that use relevant evidence and available research to make fair and ethical decisions.
  - » Element 5C-1: Communicate expectations and support for professional behavior that reflects ethics, justice, and integrity.

## 2.B. ESTABLISH GUIDING BEHAVIORS (Continued)

**It is a good practice early in the work of labor-management teams to engage the participants in developing protocols for meetings.** Protocols are intended to encourage participation from all attendees and set the expectations for how people will treat each other. It is not unlike creating the rules or behavior expectations for a classroom. Discuss with the group what needs to be done to make the adoption of the norms meaningful.

**Included in this section are several examples of guiding behaviors** used by CA LMI teams that can be used as a conversation starter, especially if the language and examples resonate with your team. Consider developing a plan for how the guiding behaviors will be used and how the team will hold each other accountable. For example, norms might be posted in the meeting room and everyone asked to reflect upon them before each meeting starts. Additionally, think about norms or principles that can help you get things moving when the team is just launching and there aren't long standing relationships or trust to build upon. It is often helpful to adopt meeting responsibilities such as facilitator, note-taker, and time keeper, that are rotated among team members at each meeting. This kind of advanced and detailed planning can keep meeting agendas moving and make everyone feel invested.

**Every activity is an opportunity for trust building.** When launching something new, set small goals and meet them. Keep scheduled meetings. Send timely meeting announcements or minutes. When there is no follow through or there is failure to implement meaningfully, it becomes a missed opportunity to increase trust and often results in damage to fragile relationships. To avoid misunderstanding, before each meeting ends, be sure there is shared understanding about any protocols set, plans made, or actions taken. As a reminder, labor-management teams work best when everyone feels ownership. Rather than parking all organizational tasks in Human Resources, share tasks and build equity. Consider providing training on meeting facilitation, note taking, or other skills that help build the capacity of the whole group. Remember that transparency and communication are key.

Finally, it is important to have agreement on how decisions are made. The next section digs deeply into this topic.

Guiding Questions	Progress Points
How might your team norms/behaviors be used outside of a labor-management team setting to create a collaborative culture?	Individual team members use norms/behaviors in other district/site meetings to model for others in the organization.
<b>Trust:</b> Do norms already exist? Did the team consider them and how was that handled? How do the views of staff who express distrust in the organization get addressed in the meeting norms?	Norms/behaviors are regularly addressed and modified by the group if necessary to improve effectiveness.
<b>Equity:</b> How will your norms/behaviors promote diverse participation and minority perspectives?	Every team member has had the opportunity to constructively participate in the formation of the guiding norms/behaviors before their adoption.
<b>Communication:</b> How will you share the guiding norms/behaviors? Will the guiding norms/behaviors be shared with the organization and if so, how?	Norms/behaviors are shared and accessible to every member of your district.

### Resources & Tools

- *The Seven Norms of Collaborative Work*
- *Monterey COE: Guiding Behaviors*
- *West Contra Costa Solutions Team Norms*
- *Coherence Progression: Cultivating Collaborative Cultures*

## The Seven Norms of Collaborative Work

---

### Pausing

Pausing before responding or asking a question allows time for thinking and enhances dialogue, discussion and decision-making.

### Paraphrasing

Using a paraphrase starter that is comfortable for you: “So...” or “As you are...” or “You’re thinking...” and following the starter with a paraphrase assists members of the group to hear and understand each other as they formulate decisions.

### Probing

Using gentle open-ended probes or inquiries such as, “Please say more...” or “I’m curious about...” or “I’d like to hear more about...” or “Then, are you saying...?” increases the clarity and precision of the group’s thinking.

### Putting ideas on the table

Ideas are the heart of a meaningful dialogue. Label the intention of your comments. For example, you might say, “Here is one idea...” or “One thought I have is...” or “Here is a possible approach...”

### Paying attention to self and others

Meaningful dialogue is facilitated when each group member is conscious of self and of others and is aware of not only what she/he is saying but how it is said and how others are responding. This includes paying attention to learning styles when planning for, facilitating, and participating in group meetings. Responding to others in their own language forms is in one manifestation of this norm.

### Presuming positive presuppositions

Assuming that others’ intentions are positive promotes and facilitates meaningful dialogue and eliminates unintentional put-downs. Using positive presuppositions in your speech is one manifestation of this norm.

### Pursuing a balance between advocacy and inquiry

Pursuing and maintaining a balance between advocating a position and inquiring about one’s own and other’s position’s assists the group to become a learning organization.

## Collaborative Professionalism: How We Will Work Together

*Monterey COE*

---

### Guiding Behaviors

Be soft on the people, hard on the issues.

Don't be afraid to bring up issues whether they  
may divide us.

Listen, listen, listen.

Get to the point, strive for clarity, check for  
understanding.

Don't react with judgment.

Participate with mutual respect.

One voice at a time.

Make no personal attributions.

Be in the moment; use technology appropriately.

Develop shared talking points at the end of each  
meeting.

Develop protocols for joint communications.

Assign an outside note-taker to capture essential  
information and create a record

Be clear about discussion parameters.

We are here to serve students and make MCOE  
the best place to work.

Keep a solutions mindset.

## Collaborative Professionalism: How We Will Work Together

*West Contra Costa Unified Solutions Team*

---

### Ground Rules

1. Be soft on the people, hard on the issues.
2. Don't be afraid of bringing up the issues that may or may not divide us.
3. Listen, listen, listen.
4. Get to the point.
5. Don't react judgmentally.
6. Mutual respect. Don't be dismissive.
7. One voice at a time. Allow people to finish what they are saying.
8. No personal attributions. When you leave the meeting, do not attribute a comment to any particular member.
9. Cell phones off or on vibrate. Leave the room if you have to make a call. Don't text or email during the meeting.
10. Membership: Each bargaining unit may have two members. There will be no alternates.
11. Quorum: One person from each bargaining unit is necessary to have a meeting. Let people know prior to the meeting if you will not be there or need to leave early so that we can adjust accordingly. No decisions may be made without a quorum. However, the group may decide to discuss a particular issue without a quorum.
12. Reopening decisions: When the group has made a decision, it can be reopened in the following way: The person wishing to reopen must bring information that he or she believes is a) new, and b) the information changes the complexion of the issue. The entire group will discuss and decide by a 75% vote whether the request meets the two criteria and thus warrants reopening the issue for discussion.
13. Communication and Confidentiality: At the end of each meeting, we will mutually agree on talking points to take out to our constituents.
14. The facilitator will take and distribute notes. Everyone will have the chance to review them. The final agreed-upon version will be the official notes of the meeting. If we want to talk about something that we do not want in the notes, or don't want notes in detail, we will just say so and it can be left out. Otherwise we will include what we decide, the reasons for the decision, and supporting notes about the discussion.
15. The facilitator will draft a Joint Communication, which will be sent to all employees after review and approval by a task force (currently comprised of Kim Chamberlain, Sara Danielson, and Ken Whittemore.) The HR Department will send out the Joint Communication when it is ready.
16. Anyone is empowered to call a break/time-out.

## Coherence Progression: From Thinking to Doing

*Adapted from: Taking Action Guide: Building Coherence in Schools, Districts and Systems, Fullan, Adam & Quinn, 2016*

Coherence Progression Components		Emerging	Accelerating	Mastering	Opportunity
Collaborative Cultures	A. A growth mindset underlies the culture				
	B. Leaders model learning themselves and shape a culture of learning				
	C. Collective capacity building is fostered above individual development				
	D. Structures and processes support intentional collaboration				

“

**“In organizations, real power and energy is generated through relationships. The patterns of relationships and the capacities to form them are more important than tasks, functions, roles, and positions.”**

—Margaret Wheatley,  
*Author, Teacher, Speaker*

## Coherence Progression: Cultivating Collaborative Cultures

	Emerging	Accelerating	Mastering
<b>A growth mindset underlies the culture</b>	A comprehensive internal leadership development strategy is not in place. Leaders build their capacity individually through courses, workshops and conferences and less frequently in collaboration with others. There is a reliance on experts to “fix” the problem or for pre-packaged solutions. There is a reliance on external hires for leadership and key roles rather than a focus on building internal capacity.	An intentional strategy for developing internal leadership is emerging. There is a commitment to move from individual development to collaborative learning. Talent is being noticed and nurtured but strategies may not yet be consistent across the entire school/district. Capacity to lead internally driven solutions is growing. The reliance external hires, programs or experts to “fix” the problem and prepackaged solutions is decreasing.	Leaders possess a growth mindset that builds capacity in themselves and others. A comprehensive strategy is in place to develop the next generation of leaders from within. The organization views problems and challenges as an opportunity to grow capacity. They see internal expertise as the driver of solutions and innovation in policy and practice and have ways to identify and mobilize that talent. Rich and diverse external resources are use as inputs to their internally driven solution finding processes.
<b>Leaders model learning themselves and shape a culture of learning</b>	Leaders support and send others to learning sessions but rarely participate as learners themselves. Leaders are beginning to articulate learning as a priority but are unclear or inconsistent with the allocation of resources. Trust may be developing but is not consistent across the school/district. The structures and processes that exist such as PLC's and coaches may not be well coordinated or targeted to the priorities.	Leaders participate as lead learners and are beginning to make learning for everyone a priority at the district/school. Leaders are beginning to identify and develop other leaders at all levels. Leaders are shaping the culture by developing trusting relationships but these do not exist with all groups. Structures and processes to support meaningful collaborative work are more common but are inconsistent across the school/district.	Leaders model learning by participating as learners and by leading robust capacity building in the school/district. They make learning a priority and actively foster leadership at all levels. Leaders shape culture by building trust and relationships both vertically and horizontally. Leaders create structures and processes for collaborative work and support cycles of learning and application. They provide resources strategically to propel what matters.
<b>Collective capacity building is fostered above individual development</b>	Professional learning opportunities exist but often focus on individual needs and are viewed as more of an event than a sustained process. Inquiry practices are beginning to be used but inconsistently across the school/district. The level of trust is growing but there remain some topics that are avoided and an unwillingness to be sharing practices such as peer observation and feedback.	A culture of learning and collaborative inquiry exists where teachers and leaders reflect on, review and adjust their teaching and leadership practices. Learning experiences are designed using effective practices that foster collaboration and application in role. Trust is growing and practices are becoming more transparent such as observation and feedback. These practices are evident but not yet consistent at all levels of the school/district.	A powerful culture of learning pervades the school/district as the way we do things here. Learning collaboratively is the norm. Strong trust exists and supports innovation and risk taking. Learning opportunities are rich and diverse with an emphasis on collaborative learning. Opportunities to apply the learning in role are supported consistently. Successes are celebrated and shared and challenges seen as opportunities for deeper learning.
<b>Structures and processes support intentional collaborative work</b>	There are few resources such as coaches, mentors, or teacher leaders to support implementation. These supports are not consistently available or focused. Pockets of collaboration for learning exist but it is not the norm. Collaborative practices such as PLC's are not linked to data and use of learning goals for students.	Structures and processes exist to develop collaborative learning and collective capacity but are inconsistently used across the school/district. Mechanisms such as coaches, networks and communities of practice exist but are not yet focused, connected or consistently used across the school/district.	Professional learning models include structures and processes to foster collaborative learning that builds collective capacity. “Learning from the work” involves cycles of application and collaborative inquiry within and across the school and district. Mechanisms such as coaches, learning networks and communities of practice, consistently support horizontal and vertical development tied to goals.

*Taking Action Guide: Building Coherence in Schools, Districts and Systems, Fullan, Adam & Quinn, 2015*

## Fostering a “Culture of Trust” Within and Outside a School System

Collaboration is a key element for district improvement...

...the most collaborative districts in the study worked on working together. They engaged in ongoing dialogue, created cross-role leadership structures to facilitate communication among stakeholders, and intentionally sought tools to facilitate collaboration.

*(Togneri & Anderson, 2003)*

### Characteristics of a Culture of Trust

1. Shared values	Values which are practiced at work but meaningful to employees outside of work.
2. A shared mission or goal	Employees' commitment to communal goals, and not simply personal/ independent goals.
3. Open and authentic leadership	A propensity of a leader to demonstrate trust, among other values, towards employees.
4. A culture of consensus not force	Employees willingly contribute to shared missions or goals if there is a culture of trust, otherwise, employees may feel pressures or coerced to do so.
5. A feeling of enjoying work	A culture of trust is fostered if employees feel relaxed and sense that mistakes and failure are acceptable.
6. An atmosphere of fun and enjoyment	A workplace where employees can have fun, be themselves, and are open to pushing intellectual (i.e. ideas, concepts) boundaries.
7. A desire to learn, not blame	Fault associated with mistakes and failure does not nurture openness, trust, and ongoing development among employees.
8. Honest and authentic conversations	A culture of trust is fostered where there is sincere communication and information is not withheld across horizontal and vertical relationships.

# ELEMENT 3:

## Refine

There are two things that deserve considered attention because they often derail efforts in a district or school : 1) ever-present but ignored power dynamics and 2) lack of clarity and transparency about roles, responsibilities, priorities, communication and decision making processes. In this section, there will be ideas for how to refine your implementation efforts to address these issues directly.

### Contents:

- 3.A. - Clarify Systems, Structures, and Priorities .....54-64**
- 3.B. - Clarify Boundaries and Power Dynamics ..... 65-74**

“

**The data are very clear that vulnerability is inextricably connected to intimacy, trust, love, belonging, courage. So, how do we create workplaces and schools and communities where armor is neither required nor rewarded.**

—Brené Brown

American researcher storyteller, professor,  
lecturer, author, and podcast host

”

### 3.A. CLARIFY SYSTEMS, STRUCTURES, AND PRIORITIES

**In this section, we will explore “system awareness,” making choices about where decisions are made and by whom, how issues are prioritized, and ways that information is shared within your organization, all in support of becoming a more transparent, equitable and collaborative organization focused on student learning.**

School districts are historic and hierarchical places. They are governed by federal, state, county and, local laws and policies. It can be easy to lose track of why decisions are made at the board level, the superintendent level, or the site level, and not question it. Sometimes districts and people get caught up in the comfort of “we’ve always done it this way.” When building or reenergizing a labor-management partnership one way to build trust, and effectiveness, is to re-examine where decisions are made and consider moving them closer to the source of the work. Moving decision making closer to its impact can be more efficient, connects decision making directly to the relevant data and spreads investment and accountability more broadly in the organization. When making changes to how or where decisions are made be mindful that it impacts the people who were formerly tasked with those responsibilities. Change is never easy and the more respectful and considerate the transition is, the easier the adaptation to the change. However, keep in mind the need for coherence and systemness as site autonomy is increased.

It is essential to be clear about where decision making happens and what role colleagues, staff, or community members have been asked to play in the decision making process. Frustration often bubbles up in a school or department when people are asked for input or instructed to do something by administration but there is no clarity about why decisions are being made, the purpose of the request, or the level of effort necessary for the response. Sharing more details about why a request is being made, the scope of the request, where decisions are being made and what will be done with the information helps build trust in a system and opens communication. This applies to the collection of data in staff and family surveys, review of LCAP or other planning tools, and actions taken by district and school committees.

Information sharing is a complex topic. Instead of thinking “what limited information can we release,” ask “what information is essential not to share”? People will believe they have been trusted to be part of the “information” circle and it will give more value to what is truly confidential and build trust in the system.

Finally, it is very useful to reference your mission and vision, existing strategic and education plans, LCAP, and state and board policies, to refine the work at hand. Every project, initiative, and decision should be aligned with those guiding documents and help you move toward your goals. Sharing that alignment regularly with everyone in the organization helps focus peoples’ energy on the work not individuals, helps build shared investment in the common goals, and offers clarity about priorities and decisions. This builds trust when the district follows through with its commitments and stays focused on priorities established by the board, informed by the community and focused on equity.

#### Insights from the CA LMI Team

Both students and employees are more likely to succeed when labor-management relations are healthy, diverse, and inclusive. We believe all viewpoints matter and that all voices have value. Management should create more opportunities to listen to the voice of staff and unions should embrace their role in driving improvement.

Including the voices of typically marginalized staff and stakeholders creates a diversity of perspectives that improves decision making and effectiveness. Systems that allow for the insight from teachers and support staff to impact decision-making lead to more equitable outcomes for all.

The less you know, the more you suspect! Make communications and transparency a priority.

### 3.A. CLARIFY SYSTEMS, STRUCTURES, AND PRIORITIES (Continued)

#### WHY?

- Goodwill can be gained and trust built when meaningful input is requested from others in the organization and the information is used in the manner promoted.
- Public education systems are complex and historic. It is useful to inventory administrative processes and structures to assess their ongoing value and make adjustments to match current organizational structures and needs.
- Ensures that labor-management team work relates to and is embedded within the broader district and community systems.
- Enables labor-management teams to effectively work toward needed systemic and structural changes.
- Understanding deeper organizational issues can help identify the right drivers for student improvement and staff growth.
- Ensures positive district culture and climate, which rely on underlying systems and structures.

#### HOW?

- Connect the labor-management team work to the district plans including the LCAP, as well as site and other relevant system plans (e.g., local government agency plans).
- Consider, with each new opportunity or project, where decision making is taking place and make modifications, where possible, to move decision making, or portions of decision making, closer to the work.
- Consider how labor-management committees and workgroups participate with existing structures.

#### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1B-3: Build shared accountability by distributing leadership roles and responsibilities among staff and community.
- **Standard 2: Instructional Leadership**
  - » Element 2C-1: Define clear purposes, goals, and working agreements for collecting and sharing information about professional practice and student outcomes.
- **Standard 3: Management and Learning Environment**
  - » Element 3B-3: Set clear working agreements that support sharing problems, practices, and results within a safe and supportive environment.
- **Standard 5: Ethics and Integrity**
  - » Element 5C: Leaders use their professional influence with staff and community to develop a climate of trust, mutual respect, and honest communication necessary to consistently make fair and equitable decisions on behalf of all students. Equitable decisions on behalf of all students.

### 3.A. Resource Overview and Implementation Suggestions

**The tools in this section emphasize the importance of clarity about the process.** In working with these tools, consider items like purpose, priorities and, shared decisions. In addition, thinking about people and relationships help clarify focus and intent. Shaping systems and structures takes time and a diversity of voices. Keep the focus on students and support staff in engaging in a continuing learning dialogue.

First is additional insights around Collaborative Professionalism. Second is a tool from Michael Fullan that identifies environmental characteristics that either promote success or create barriers to outcomes, “The Right Drivers for Whole System Success.” Restructuring the district’s processes with the intention of supporting the “Right Drivers” will inspire individual satisfaction and collaborative environments. It is good content for a labor-management conversation. Next is the coherence framework segment on Deepening Learning that will help embed effective pedagogy in the work of labor-management partnerships. An additional framework for that is Design Principles for Schools: Putting the Science of Learning and Development Into Action. The linked Executive Summary will help teams think about the range of opportunities they have for working together to transform education.

Guiding Questions	Progress Points
How does your team set its priorities and how are they connected to current district initiatives (LCAP, strategic plan, district mission, etc)?	District priorities are jointly developed by gathering information from site leaders, district leaders, and labor leaders.
Are there opportunities for labor leaders to join existing committees or workgroups?	District committees and workgroups have opportunities to include labor leaders.
<b>Trust:</b> Do your decision making systems and processes support shared voice and psychological safety?	Jointly developed systems/processes have built-in opportunities for leaders to safely discuss challenging subjects.
<b>Equity:</b> How does your team incorporate ideas from typically marginalized staff including issues of position, race and, background?	Decision making processes have been revised to include traditionally marginalized voices such as classified staff. Individuals beyond the typical usual participants are represented.
<b>Communication:</b> How does your team allow for greater transparency around the actions and role of the labor-management team? Is there a process to share information and jointly build agendas?	There is a wide understanding among staff about the role and activities of the labor-management team. The labor-management team regularly shares the work of the team on a joint platform (website, google drive, newsletters, etc).

The joint work of collaborative professionalism is embedded in the culture and life of the school.

Where educators care for each other as fellow professionals as they pursue their challenging work.

Where they collaborate in ways that are responsive to and inclusive of the culture of their students, themselves, the community and society.

## The Right Drivers for Whole System Success

by Michael Fullan

The four right drivers, in combination – what I have called ‘the human paradigm’, constitute the proposed new model for governing the future of education (see Figure 1). My conception of a driver is a force that attracts power and generates motion on a continuous basis. The four drivers in question are not traveling down a divided highway. Instead, they form a constellation of stars that give each other energy and purpose. They represent a single, integrated model that generates continuous development.

The four new wrong drivers are not completely wrong. It is just that if left alone they take us in a negative direction. Let’s name them and give them nicknames (in parentheses).

1. Academics Obsession (selfish)
2. Machine Intelligence (careless)
3. Austerity (ruthless), and
4. Fragmentation (inertia)

They have been operating for 40 years, and with ever-growing intensity. Together they are the ‘bloodless paradigm’, lacking care, empathy, and civic awareness – the things that make us humans. The new right drivers, by contrast, capture and propel the human spirit. Again these are offered with nicknames.

1. Wellbeing and Learning (essence)
2. Social Intelligence (limitless)
3. Equality Investments (dignity), and
4. Systemness (wholeness).

They are the human paradigm and presently constitute a work in progress. We have barely begun to tap their potential. A fascinating analysis of the evolution of America, from the late 1800s to the present, was recently released by sociologist Robert Putnam with Shaylyn Garrett (2020). Their book is titled *The Upswing: How America Came Together a Century Ago and How WE Can Do It Again*. Using thematic evidence about economics, politics, society and culture, the authors make the case that the US has gone through periods of

- ‘I-ness’ (self-centredness) – 1870s to 1890s
- ‘We-ness’ (concern for others) – 1900 to 1970s and back to the present period of
- Excessive ‘I-ness’ – late 1970s to the present.

Reading the tea leaves, Putnam and Garrett speculate that 2021 onward could be another ‘We’ period. In many ways the prospect of the right drivers in combination makes such a positive case. So, what are the new more promising right drivers for system change?

## The Right Drivers for Whole System Success

Coherence Progression: From Thinking to Doing

Adapted from: *Taking Action Guide: Building Coherence in Schools, Districts and Systems*, Fullan, Adam & Quinn, 2016

Coherence Progression Components		Emerging	Accelerating	Mastering	Opportunity
Deepening Learning	A. Learning goals are clear to everyone and drive instruction				
	B. A set of effective pedagogical practices are known and used by educators				
	C. Robust and authentic processes used regularly to improve practice				

“

“The single biggest problem in communication is the illusion that it has taken place.”

—George Bernard Shaw,  
*Author*

## Coherence Progression: Deepening Learning

	Emerging	Accelerating	Mastering
<b>Learning goals are clear to everyone and drive instruction</b>	The learning goals for students are unclear or conflicting. For example, the relationship between core curriculum standards and deep learning competencies are unspecified. Some goals to improve precision in pedagogy have been identified but are not clearly articulated or understood. The strategy for improvement is unclear, implemented inconsistently, or under-resourced.	Learning goals are being articulated, and the link between deep learning competencies and core curriculum standards is being made more visible. A small number of goals to improve precision to pedagogy is clearly articulated. A strategy for improvement is clear to leaders but not well understood at all levels or implemented with consistency.	Learning goals for deep learning competencies and requirements of core curriculum standards are clearly articulated and integrated. A small number of goals to improve precision in pedagogy is clearly articulated. A strategy for improvement is clear, well understood, and being implemented consistently and with impact.
<b>A set of effective pedagogical practices are known and used by all educators</b>	A comprehensive framework for learning that identifies goals and high-yield pedagogies is in the beginning stages of development but is not understood widely or used consistently to guide learning.	A comprehensive framework for learning that identifies goals and high-yield pedagogies is articulated but is not yet consistently used across the school or district to design and assess effective learning experiences. A strategy for fostering deep learning accelerated by digital is being developed.	A comprehensive framework for learning that identifies goals and high-yield pedagogies is understood by all and used consistently across the school or district to design and assess effective learning experiences. A clear strategy for fostering deep learning accelerated by digital is being implemented in a culture of trust and risk taking.
<b>Robust processes such as collaborative inquiry and examining student work are used regularly to improve practice</b>	The work of coaches, teacher leaders, and support personnel is left to the local unit and not explicitly tied to the learning goals or priorities. Deep collaborative practices such as collaborative inquiry and protocols for examining student work may be used by some teachers or some schools, but there is no consistency of practice or support.	The school or district provides some resources and expertise for collaborative learning structures. The work of coaches, teacher leaders, and support personnel is coordinated but not consistently across the school or district. Deep collaborative practices such as collaborative inquiry and protocols for examining student work are being used with greater frequency but inconsistently across the school or district.	The school or district provides resources and expertise for collaborative learning structures to thrive. The work of coaches, teacher leaders, and support personnel is well coordinated by the school or district to maximize impact and achieve the student learning goals. Deep collaborative practices such as collaborative inquiry are protocols for examining student work are used consistently across the school or district. Collaborative inquiry is used to monitor progress on impacting learning at all levels.

*Taking Action Guide: Building Coherence in Schools, Districts and Systems*, Fullan, Adam & Quinn, 2015

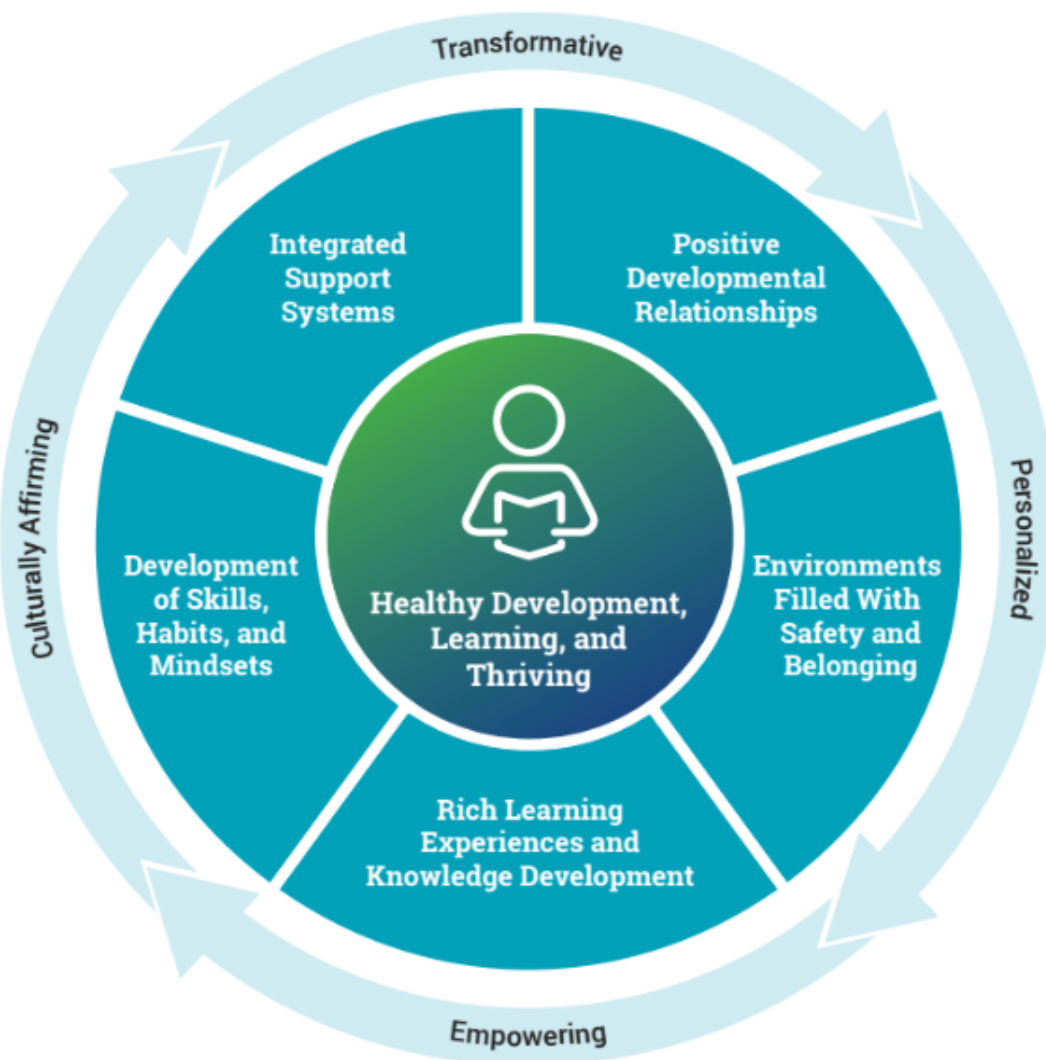

## Design Principles for Schools: Putting the Science of Learning and Development Into Action

*Learning Policy Institute and Turnaround for Children in partnership with the Forum for Youth Investment and in association with the SoLD Alliance, 2021*

School and learning design initiatives such as the one described below should be jointly undertaken through a collaborative labor-management process. Implementing and contextualizing these types of transformative approaches, including Community Schools models, are far more likely to be successful if they are jointly designed by labor & management.

### Guiding Principles for Equitable Whole Child Design

Source:  
[https://learningpolicyinstitute.org/sites/default/files/product-files/SoLD\\_Design\\_Principles\\_EXESUMMARY.pdf](https://learningpolicyinstitute.org/sites/default/files/product-files/SoLD_Design_Principles_EXESUMMARY.pdf)

## Community Schools Models

<https://learningpolicyinstitute.org/product/community-schools-playbook>

### What are Community Schools?

Community schools are public schools that partner with families and community organizations to provide well-rounded educational opportunities and supports for students' school success. Like every good school, community schools must be built on a foundation of powerful teaching that includes challenging academic content and supports students' mastery of 21st century skills and competencies. What makes community schools unique is the combination of four key pillars (or features) that together create the conditions necessary for students to thrive. The pillars are: 1) integrated student supports; 2) expanded and enriched learning time and opportunities; 3) active family and community engagement; and 4) collaborative leadership and practices.

Additional Information on Implementation / Case Study of Social Justice, Humanitas High School  
[https://learningpolicyinstitute.org/sites/default/files/product-files/SEL\\_CaseStudies\\_Humanitas\\_REPORT.pdf](https://learningpolicyinstitute.org/sites/default/files/product-files/SEL_CaseStudies_Humanitas_REPORT.pdf)

## Effective Team Assessment

### Team Assessment Tools

Instructions: Rate your team on each of the following nine dimensions, using a scale of one to seven, to indicate your assessment of your team and the way it functions. Circle the number on each scale that you feel is most descriptive of your team.

#### 1. Goals and Objectives

1	2	3	4	5	6	7
There is a lack of commonly understood goals and objectives			The team members understand and agree on goals and objectives			

#### 2. Utilization of Resources

1	2	3	4	5	6	7
All resources of team members are not fully recognized and/or utilized			The resources of all team members are fully recognized and utilized			

#### 3. Trust and Conflict Resolution

1	2	3	4	5	6	7
---	---	---	---	---	---	---

#### 4. Leadership

1	2	3	4	5	6	7
One person dominates, and team-leadership roles are not carried out or shared			There is full participation in leadership; leadership roles are shared by team members			

#### 5. Control and Procedures

1	2	3	4	5	6	7
There is little control, and there is a lack of procedure to guide team functioning			There are effective procedures to guide team functioning; team members support these procedures and regulate themselves.			

## Effective Team Assessment

### Team Assessment Tools

Instructions: Rate your team on each of the following nine dimensions, using a scale of one to seven, to indicate your assessment of your team and the way it functions. Circle the number on each scale that you feel is most descriptive of your team.

#### 6. Interpersonal Communications

1	2	3	4	5	6	7
Communications between team members are closed and guarded					Communications between team members are open and participative	

#### 7. Problem-Solving/Decision-Making

1	2	3	4	5	6	7
---	---	---	---	---	---	---

#### 8. Experimentation/Creativity

1	2	3	4	5	6	7
The team is rigid and does not experiment with how things are done					The team experiments with different ways of doing things and is creative in its approach	

#### 9. Evaluation

1	2	3	4	5	6	7
The team never evaluates its functioning or processes					The team often evaluates its functioning and processes	

## 3.B. CLARIFY BOUNDARIES AND POWER DYNAMICS

**At every meeting, people bring many things to the table including personal skills and strengths.** It is useful to consider those attributes and there are many personality inventory tools teams can use to discover more about each other and create opportunities to build trust and an effective team. Members of the team, like students in a school, are composed of all kinds of learners and information processors. The more familiar the team becomes, the more the team will acknowledge the learning or decision making needs of each other and the group will hopefully become more accommodating and adaptive. This kind of sensitivity to the personal skills and attributes of oneself and team members is referred to as “personal awareness.”

But there are also environmental and systemic factors that influence how people interact with each other, referred to as “system awareness.” One example is power dynamics, the formal and informal power that people bring because of who they are racially or financially, the job they hold or the organizational position they occupy. There are numerous examples of unequal power dynamics within a school district especially when you consider the number of supervisors hiring, evaluating and terminating staff. There can also be power dynamics within management teams and unions based upon the varying degrees of authority individuals hold.

But there are a variety of issues and power dynamics that often impact participation and psychological safety. Racial and socio-economic inequities may make some people feel less welcome to share their opinions while others occupy a dominant role. To create the trusting environment that will lead to professional collaboration, it is essential that everyone has, and believes they have, the same opportunity to participate. Establishing and using meeting norms can help level the meeting environment and address the power dynamics. Discussing power dynamics with your team is also a healthy way to create shared understanding. In any event, it is imperative that leaders pay attention to power dynamics.

Lastly, there is a personal awareness issue that also can reduce participation. This is the issue of inference, when we make assumptions about the motivations for people’s words. Too frequently, meetings jump to quick resolutions of issues without ensuring that there is truly shared understanding among the group. When people are used to assumptions being made about motivations or concurrence, it disincentivizes participation. The end result for the team is that you only scratch the surface of the issue and don’t build the buy-in for organizational commitment to the change you are seeking to achieve.

Labor-management teams should discuss power dynamics and strive for a shared understanding of how these dynamics manifest within the district. Keep in mind that there are formal and informal leaders at every level of the organization.

### WHY?

- Power is often at the root of conflict, and better understanding power dynamics can help teams better understand and address conflict
- Clarifying power dynamics can provide helpful context for future collaborative problem-solving

### HOW?

- Make the issue of power dynamics visible and overt
- Clarify power that comes with a title as well as informal power and influence
- Adopt guiding behaviors and meeting norms that equalize power and encourage participation from all
- Ensure decision making processes are transparent and clearly understood by the group

### Insights from the CA LMI Team

Actively encourage inquiry-led discussions and active listening.

Keep the importance of building psychological safety at the forefront.

Identify a neutral space to meet.

## 3.B. CLARIFY BOUNDARIES AND POWER DYNAMICS (Continued)

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 2: Instructional Leadership**
  - » Element 2A-3: Capitalize on diverse experience and abilities of staff to plan, implement, and assess professional learning.
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 3: Management and Learning Environment**
  - » Element 3B-3: Set clear working agreements that support sharing problems, practices, and results within a safe and supportive environment.
- » Element 3C: Leaders facilitate safe, fair, and respectful environments that meet the intellectual, linguistic, cultural, social-emotional, and physical needs of each learner.
- **Standard 5: Ethics and Integrity**
  - » Element 5A-2: Reflect on areas for improvement and take responsibility for change and growth.
  - » Element 5B-3: Identify personal and institutional biases and remove barriers that derive from economic, social-emotional, racial, linguistic, physical, gender, or other sources of educational disadvantage or discrimination.

## 3.B. Resource overview and implementation suggestions

The first resource in this section is a great tool to help clarify decision making processes. The 7 Point Decision Making Continuum can be used at all levels of the organization. We've also had leaders tell us they use it at home! There are two resources about power dynamics included in this Guide, the first of those is from Patrick Dolan and is called the Six Boundaries of a School System. This tool specifically describes the relationships that exist in a school district and is also a good discussion tool for building shared understanding of the inherent dynamics within a district and how it impacts the collaborative work of the labor-management team. The following resource is a general article about power dynamics entitled *Power Dynamics, the Hidden Element to Effective Meetings*. It provides a clear definition of power dynamics, is easy to read and a great discussion tool for building shared understanding of power dynamics.

The final tools in this section are for understanding self awareness and system awareness. A group discussion of the Ladder of Inference is an important reminder for building one's personal awareness around not drawing conclusions about the motivations or intentions of others and for encouraging leaders to lift up curiosity and shared understanding in their own meeting spaces.

Guiding Questions	Progress Points
How might we create an environment where clear honest discussions about power dynamics can take place?	Adopted meeting behaviors apply to all participants and everyone participates in enforcing them.
How does your team regularly check in on inferences and assumptions that get in the way of open and honest conversations?	The team is intentional about building a culture of curiosity by adopting meeting norms that promote questions for understanding and by modeling curiosity.
<b>Trust:</b> What can be done to support staff to feel more comfortable to speak openly?	Leaders and staff model behavior that addresses power differentials and welcomes diverse voices.
<b>Equity:</b> To what extent is the team hearing and incorporating insight from marginalized individuals and groups who are most impacted by decisions made?	Everyone has participated in training to build awareness and empathy across racial, ethnic and gender lines.
<b>Communication:</b> How might the team messaging clarify our decision making process, including who made the decision?	Clear communication encouraging diverse voices and opinions have been shared widely. Joint communications are visible from labor-management teams. Important decision making points are made transparent to all stakeholders.

### Resources & Tools

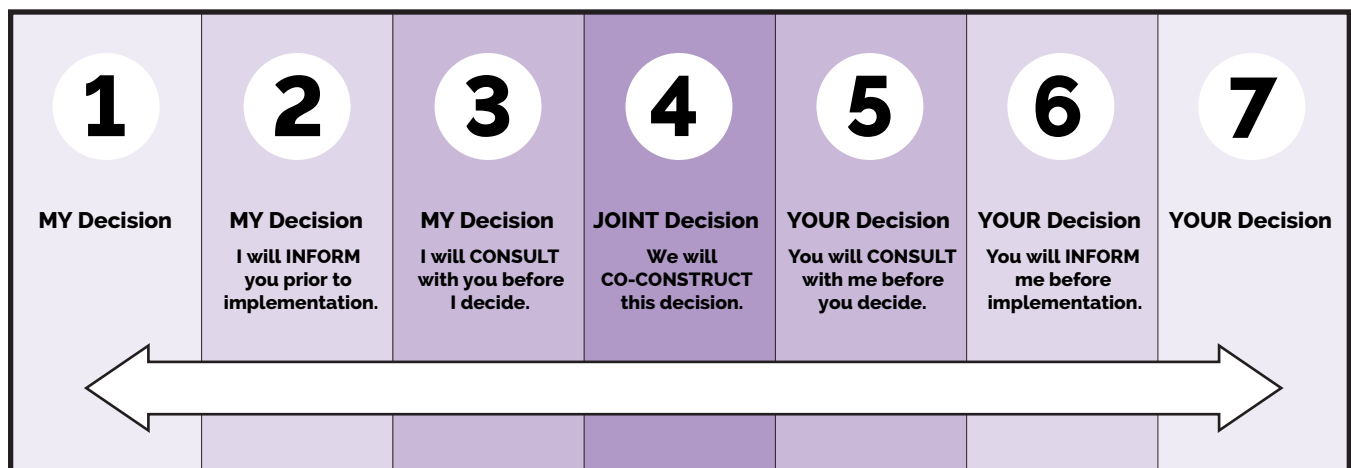

- *7 Point Decision Making Continuum*
- *The Six Boundaries of a School System*
- *Power Dynamics: The Hidden Element of Effective Meetings*
- *Ladder of Inference*
- *Six Conditions for Systems Change*

## Decision-Making: Deciding How to Decide

There are a lot of different ways to go about making a decision. Since a team is a collaborative effort, decision-making in the team also needs to be collaborative. The key to good collaborative decision-making is for the team to be explicit about its decision-making process – selecting the right decision-making process for the need.

Collaborative decision-making is highly effective when:

- Decisions require diverse, creative ideas
- Many perspectives are needed to understand the issue or problem
- A fundamental or significant change is likely
- Many people or groups share the same problem and will be affected by the decision
- The group will determine the best decision-making option for each situation
- The group members will support the decisions made by the group

## The Six Boundaries of a School System: Assessing Our Work

*Adapted from Restructuring Our Schools: A Primer on Systemic Change by Dr. W. Patrick Dolan*

The Six Boundaries: W. Patrick Dolan

### Videos

#### The 6 Boundaries of a School System

[turnweb.org/dolan-6-boundaries](https://turnweb.org/dolan-6-boundaries)

Dr. W. Patrick Dolan, a longtime consultant for the Consortium for Educational Change (CEC), provides an orientation to CEC's framework for organizational development and systems change. Dolan creates a "visual map" of the school system to depict the roles and relationships of the 6 Boundaries of a School System.

#### Building Collaborative Structures: A Systems Approach

[turnweb.org/dolan-building-collaborative-structures](https://turnweb.org/dolan-building-collaborative-structures)

An analysis of the 6 Boundaries of a School System provides useful data to assist schools and districts in building and aligning collaborative leadership structures system-wide. Dr. Patrick Dolan provides an overview of how to establish an organizational change process in school systems.

The Six Boundaries of a School System, Boundary Descriptions/Discussion Tool is linked [here](#).

In every organization, there are people who hold formal power and informal power. Formal power is attributed to someone by virtue of their title or position in the organization. People carry informal power if they have influence over others or their organization, either because of their experience, force of personality or persuasion, unearned privilege, or because they have strong relationships with decision-makers and peers. Power is also deeply influenced by diversity and equity dynamics. In most Western societies today, many decisions in organizations are still controlled by people with certain backgrounds: over 40, male, white/European, heterosexual, and middle class and wealthy people. Many feel empowered to lead, speak, and make decisions by virtue of the standing society gives to them on the basis of their background. They get a lot of practice leading and people are acculturated to following and respecting them.

Power — the capacity to get things done — is neither positive nor negative in and of itself. It's all about how we construct, reconstruct, and practice power. Individuals can exercise their power in healthy ways if they stay focused on making space for others and growing power to achieve positive outcomes by building “power with” others. Individuals and groups can exercise their power in unhealthy ways if they are focused on establishing “power over” others or concentrating power in a few.

At IISC we have made some key observations about power in meetings:

1. Power dynamics are always present in meetings whether we see them or not.
2. Every meeting is a chance to build a group's power and transform power dynamics. It's important to design and facilitate meetings to create opportunities for power to be shared and openly discussed.
3. Meeting designers and facilitators must attend to formal and informal power and the dynamics that come along with it.
4. Meeting facilitators should be mindful of and acknowledge their own power and enact it in a way that builds the power of the group.
5. Every element of meetings needs preparation to make power and decision-making transparent. Consider questions like: Who is at the meeting and who is not? Why or why not? What's on the agenda and what's not on the table for discussion that should be? Who will be making the decisions that flow from what will be discussed (both in the room and beyond)? Who plays which roles and why? What work will happen outside of the meeting? What information from the meeting should be shared and with whom?

So, what are some ways to attend to power dynamics in meetings?

- **Assume power dynamics are always present in meetings.** Design your meeting agenda to include multiple voices and perspectives. Lightly encourage people to step forward to lead and participate, especially if they have less power in the organization either because of role, positional status, race, gender, or other factors. Encourage people with traditional forms of formal power to do more listening than speaking.
- **Build a culture of collaboration in meetings.** Think of meetings as an opportunity for a team to build relationships, learn leadership, design good processes, and counteract unhealthy uses of power. Design your meetings for relationships, joy, and creativity. Good things will follow! Always build an agenda that allows people to first interact on a human basis, such as starting with opportunities for people to do a “check-in” to share how their day or week is going or to learn more about each other on a personal level. Ask people a question that surfaces their personal and professional purpose. Encourage honesty, vulnerability, and calling people “in”, instead of calling people “out”. Spread a little business love around the room, creating openings for people to feel heard and noticed, and to experience a sense of belonging and interconnectedness.
- **Openly discuss power in meetings.** Discuss openly with your team the question, *what would be the benefits to our group if we shared power?* Remind them that power is not a finite pie; rather, it can be infinite, expanded, and shared among people and leaders. Prompt them to explore how they can share “power with” each other instead of “power over.” Make a list of meeting agreements the group will use to share power. Ask people to monitor the agreements and be brave enough to intervene if people are not practicing them. Make a list of “power over” moves, so people learn the behaviors that reinforce dominant voices and power and exclude others. Have people take mental note of who is speaking the most and who is not. Make sure your discussions of power go beyond yourselves as colleagues to the people or communities you serve. How are they “at the table?” How are their priorities, assets, and skills driving the discussion?

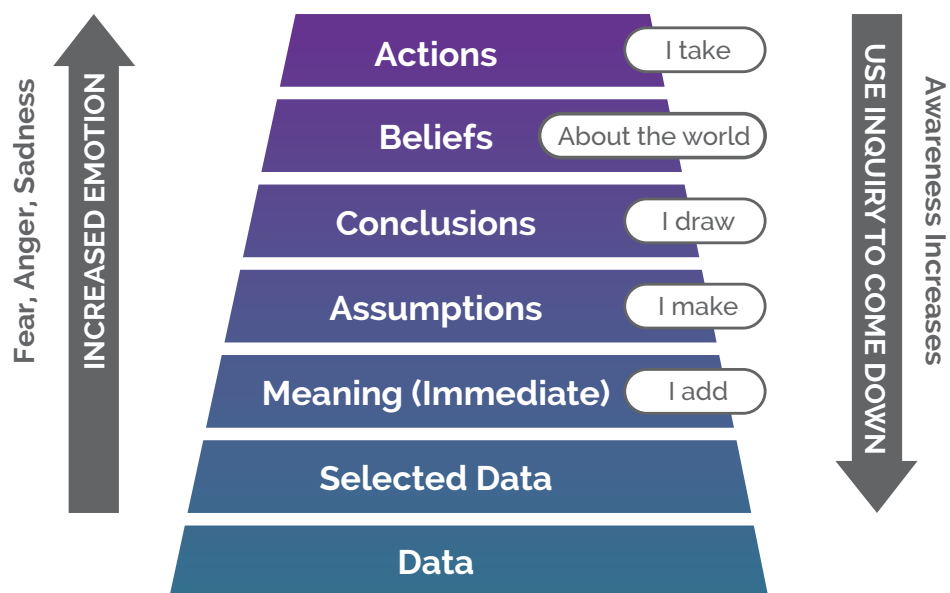

- **Remember that power is a social construct.** We can design spaces where individuals and groups experience their own and others' power differently. Be proactive about ways to amplify the power of people who are typically at the margins of the conversation. Challenge the group to pay at least as much attention to the expertise that comes from lived experience (say, of poverty) as from formal theories and data. Flip questions on their head by asking “why not do things differently?” instead of “how can we work within given boundaries?” Ensure that people who are affected by the issues you're working on are at the center of the conversation and have meaningful roles in the work over time (inside meetings and beyond).
- **Use your role intentionally and thoughtfully if you're the meeting facilitator.** Don't dominate the discussion. Don't come up with all the ideas. Stay as impartial as possible, even though you can never truly be completely neutral. If you want to contribute an idea or experience, tell the group you are switching from facilitator role to express your view as an individual and then step back into your facilitator role. Examine who gets to facilitate meetings and who doesn't. Meeting facilitators can change the outcome of the meeting just by how they design and run it. Rotating facilitation and supporting people to learn how to facilitate and run meetings distributes power and makes meetings more dynamic.

The skills of meeting facilitation with a lens to share power are teachable and replicable. At IISC, we share some of those skills through training and consulting. We have learned that meetings that are both well facilitated and that attend to power dynamics can transform groups into highly functioning teams with deeper purpose and intention for social change.

# ELEMENT 4:

## Problem Solve

It is critical to lay the proper foundation, but problem solving is what engages people. The Stages of Collaborative Problem Solving tool lays out a process for teams to take their ideas from thoughts into action. Working together and actually developing collaborative solutions builds trust and can spread collaborative professionalism across the organization.

### Contents:

**Stages of Collaborative Problem Solving ..... 77-84**

“

Good schools depend heavily on cooperative endeavors. Relational trust is the connective tissue that binds individuals together to advance the education and welfare of students. Improving schools requires us to think harder about how best to organize the work of adults and students so that this connective tissue remains healthy and strong.

—Anthony Bryk  
Education Researcher & Author

”

## A Guide to Building a System of Collaborative Problem Solving

**This is a unique moment in time.** The pandemic has caused educators to work in new ways and presented opportunities to rethink our education system. It has starkly revealed systemic inequities that we knew existed but had not fully acknowledged in how we operated. Most of us have been humbled by the fact that we want to change how we do things, but are overwhelmed by the tasks. Or perhaps we haven't known where or how to start, or how to move our big ideas to implementation.

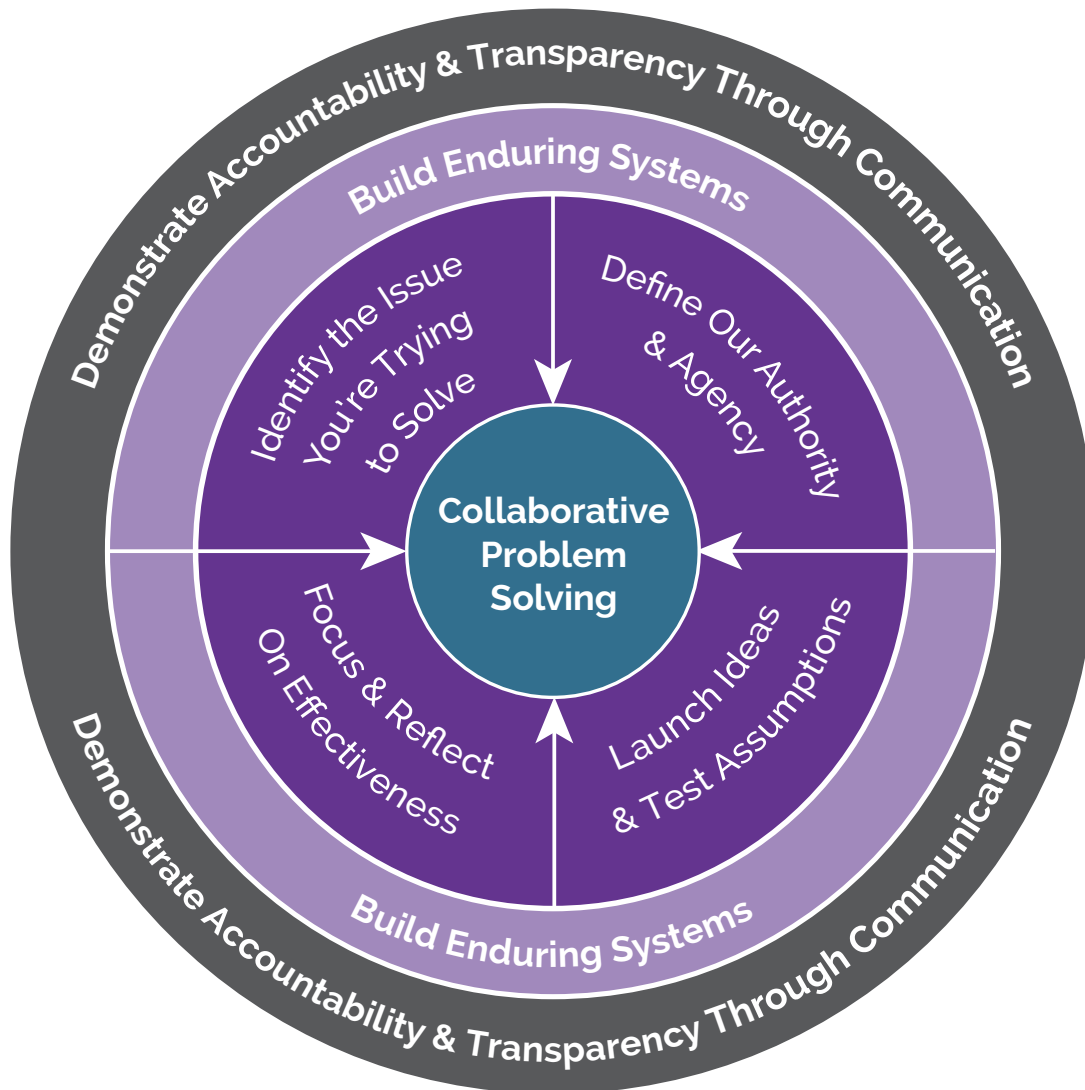

If the above describes you and your education community, this simple guide for building a system for adaptive problem solving is for you. Start at the beginning, if you can, by identifying the problem you are seeking to solve. But often, that isn't where you are when you realize you need to (or are required to) make change. Most likely, you will have to figure out where you are in the process to move the change you are seeking to accomplish.

This guide is different than others you may have seen. The steps will be familiar and consistent with planning tools and continuous quality improvement. You will see things that remind you of the LCAP process and at the same time, are recognizable as Plan-Do-Study-Act (PDSA) activities. Although you know these steps, you may not be focused on how to weave in and out of them and/or how to infuse them into everything that you do. Further, you have probably not yet incorporated into each of these stages a labor-management lens that will lead to improved transparency, communication, equity, and trust throughout your organization or labor-management team.

**In the following section we explore the four stages of collaborative problem solving as well as two intersecting system elements, communication and sustainability.** First, we identify “Big Ideas” that we associate with each stage of the work. Then, we offer questions for teams to consider that focus on the Big Ideas. Finally, we offer questions that individuals can use within their teams. There are countless questions that could be used to move the work at each step and you should feel comfortable and empowered to develop questions that could move your team.

## A Guide to Building a System of Collaborative Problem Solving

We see each of the six stages below as a unique moment in the movement of your work as a leader or catalyst, and in your work as a member of a team or group. Each stage can, and should, be revisited as frequently as necessary to do the work of collaborative problem solving. Stages connect to statewide standards as indicated below. Each of the four center stages can be enhanced by connecting them to the two system elements of communications and sustainability.

California Professional Standards (CA Dept. of Education)

Connection to California Professional Standards for Educational Leaders (CPSEL)

Connection to California Academic Standards

• (MPS) = Math Practice Standard

• (SEP) = Science & Engineering Practice

• (ELA) = English/Language Arts, Speaking and Listening Standard

## STAGE 1: Identify the Issue you are Trying to Solve/Resolve

**Stage 1 is about identifying priorities and making strategic choices about what to focus on.** This stage is also an opportunity to rethink how priorities are set and by whom. We are mindful of the need for more inclusion of different voices and diversity of perspectives, as well as the need for focusing on issues that are truly relevant. This may mean breaking up a large goal into smaller pieces, which may be easier to implement. As such, this stage can be a helpful way to set the stage for a richer kind of collaborative conversation and one with a better chance of making an impact.

### BIG IDEAS

Be strategic, intentional, and coherent about priorities

Clarify what makes our priorities relevant and impactful

Ensure that our priorities reflect the diversity of our community

Align allocation of resources (human and fiscal) with priorities

Decide whether this is a systemic issue (root cause) or a symptom of a problem or issue

## Guiding Questions

### For Teams

- How many existing priorities reflect “you must do this” versus “this is a priority because it will have a significant impact on students and/or staff?”
- Can we remove items from our priority list and reduce stress if we communicate better across the organization or school?
- Do our priorities build on something that is already known or understood within the organization?
- Do these priorities reflect concerns and content that will directly impact most or many people in the organization?
- Do these priorities align with the goals and priorities of our strategic plan, LCAP and other pre-existing planning tools, or should something be changed?
- How much diversity of perspective was present during discussion of priorities? Did this generate many different ideas and opinions?
- Were the groups/stakeholders who will be impacted by these priorities represented in the process and discussions that establish them (including classified staff, students, parents, etc.)?
- Is there capacity and buy-in to move this work forward?
- Has the group considered the equity issues that may be connected to the topic?

### For Individual Leaders

- Where do I see the greatest need for change?
- Where do I see low-hanging fruit and opportunity for impact?
- Do I think the existing priorities will lead to the greatest impact? If not, is it possible to pivot to more impactful priorities or reduce the priority of some existing work without derailing it?
- What data or information is missing from the conversation? How can I move it into the conversation?
- Is an equity lens applied to this or most decision making? Who else is an equity focused member of the team to collaborate with?
- Have I made the case to include typically marginalized voices (classified staff, students, parents, community)?

## Links to CA Educational Standards – modeling our standards

- Embrace diverse perspectives and craft consensus about the vision and goals (CPSEL 1B.1)
- Work with local leaders to assess, analyze, and anticipate emerging trends and initiatives and their impact on education (CPSEL 6A.5).
- Incorporate information about family and community expectations and

- needs into decision-making and activities (CPSEL 4B.1)
- Communicate the vision so that the staff and school community understand it and use it for decision-making (CPSEL 1B.2)
- Ask questions and define problems (SEP 1)
- Attend to precision (MPS 4)

## STAGE 2: Define Our Authority & Agency

**Stage 2 is a critically important time to be precise and clarify what we are doing collaboratively.** Our discussions must consider both the scope (how big and bold) and urgency (how fast and far-reaching) of our proposed actions. This stage is also a time to normalize collaboration, setting norms for how the group will operate and defining expectations for working together. Because there is hierarchy in our organizations, sometimes mandated by law, sometimes by tradition, this is a good point to consider whether some decisions can be shared or transferred to others. In any event, it is important to be clear about which opportunities are for decision making and which opportunities are for input. Regardless, some team members will need reassurance that their voice matters, as well as clear opportunities to provide suggestions and input at this stage. In sum, Stage 2 sets the stage for group interactions and buy-in and the development of new leaders.

### BIG IDEAS

Balance the need for decisiveness with the need for inclusion and accountability  
Clarify authority and urgency to act

Acknowledge and address power dynamics; the importance of leveling the playing field for all  
Raise up new voices and perspectives

## Guiding Questions

### For Teams

- Is it clear what is within our group's or team's purview to decide upon? Do we understand where we have autonomy and/or discretion?
- Is there an articulable rationale for where decisions are being made? Are there opportunities for distributing decision-making across the organization?
- Who else needs to be involved or informed in this decision?
- Have we created conditions that encourage input from everyone on the team?
- Is there sufficient psychological safety to ensure that people speak up and voice their ideas and opinions regardless of positional authority?
- Have we established norms for collaboration that promote both trust and precision in team settings?

### For Individual Leaders

- Have we empowered someone to facilitate and “enforce” norms for collaboration?
- Are there voices missing from the table?
- How can I increase visibility and trust of missing voices?
- How can I build relations with those in power/those not in power, so other voices can carry more weight?
- How can I help my union/management team feel more comfortable becoming more transparent?
- How can I help my union/management team share power?
- How can I help generate support for the work even if I did not support this priority or focus?

## Links to CA Educational Standards – modeling our standards

- Set clear working agreements that support sharing problems, practices, and results within a safe and supportive environment (CPSEL 3B.3)
- Build shared accountability to achieve the vision by distributing leadership roles and responsibilities among staff and community (CPSEL 1B.3)
- Address achievement and opportunity disparities between groups, with attention to those with special needs; cultural, racial, and linguistic differences; and disadvantaged socio-economic backgrounds (CPSEL 1A.3)
- Treat all stakeholder groups with fairness and respect, and work to bring consensus on key issues that affect student learning and well-being (CPSEL 4B.3)
- Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively (ELA.SL.1)
- Identify personal and institutional biases and remove barriers that derive from economic, social-emotional, racial, linguistic, cultural, physical, gender-based, or other sources of educational disadvantage

## STAGE 3: Launch Ideas and Test Assumptions

**Stage 3 is about implementing a plan or carrying out the work in front of you.** Because our work is complex, it is necessarily adaptive. No plans are carried out exactly as envisioned. Therefore, Stage 3 requires consideration of delegation and trust that your colleagues will implement plans as best they can, taking into account their own situation and dynamic work environment. As such, Stage 3 challenges us to consider how best to use the natural differences of local context to test and experiment with our ideas and assumptions about our work. Multiple, similar experiments provide the basis for us to learn from different implementation pathways and solutions. Simple work plans can help with clarifying tasks, pacing work and assessing outcomes.

### BIG IDEAS

Trust people to do the work

Acknowledge that there are multiple ways to do the work

Accept the difference between fidelity to process vs. fidelity to outcome

Build upon and acknowledge what already exists in proposing a new course of action

## Guiding Questions

### For Teams

- Are there clear roles, responsibilities, and timelines to guide delegation of work?
- Have we acknowledged and informed the team that implementation can and should adapt to local context?
- Have we considered opportunities for testing multiple, related ideas in lieu of a “one size fits all” type of implementation?
- Are the desired outcomes clear? Does everyone understand how we are defining success?
- To what extent has doing the work nurtured and fostered trust among team members?
- Have we used this moment to generate curiosity about solving problems?
- Have we used this moment to show coherence between doing the work and modeling good learning practices?
- How might we align this process with our LCAP development, SPSA, or other site planning tools?
- Have we identified barriers to access or other equity considerations?

### For Individual Leaders

- How can I model delegation and distributed leadership?
- Am I able to see or acknowledge how work plans can and should be adaptive?
- How might I encourage others to experiment with similar (but different) approaches to implementation?
- How can I model and communicate curiosity and an “experimentation” mindset?
- How might I facilitate discussions about outcomes and success metrics to clarify expectations and enhance team-building?
- What can I do to nurture and foster trust among team members as part of implementation?
- Am I modeling ownership of my work?

## Links to CA Educational Standards – modeling our standards

- Cultivate multiple learning opportunities and support systems that build on assets and address needs (CPSEL 1A.2)
- Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving (CPSEL 2A.4)
- Plan and carry out investigations (SEP 3)
- Make sense of problems and persevere in solving them (MPS 1)
- Use appropriate tools strategically (MPS 6)

## STAGE 4: Focus and Reflect on Effectiveness

**Stage 4 is about reflecting on our progress and taking time to learn from the work we have implemented.** In the process of focusing on effectiveness, we have opportunities to both hone our precision (what we are collaborating on) and build trust (how we collaborate) through group and team discussions. If we have given our projects and initiatives the time they need to be meaningful, and we have been inclusive in seeking comments and observations, we will have a rich store of “data” to reflect upon in a spirit of inquiry and collaborative learning. Both the process of these reflections and their content are meaningful as we distill “lessons learned” that serve us now and into the future. Throughout we have strengthened shared accountability with objective tools to track our work, as well as the psychological safety to avoid blame or judgment.

### BIG IDEAS

Hone precision, while building trust  
Be curious, not judgmental  
Focus on outcomes not outputs

Reframe the assessment mindset as  
suggestion for change not judgement of the  
present

## Guiding Questions

### For Teams

- How might we cultivate a culture of curiosity and inquiry rather than judgement and reaction?
- Are we focused on effectiveness (doing the right things) or efficiency (doing things right)?
- Have we considered the impact of the work (on students and families) above and beyond its immediate result?
- Have we structured reflection to allow time and space for “lessons learned” to emerge?
- Have we considered how communication of goals, training and planning with staff affected our outcomes?
- Are there minor adjustments or refinements we can make?
- What are the implications of our reflection for district/school goals or vision? Which aspects of reflection need to be part of longer-term sustainability discussions?
- Have we considered equity impacts in our implementation?

### For Individual Leaders

- How can I model curiosity and inquiry as part of my leadership style/approach? How might I encourage more curiosity and inquiry in team or group interactions?
- Have I created or used opportunities for team/group discussions to consider outcomes and impact, rather than the immediate output?
- How might I provide examples of the difference between efficiency and effectiveness that are relevant to my team or group?
- What are the best levers or opportunities for lifting up discussions about impact on end-users (i.e., children, youth, and families)?
- Have I created or used opportunities for team/group interaction to reflect on lessons learned? To plan forward based on data and/or reflection?
- Have I supported a quality roll-out and implementation of the work?

## Links to CA Educational Standards – modeling our standards

- Include all stakeholders in a process of continuous improvement (reflection, revision, and modification) based on the systematic review of evidence and progress (CPSEL 1C.1)
- Guide staff and the community in regular disaggregation and analysis of local and state student assessment results and program data (CPSEL 2C.2)
- Use information from a variety of sources to guide program and professional learning planning, implementation, and revisions (CPSEL 2C.3)
- Use a variety of strategies to lead others in safely examining personal assumptions and respectfully challenge beliefs that negatively affect improving teaching and learning for all students (CPSEL 5C.2)
- Analyze and interpret data (SEP 4)
- Engage in argument from evidence (SEP 7)
- Construct viable arguments and critique the reasoning of others (MPS3)

## Demonstrate Accountability and Transparency Through Communication

The ways we communicate should reinforce the overarching need for authentic, ongoing collaboration that helps build trust and supports equity. **Therefore, this section is centered on using communication tools and strategies to demonstrate accountability and build trust within and across work teams and collaborative groups.** We consciously prioritize messages and choose forums to showcase our learning about effectiveness so that other groups, and the organization as a whole, are influenced by and benefit from our experience. We look to an interactive dialogue and exchange of ideas, mindful of the need for encouraging respect and guarding the psychological safety of participants. We embrace the fact that communication is the glue that both informs and nurtures professional working relationships.

### BIG IDEAS

Shift from one-way to multi-dimensional communication

Lift up communication as an essential element of collaboration; improving communication is central to power-sharing

Prevent communication from becoming a proxy for inequity and mistrust

Sustain transparency with frequent regular communications on multiple platforms

### Guiding Questions

#### For Teams

- Are we prepared to showcase our results and reflections, even if they are not flattering?
- Which audiences would benefit from seeing our process, results and hearing our reflections?
- Can we prioritize our learning (and who is presenting) to meet the needs of different audiences and/or stakeholders?
- How might our communication style or presentation encourage dialogue and discussion versus simply a presentation of findings?
- How can we move from a “need to know” culture to a “we are all in this together” culture?
- To what extent has our communication strategy enhanced the credibility of our team or approach? Psychological safety of teams?
- Are we thoughtful about our words and questions, making sure that we ask the questions we truly want to know the answers to and using words that are engaging and understandable to all stakeholders?
- Have we made our equity considerations transparent?

#### For Individual Leaders

- Does our communication reinforce a collaborative mindset?
- How can I contribute to building a culture of greater transparency?
- Am I stepping into or away from the statements of others?
- How can I help build communication highways instead of communication bulletins?
- How might I ensure that my team or group has a meaningful discussion about the multiple audiences that might benefit from hearing about our work?
- Have I identified the best forums and opportunities for presenting our learning and experience?
- Have I facilitated discussions on priorities in light of our experience and learning?
- Can I explain how and why priorities changed or were refined?
- How can I help the organization manage being vulnerable? Build a culture of respectful and civil dialogue? Create a culture of psychological safety?

### Links to CA Educational Standards – modeling our standards

- Engage staff in professional learning and formative assessments with specific feedback for continuous growth (CPSEL 3D.4)
- Solicit input from and communicate regularly with all parents and families in ways that are accessible and understandable (CPSEL 4A.4)
- Obtain, evaluate, and communicate information (SEP 8)
- Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience (ELA.SL.4)
- Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally (ELA.SL.2)

## Build Enduring Systems

**This section is where we consider the implications of our collaborative learning for system-wide changes.** We consciously step back from the specifics of our work and ask how best to use our learning to improve the systems in which we operate. These could involve relatively small but important changes in how we work together, as well as revisions to organizational policies that have long histories. We ask how we might scale or replicate the best learning throughout our organization. Most importantly, we ask ourselves how best to refine or revamp what and how we work together to better meet the needs of our core constituency – public school students and families and the people who make it happen, our staff.

### BIG IDEAS

Understand that simple process changes can have big impact

Connect initiatives and plans through alignment to mission and vision

Consider dissemination and replication of efforts

Return to the mission if lost; Remember it's about the students!

## Guiding Questions

### For Teams

- What small practice (or modification) might your team promote that would have a big impact?
  - how we structure meeting agendas
  - how we document team decisions
  - how we train and develop staff
- Are there lessons from our implementation that have implications for the larger organization?
- Is there a “best practice” that can be generalized?
- Does our experience warrant a change or refinement of policy? How does this align with Board policy? With contractual agreements?
- How do we modify our interactions with one another going forward to build trust in the system?
- How have we addressed a clear need of students or families? A need of educators directly interacting with students and families?
- Have we built the infrastructure to document decisions made during the process to ensure shared agreement, prevent misunderstandings and train others?
- Is there a transition plan to engage new leaders in continuing the work?

### For Individual Leaders

- What can I do to train others in the new practices being adopted?
- How can I communicate support for the new or modified practice?
- What connections can I make or ideas do I have for aligning the practice with existing practices or policies?
- Can I show how a change will benefit either students and families or the staff tasked with serving students and families?
- Have I made these connections clear to others in the organization, particularly those with decision-making power?
- How might I advocate for a specific policy change that could be adopted across the organization and sustain new ways of operating?
- How can I help “de-personalize” practices so they become part of our systems (or ways of operating) and less conflated with individuals or subsets of the organization?
- Have I done what is possible and necessary to sustain useful practices?

### Links to CA Educational Standards – modeling our standards

- Reflect on areas for improvement and take responsibility for change and growth (CPSEL 5A.2)
- Continuously improve cultural proficiency skills and competency in curriculum, instruction, and assessment for all learners (CPSEL 5A.4)
- Sustain personal motivation, commitment, energy, and health by
  - balancing professional and personal responsibilities (CPSEL 5A.5)
  - Look for and make use of structure (MPS 7)
  - Construct explanations and design solutions (SEP 6)
  - Look for and express regularity in repeated reasoning (MPS 8)

# ELEMENT 5:

## Grow

One important and meaningful activity of the district labor-management team is to expand its activities to other parts of the organization. Deepening the work across the system builds coherence, shared ownership and accountability and will lead to system-wide collaborative culture and work practices.

### Contents:

<b>5.A. - Establish Joint Committees at the District Level.....</b>	<b>87-92</b>
<b>5.B. - Develop Labor-management Partnership at the Site Level.....</b>	<b>93-100</b>

“

**The most valuable resource that  
all educators have is each other.  
Without collaboration our growth is  
limited to our own perspectives.**

—Robert John Meehan  
Educator, Author, Poet

”

## 5.A. ESTABLISH JOINT COMMITTEES AT THE DISTRICT LEVEL

**When the District Learning Team (DLT) is ready to begin a district project or expand beyond their own members, a great strategy is to establish additional diverse committees with labor and management representation.** Joint committees are typically focused on specific areas of work such as technology, special education, early childhood learning, health benefits, etc. The establishment of joint committees within a labor-management initiative provides several benefits. They help alleviate the pressure and workload of the DLT and allow for productive work to take place outside of main DLT meetings. Members of these additional teams often come from school sites, district departments, mid-level management, and union members, but unlike other committees created by the district to implement a project, this group is selected collectively by the DLT and is publicly recognized as such. Having these additional committees leads to broader organizational practice and investment in partnership. It also increases leadership opportunities which promotes a more dispersed leadership structure and contributes to the long-term sustainability of labor-management collaboration activities throughout the district.

Conversations that take place in a joint committee setting, where members are focused on both trust building and precision (Collaborative Professionalism) are well-suited to collaborative problem solving around complex issues, as well as difficult and sensitive topics. Joint committees also promote a sense of trust and transparency across the organization, as unions and their members are brought into discussions earlier and gain a more in-depth understanding of the issues. Many districts created committees to address the myriad issues that arose during the pandemic, ranging from remote learning, to technology access, food delivery and staff support. Districts with labor-management collaboration experience reported that they felt better equipped to collaboratively solve problems and then write the contract agreements to implement new work expectations.

[See CA LMI report issued May, 2021: Grappling with Covid's Impact on Education: Labor and Management Confront the Crisis](#)

### Insights from the CA LMI Team

Joint committees benefit from leaders in the DLT (and all levels) modeling collaborative practices.

We are not usually starting from a blank slate. For example, some existing committees may only need the addition of a labor voice. Be aware of the potential challenging dynamics when modifying existing team membership; particular attention should be given to assuring trust, communications and transparency among team members.

Start small and build as you go. Consider the DLT's capacity and effectiveness at training and supporting new groups before taking on a large expansion. If existing labor-management committees are operating well, such as a health benefits committee, build off the success of that work if it is jointly perceived as effective.

Utilizing the 7 Point Decision Making Continuum tool is helpful for joint committees to be clear on their role.

## 5.A. ESTABLISH JOINT COMMITTEES (Continued)

The resources below include information on how to build joint committees, how to transition an existing committee into a labor-management committee and how to connect their activities to existing teams as well as examples of successful collaborative work.

### WHY?

- Gives the District Learning Team (DLT) the capacity to implement the ideas they are developing
- Creates additional leadership opportunities throughout the district
- Creates additional spaces for collaborative problem solving where people can be more candid and open about feedback
- Brings unions into discussion and decision-making earlier which can result in fewer surprises and reduced concern about decisions happening behind closed doors
- Spreads collaborative professionalism and builds an organizational culture of trust and collaboration

### HOW?

- Build committees with clear expectations and lines of authority to implement key ideas or projects identified by the DLT
- Train committees on labor-management norms, collaborative practices, and processes
- Assess trust and psychological safety in the organization and work to improve if necessary
- Build coherence by connecting with existing collaborative efforts and shared goals
- Ensure that the DLT is prepared to act upon the work accomplished by the new joint committees, supporting them when they struggle and celebrating accomplishments

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1B-3: Build shared accountability to achieve the vision by distributing leadership roles and responsibilities among staff and community.
- **Standard 2: Instructional Leadership**
  - » Element 2A: Leaders promote a culture in which staff engages in individual and collective professional learning that results in their continuous improvement and high performance.
- **Standard 3: Management and Learning Environment**
  - » Element 3B-4: Engage stakeholders in using problem solving and decision-making processes and distributed leadership to develop, monitor, evaluate and revise plans and programs.

**“The two words ‘information’ and ‘communication’ are often used interchangeably, but they signify quite different things. Information is giving out; communication is getting through.”**

—Sydney J. Harris,  
*Journalist*

## 5.A. Resource Overview and Implementation Suggestions

Labor-management partnerships can be created in any department or division of the district. For example, there could be a labor-management committee focused on meeting the nutritional needs of students that includes the food service manager, purchasing staff, cooks, and servers, as well as the maintenance staff, special education aides, and teachers. A committee focused on special education could include teachers, para-educators, bus drivers, school psychologists, and facilities staff all connected to union and management leaders.

Below is an example of institutionalized committees and workgroups within ABC Unified School District. The structure includes a district learning team named the Partnership between Administration and Labor (PAL) composed of district and union leaders. There are joint district level working committees as well as focus groups and task forces.

It is not necessary to create a full organizational structure at the moment that an additional committee or workgroup is launched, but the ABC Unified structure provides an example of what a mature system could look like. In addition to the PAL, there is a PAL2 which is a similar structure with administration and classified unions.

Guiding Questions	Progress Points
How have you determined that you are ready to include more people in the work of the District Learning Team? Is there agreement around the project that you are ready to move forward with and have you clearly articulated the scope and responsibilities? Where is the capacity to engage in this new work? Does the District Learning Team have the capacity to respond to the new committee appropriately and in a timely way?	The District Learning Team used collaborative problem solving processes (such as the Three Box Framework) to identify a manageable piece of work to grow collaborative problem solving in the district. There is a clearly defined project, a timeframe for action and a plan to free up time for members to engage in the work.
Which district or District Learning Team goal is the new project aligned to support?	The joint committee's scope of work is clearly understood and its connection to strategic goals is well defined.
<b>Trust:</b> Does the joint committee have the proper culture to engage in meaningful work?	There was intentionality, time and space for the joint committee to focus on trust building before launching into the project and throughout the process.
<b>Equity:</b> In what ways are the district management and union leaders empowering and engaging diverse voices from across the district to participate in shared work through joint committees?	There are new members, unique perspectives, and participants beyond those already participating in district initiatives on joint committees.
<b>Communication:</b> How have the District Learning Team, management team, and union leaders shared information across their organizations about the expanded collaborative work?	Communications provide updates on the efforts and outcomes of joint committees so ongoing work is transparent and recognized. When possible, staff, parents, and community members are able to add their insights to the committee efforts.

## ABCUSD-ABCFT Collaborative Structures

*Excerpt from 2019 Collaborating for Student Success NEA Workbook*

As an example, the following graphics show the framework for district-level collaboration in the ABC Unified School District, located about 25 miles southeast of Los Angeles. The ABC Unified School District and its union, the ABC Federation of Teachers, have been pioneers in collaborative education partnerships and their successes have provided much research data. They call their collaboration “PAL”: Partnership between Administration and Labor. It has withstood several superintendent and union president changes over the years, because the collaboration structures are codified into lasting agreements and because the partnership fostered such a culture of working together that both the education association/union members, administration and the school board intentionally seek out collaboratively-minded individuals when hiring or electing their leaders.

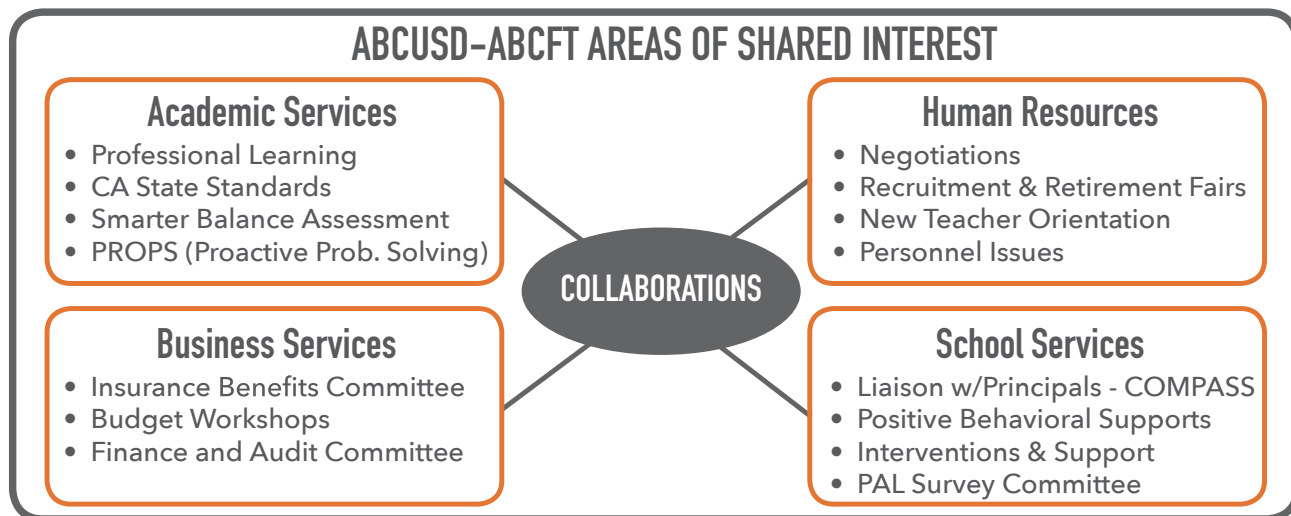

© NEA 2019

The ABC partnership calls their DLT structure the PAL Council. It is made up of the superintendent and her administrative cabinet, and the union president and his executive board. The PAL Council established district-level working committees on six key focus areas within their academic services: elementary schools, middle schools, high schools, adult education, special education, and child development. Additional district-level committees are created as needed, on a variety of topics.

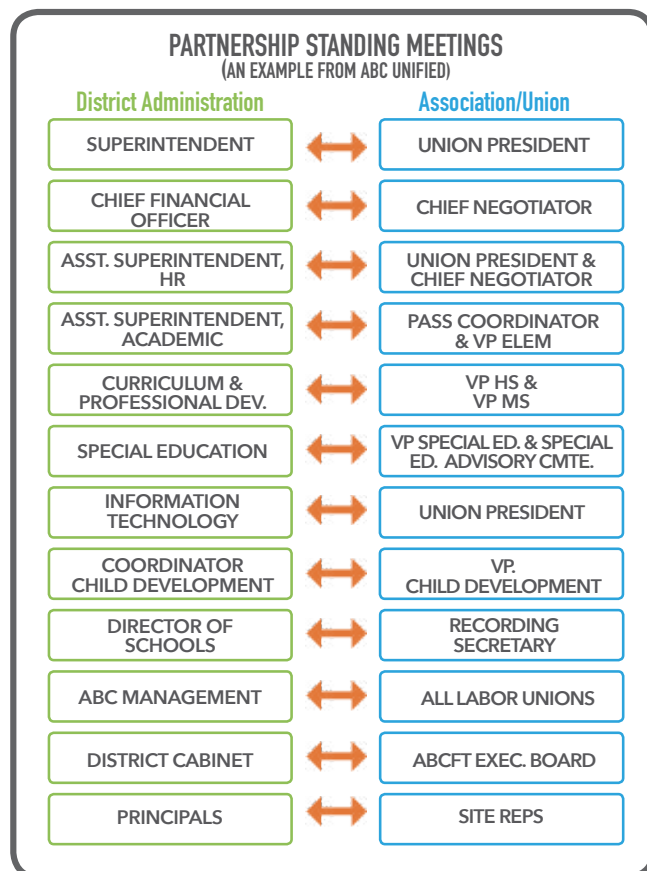

## ABCUSD-ABCFT Collaborative Structures (continued)

*Excerpt from 2019 Collaborating for Student Success NEA Workbook*

© NEA 2019

The partners have agreed to routinely collaborate on several large areas of shared interest, including academic services, human resources, business services, and school services. In addition, ABC's PAL includes a set of standing meetings between role-alike individuals across labor and management. The superintendent and union president meet weekly. The ABC Federation of Teachers organized its executive board roles to match those of the district superintendent's cabinet, so it is clear who the union counterpart is for each key administrator in the district. These individuals meet regularly. Between their meetings, the union leaders gather input from the building representatives and other educator-leaders, so they are knowledgeable about the opinions and experiences of the workforce and can have productive, timely conversations.

## Improving Special Education

*An Excerpt from [The ABCs of Partnership](#)*

---

In addition to the overall partnership that has grown in the ABC district, a more specific collaboration has developed between administrators and teachers of special education.

Proactive Problem Solvers—known as PROPS—is a consortium of special education team members, including reps from the union’s special education advisory committee and the district administration. The consortium works together to address schools’ special education issues before they escalate into larger problems.

Superintendent Sieu describes PROPS as “... a forum for issues to be aired out as opposed to moving directly to grievance or negotiations.

The PROPS committee, which formed in 2008, meets once a month, and focuses on solutions to staffing problems, professional development and other ways to support special education teachers.

The committee looks to solve problems and think up “out of the box” ideas that shape the department’s future. PROPS plans for possible challenges and meets them “head first” before they become serious problems. The uniqueness of the committee lies in the fact that the teachers in the special education department now have an equal voice along with their administrators as they work together to solve problems that the department faces.

“When we get together, we leave the titles at the door, roll up our sleeves, and honestly tackle the issues together. We speak to the ‘elephants’ but avoid blame,” says Dawn Heeren, ABCFT’s vice president for special education.

The first areas the new committee tackled were special education caseloads and class size, which were the issues at the crux of the grievance that led to the committee’s formation. This was a difficult challenge that involved looking at the causes of the problem and not just at past practices. Both sides agreed to set aside the “blame game” and look at how to “just fix it.” The result of this newly developed collaboration was evident when the very next school year started much more smoothly than in years past. In light of such a successful start, the PROPS committee decided to take on the challenge of student achievement.

To help facilitate this, the committee decided to participate in ABC’s innovation project (see Element 6). By focusing on student behavior, the team felt that there would be an improvement in students’ academic performance as well.

This collaborative team continues to tackle communication issues, morale, assignments, space for unit members to work, curriculum, intervention, procedural issues, and even budget challenges. Now, the district looks to PROPS to work out issues and make them a “win-win.”

**“There is no more us or them. There is just we,” says Pinky Uppal, who co-chairs the committee. “It is just how we do business now.”**

## 5.B. DEVELOP LABOR-MANAGEMENT PARTNERSHIP AT THE SITE LEVEL

**In addition to the district focused workgroups and committees described above, an essential place to grow labor-management collaboration is at the school site level.** School sites often use committees or teams to design curriculum, build budgets, design plans for student achievement, and assess student performance. Frequently these teams include mandated members representing designated constituent groups including administrators, teachers, classified staff and parents. Building on these existing committees and teams to ensure full labor-management representation can be an efficient way to expand this type of collaboration to school sites.

As labor-management teams form at the school site level, the district team should develop a plan for training and supporting the site-level teams to develop and adapt guiding behaviors and norms, using those developed by the district level team as an example. School sites may encounter challenges in forming a School Learning Team (SLT) such as compensating classified staff whose hours may not align with the school day and ensuring administrators and teachers have sufficient time available to participate in the team. But those challenges are worth resolving when it leads to school administrators and union leaders working more effectively together to engage diverse voices, data and ideas. And, as highlighted by the CPSELS, these collaborative behaviors give clarity on how to implement the big ideas of the CPSELS and help adults model the expectations of student learning.

### WHY?

- Building collaborative problem solving skills at the school site will contribute to district-wide culture change and furthers coherence across the system.
- Students benefit when the adults they interact with model trust, equity, and communication.
- The benefits of a collaborative culture are experienced at the site level, too, including: shared learning and problem solving, trust and psychological safety, increased transparency and diverse participation.

### HOW?

- Consider rolling out to cohorts of schools who volunteer to participate vs. an all sites approach based on the size of the district. Starting small and building champions for the work can further the effort.
- Communicate the vision, goals, and expectations for the district labor-management initiative. It is powerful when the superintendent and union presidents are visible together at school sites promoting partnership, collaboration and shared goals.
- Train people across the system on the elements of partnership: including frameworks, resources, and intentionality.
- When launching a school learning team, it is important to ensure that the conditions of trust, equity, and communication are in place or that there is a plan for building these capacities. Make discussions of trust and power dynamics explicit.
- The District level team must walk the walk and talk the talk and engage in the work together with school sites and others across the district. The District level team must act upon the work accomplished by the school site teams, support them when they struggle, and celebrate accomplishments.

### Insights from the CA LMI Team

Building school site teams is a powerful way to build coherence and communication flows across the district, especially when the school site is engaged in meaningful reflective practice and the district includes that data in decision making.

While there is a tendency to want to expand the work quickly to school sites, it is important for the key district level union and management leaders to have a clear strategy and sufficient levels of trust to model partnership before expanding the effort.

As in building district level joint committees we are not usually starting from a blank slate. For example, some existing school site committees may only need the addition of a designated labor voice. Be aware of the potential challenging dynamics when modifying existing team membership; particular attention should be given to assuring trust, communications and transparency among team members.

## 5.B. DEVELOP PARTNERSHIPS AT THE SITE LEVEL (Continued)

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 2: Instructional Leadership**
  - » Element 2A: Leaders promote a culture in which staff engages in individual and collective professional learning that results in their continuous improvement and high performance.
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
- **Standard 3: Management and learning environment**
  - » Element 3D: Leaders align fiscal and human resources and manage policies and contractual agreements that build a protective learning environment.
- **Standard 5: Ethics and Integrity**
  - » Element 5B: Leaders guide and support personal and collective actions that use relevant evidence and available research to make fair and ethical decisions.

## 5.B. Resource Overview and Implementation Suggestions

The resources in this section include materials from ABC Unified and NEA. Teams are encouraged to modify, change and build upon every tool in this guidebook.

It is important to be cognizant of the fact that there will continue to be differences of opinion between union and management leaders at the district and site level. It is hard work getting to the place where diverse perspectives and experiences are welcomed and valued. Specifically, leaders must model and help build the capacity of schools to have the trust and collaborative investment to do collaborative planning through times of agreement and disagreement. Weathering rough seas but continuing to work on shared objectives because everyone feels valued and heard is the goal.

Please note that the NEA Workbook uses the term Leadership Team while we use the term Learning Team. These generally have the same meaning here. Many teams choose to create their own names for their labor-management teams such as the West Contra Costa Solutions Team. We encourage teams to personalize this work. Get creative and develop terminology that is meaningful to you.

## 5.B. Resource Overview and Implementation Suggestions (Continued)

Guiding Questions	Progress Points
How might your labor-management team develop a vision, strategy, and milestones for a district wide rollout?	<p>There is a written plan that identifies participating schools, articulates expectations or project goals for the new teams, and maps out a strategy for training and capacity building at the new sites.</p> <p>School sites have labor-management teams.</p>
<p>What is the plan for building the capacity of new school level labor-management teams?</p> <p>How might school site teams be trained and coached to implement their labor-management partnerships? How might you check in regularly on progress?</p>	<p>Members of the school site labor management teams have been trained in labor-management collaboration skills and an assessment or feedback from the site teams informs the district team about effectiveness and issues.</p>
<b>Trust:</b> How does your district labor-management team provide tools and resources for school site partnerships to have difficult conversations?	<p>Training has been planned and provided in collaboration with the DLT and SLTs.</p> <p>Confidential anonymous school climate surveys are used to monitor levels of trust and psychological safety.</p>
<b>Equity:</b> How might school site partnerships approach issues of equity at the school site level?	<p>The school has adopted a guiding process that helps frame all decisions from an equity lens and its impact on students and/or staff.</p> <p>All staff are familiar with shared tools and frameworks for approaching issues of equity.</p> <p>A more representative group of stakeholders is engaged in decision making and leadership.</p>
<p><b>Communication:</b> What structures and norms might your site labor-management teams have to communicate their joint work to staff, students and parents?</p> <p>How should school site partnerships communicate with the district level team?</p>	<p>Staff, both administrative and union, have a shared story about what is happening at the school and in the district to promote a collaborative culture.</p> <p>Communications and promising practices are shared across sites and with the district learning team.</p>

## Leadership Structures - School Learning Team

*Consortium for Educational Change*

---

### Purpose

The School Learning Team establishes and communicates a shared school vision engaging broad and deep participation from stakeholder groups to carry out and realize the school's vision. The School Learning Team sets the direction and pace for the school, consistent with school and district goals, and communicates progress to staff, parents and the school community.

### Guiding Principles

- Commit to, and model, a culture of collaboration
- View themselves as a listening/learning team focused on “we”
- Seek active engagement of all members and designs systems for involving the school community (teachers, staff, parents, and community)
- Commit to interest-based problem solving approaches

### Composition

The School Learning Team is selected by peer groups and is composed of:

- Principal and administration
- Representatives from grade level and content areas
- Union representatives
- Professional support staff

### Function

- Establishes clear and compelling learning expectations for students
- Aligns curriculum, instruction, and assessments to support teachers in empowering students through learning
- Collects, analyzes, and uses data on learning and assessment
- Establishes vertical and horizontal structures to listen, learn, and share progress, opportunities, and challenges with the District Learning Team and Collaborative Learning Teams (PLCs)
- Communicates the learning, opportunities and challenges to the entire school community
- Identifies the conditions for a school environment focused on student learning
- Implements strategies that support students, staff and families

## Two Examples of Supporting Site Staff

*An Excerpt from The ABCs of Partnership*

District and union leaders in ABC say the most difficult partnerships to build and maintain are those between principals and site representatives at the school level. As Rico said, collaboration can't be forced from the top down to the schools. But union and district leaders can model partnership and encourage management and labor at schools to work more cooperatively. Devlin adds that successful partnerships at the school level appear very similar to strong district-level partnerships—the parties communicate regularly and have adopted similar beliefs and behaviors.

### The Changing Roles of the Site Representative and Administrator

Site reps are elected by the staff at their schools, handle their traditional duties, and defend their contract and their members. But once in place, they are also trained by ABCFT to consider partnership with their administrators a key aspect of their position. In fact, in its recently revised training program held at the start of each year, ABCFT makes it clear that site reps are expected to meet regularly with their principals and engage in “fierce conversations” in an effort to improve learning at the schools.

New principals are introduced to the collaborative labor-management partnership as part of their two-year leadership training. Their program is called COMPASS, which stands for Coaching Our Management in Peer Administrative Support System. “Sharing leadership is not easy for many principals,” admits Crechena Wise, principal at Tetzlaff Accelerated Learning Academy. “It’s so much easier to just do it yourself,” she says. “But it’s when we share the job that we are all held accountable.” An important point to consider: Conflicts can arise when a site rep—a teacher—is expected to work as a partner with the principal who conducts his or her evaluation. When working as partners to resolve issues or develop school improvement strategies, consider yourself equals. Outside of the partnership, the manager subordinate relationship stands.

### An Example from San Juan Unified

San Juan Unified developed optional Faculty Rep / Administrator training sessions for principals and union site reps. The sessions were co-designed by the district, administrators association and teachers union with the goal of improving communication and collaboration. The sessions are designed for faculty reps and administrators at school sites to attend the training together. The trainings are held at the central office and meals and continuing education credits are included. Below is an excerpt from communications to site leaders.

Are you interested in improving your working relationship between Site Administrators and SJTA Faculty Reps and finding new ways to work together? If so, we would like to invite you to a training series developed jointly by the SJTA, SJPEC and the District. We believe in working collaboratively and have the research to show that improved working relationships between faculty reps and administrators improves student learning. Discussions will focus on moving from adversaries to a problem solving team. Skill building activities will lead to understanding and practicing inquiry language, problem solving and conflict management strategies.

## Identify Collaborative Teams and Functions

*Excerpt from 2019 Collaborating for Student Success NEA Workbook*

Creating standing meetings between association/union leaders and district administrators responsible for multiple aspects of educators' lives is a good starting point because it helps ensure that communication flows freely. These meetings complement the collaboration occurring in the DLT, SLT, and committees. Where possible, contract or agreements can be established to codify these communications.

### School Leadership Team

The School Leadership Team (SLT) is comprised of the school principal and assistant principal or other administration leaders, representatives from grade levels and content areas, association/union representatives and professional support staff. In some cases, it also includes students, parents, and community members. The SLT identifies school environment and student learning goals and implements strategies that support students, staff, and families. The SLT is the agent for school change. It collects and analyzes student learning data, aligns curriculum and instruction to student learning goals, and establishes methods to share progress with other stakeholders, including the DLT. It provides support to the school-level working committees, who are actively building solutions to issues raised by educators at the school.

In particular, the SLT:

- Establishes and communicates a shared school vision
- Engages broad and deep participation from stakeholder groups to solve problems, develop strategies, and carry out and realize goals
- Sets the direction for the school, consistent with school and district goals, and communicates progress
- Learns about collaboration's benefits, structures, and processes
- Identifies projects and priorities to bring about school success
- Forms project-based working committees to address the priorities of the school-level stakeholders and to oversee implementation of district-level policies and programs at the school
- Increases school employee participation in committees and on school improvement projects
- Monitors and advises committees on project progress and collaboration skills

**“Collaboration is not just compromising by agreeing to some middle points between two positions, but expanding possibilities by adding other parties with different perspectives who can help find new and creative solutions.”**

**- Marietta, D'Entremont and Kaur (2017): *Improving Education Together: A Guide to Labor Management Community Collaboration***

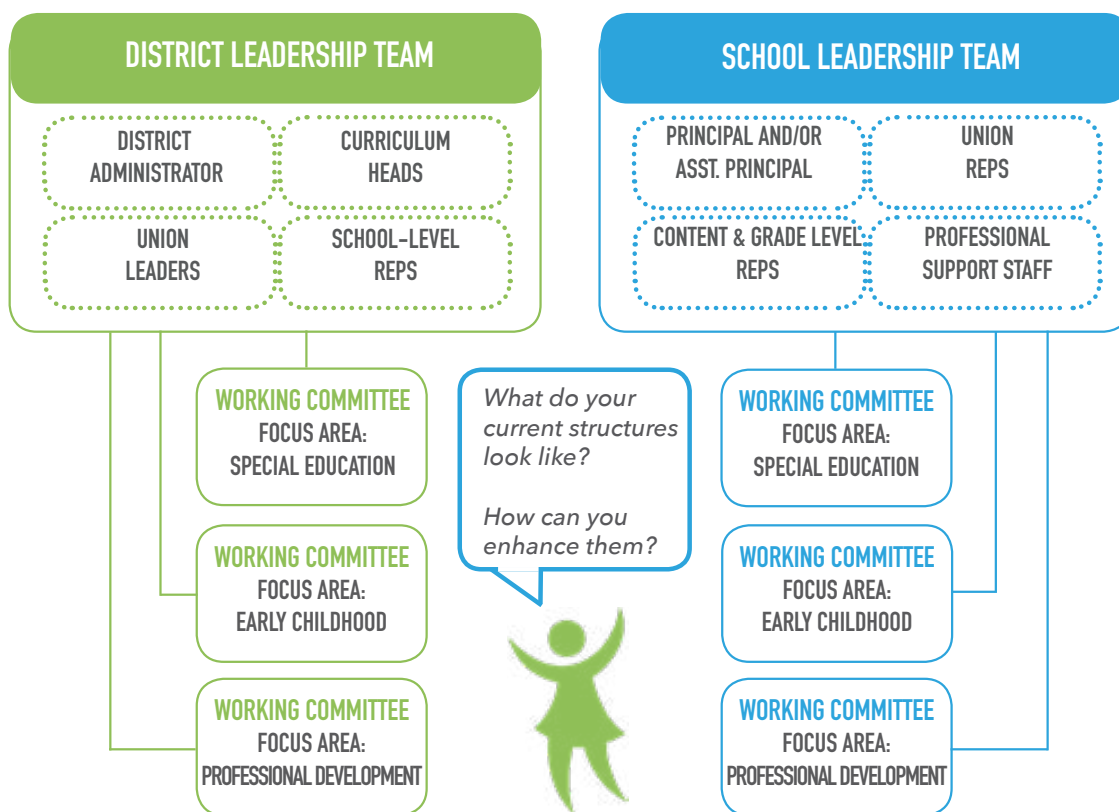

# COLLABORATIVE STRUCTURE WORKSHEET

## PURPOSE

Strong partnerships create space and opportunity for collaborative work to occur. This tool helps you identify the existing structures, such as teams and committees, in your system that support collaborative practices, analyze if these structures are sufficient to meet your goals, and consider additional structures that you and your partners may want to create.

## PART 1 INSTRUCTIONS:

A sample organizational chart of collaborative structures is shown below. Use this to draw a chart of your existing structures, then consider what additional teams or committees you might want to establish. On the following page, make your own chart, with placeholders for desired/future teams and committees.

## The Site Leadership Team: Assessing Our Work

*Consortium for Educational Change*

### Leadership Team Resources

<b>School:</b>		<b>Date:</b>
<b>Criteria</b>	<b>Questions</b>	<b>Indicators</b>
<b>Selection of SLT Members</b>	How were SLT Members Selected? What criteria were used in selecting SLT Members? Length of time linked to SLT Membership	
<b>Focus of Work</b>	What is the work of the SLT? How much of the work is operational? How much is instructional? Who establishes the SLT agendas? What goals are established?	
<b>How it Works</b>	How often does the SLT meet? How long are the meetings? What expectations are in place for SLT meetings? Members? How are goals determined?	
<b>Relationship with PLCs</b>	What is the relationship of SLTs to PLCs and/or Grade Level/Subject Area Teams? What communication expectations are in place to/from PLCs and/or Grade Level/Subject Area Teams? Are minutes kept of PLC meetings? Who are these minutes shared with? How is relevant information shared with the SLT? The Administration? The Faculty?	
<b>Relationship with Administration</b>	What is the role of Administration with the SLT? How often does the Administration meet with the Faculty? How often does the Administration meet with Union Representatives? What is the purpose of these meetings?	
<b>Relationship with Faculty</b>	What information is generally shared with the faculty? How is information shared with the faculty?	
<b>District Learning Team</b>	What information is shared with the DLT? How is that information shared? How is this information used to support the work of staff? How is this information used to enhance supports for students?	
<b>Opportunities for Improvement</b>		

# ELEMENT 6:

## Advance

Building on Elements 1-5, this stage focuses on the labor-management team becoming a continuously learning team and growing the district into a sustainable, professionally collaborative organization. This section is devoted to creating enduring policies and protocols for organizational reflection and monitoring, data collection and continuous improvement grounded in trust, equity and communication. In this section, it is important to acknowledge the importance of reflection on both the implementation process and the project outcomes. Leaders must also institutionalize collaborative culture and ensure it is sustainable and not primarily based on the relationships of a small group of current leaders.

### Contents:

<b>6.A. - Reflect and Monitor .....</b>	<b>103-108</b>
<b>6.B. - Ensure Sustainability .....</b>	<b>109-114</b>

“

The world doesn't change one person at a time. It changes when networks of relationships form among people who share a common cause and vision of what's possible. This is good news for those of us intent on creating a positive future. Rather than worry about critical mass, our work is to foster critical connections. We don't need to convince large numbers of people to change; instead, we need to connect with kindred spirits. Through these relationships, we will develop the new knowledge, practices, courage and commitment that lead to broad-based change.

—Margaret J. Wheatley  
American Author

”

## 6.A. REFLECT AND MONITOR

**Labor-management teams can be strengthened and their effectiveness optimized by engaging in a continuous process of check-ins and reflection.** In addition to measuring progress on what the team is working on (i.e., particular initiatives or projects), this should include reflection on how the team is working together (i.e., group dynamics, communication, level of trust).

These activities can help provide affirmation of the ways in which labor-management partnership is working well while recognizing that there are always opportunities to improve and strengthen collaboration. Similarly, these tools can help teams engage in ongoing, collaborative assessments of existing programs, policies, and priorities.

This work connects to both the Collaborative Cultures and Securing Accountability sections of the Coherence Framework. In particular, through reflection on and monitoring of collaborative efforts, labor-management teams can support a shared growth mindset, continuously improve their results, and approach underperformance as an opportunity for growth.

### WHY?

- Continuously improve on collaborative work and relationships so leaders and teams become adept at collaborative professionalism, individually and collectively
- Create safe spaces for honest conversations about facts, not people
- Strengthen group dynamics and ways of working together while improving overall effectiveness in achieving progress on shared priorities
- Recognize the progress and success of collaborative effort

### • HOW?

- Review and discuss data on outcomes (not outputs) related to shared goals and priorities
- Use tools such as the 3-Box Framework and After Action Review to reflect as a team and identify ways to improve results and implementation

### Insights from the CA LMI Team

Reflect and discuss your guiding behaviors document regularly. Some teams put this on their agenda documents.

Take the time to step out if there is a need to refocus on trust, confidentiality, communication or other underlying obstacles.

Collaborative Professionalism requires both trust and precision. Clarity on process and transparency in decision making builds trust.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1C-1: Include all stakeholders in a process of continuous improvement (reflection, revision, and modification) based on the systematic review of evidence and progress.
  - » Element 1C-2: Use evidence (including, but not limited to student achievement, attendance, behavior and school climate data, research, and best practices) to shape and revise plans, programs, and activities that advance the vision.
- **Standard 2: Instructional Leadership**
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving.
  - » Element 2C: Leaders develop and use assessment and accountability systems to monitor, improve, and extend educator practice, program outcomes and student learning
- **Standard 3: Management and Learning Environment**
  - » Element 3B-3: Set clear working agreements that support sharing problems, practices and results within a safe and supportive environment.
  - » Element 3B-4: Engage stakeholders in using problem **solving** and decision-making processes and distributed leadership to develop, monitor, evaluate and revise plans and programs.
- **Standard 5: Ethics and integrity**
  - » Element 5A: Leaders act upon a personal code of ethics that requires continuous reflection and learning.
  - » Element 5A-2: Reflect on areas for improvement and take responsibility for change and growth.
  - » Element 5B: Leaders guide and support personal and collective actions that use relevant evidence and available research to make fair and ethical decisions.
  - » Element 5C: Leaders recognize and use their professional influence with staff and the community to develop a climate of trust, mutual respect, and honest communication necessary to consistently make fair and equitable decisions on behalf of all students.

## 6.A. Resource Overview and Implementation Suggestions

This section includes three tools that can be helpful to guide the work of teams.

The *Three-Box Framework* is a simple activity of organizing existing work into conceptual boxes of things to keep (Build Upon What Works) or things to discard because they are not effective (Abandon What is in the Way) and a third box for new ideas. Labor-management teams can tackle big issues using the boxes one at a time or identify an issue to focus on more deeply using all three boxes. The multi-page Three Box Framework tool is linked below.

The *After Action Review* is another simple tool that helps focus attention on whether the activity or program actually had the outcomes that were intended. It provides questions to guide the discussion about what to do with the actual outcome. This tool and the Three-Box Framework build from a positive asset perspective by asking teams to reflect on what is working and build from there.

The third tool is part of the Coherence Framework. This section is focused on how a team improves its shared accountability. It is a useful group assessment tool. In addition to discussing where the team's current operations align on the continuum, it is important to determine where the team is interested in growing its capacity and set targets to achieve that.

Guiding Questions	Progress Points
Consider whether the benchmarks and goals provide meaningful information that is useful, measurable and actionable. Are plans and goals reasonable for the timeframe and if not, how can they be adjusted?	Benchmarks and goals are reviewed regularly. Processes and programs are being modified when needed based upon the data and collaborative analysis which includes labor and management.
Collaborative and diverse teams may already exist but are not connected to labor-management partnership efforts. How will you connect various initiatives to build coherence?	Union and management teams are aware of and supportive of all collaborative work in the district. There is regular planning and discussion on coordinating and deepening coherence across multiple activities and initiatives.
<b>Trust:</b> Do labor-management team members express honest assessments that get to the heart of issues? How is that evidenced?	The labor-management team members continue to work on shared goals even while navigating contentious issues or difficult labor negotiations. Team members have the psychological safety to engage in hard conversations about important issues that impact students and staff including power dynamics and racial inequities.
<b>Equity:</b> Is there clarity about and agreement on the definition of diversity? How were diverse voices identified and encouraged to give honest feedback?	Information/data used to assess progress comes from more diverse voices and are taken seriously in the analysis. Processes for collaborative inquiry includes a wide range of perspectives.
<b>Communication:</b> How is the labor-management team communicating values, activities and progress to the organization? Is it adequate? Is communication sent from the team? How are team members communicating with their constituencies?	People in the organization regularly use shared language, tools and skills promoted by the labor-management team. Communications come from both joint labor-management communications and separately from the union and management.

## Coherence Progression: Securing Accountability (continued)

	Emerging	Accelerating	Mastering
<p><b>External accountability is used transparently to benchmark progress</b></p>	<ul style="list-style-type: none"> <li>Standards and expectations for learning, teaching, and leadership are becoming clearer but are not understood or shared by the schools or district.</li> <li>A culture of competition, not collaboration, is evident.</li> <li>The school or district overemphasizes negative strategies such as performance appraisal and public ranking of data as incentives for improving performance, rather than using capacity building as the driver for improvement.</li> <li>Trust is not strong, and intervention is viewed as negative.</li> </ul>	<ul style="list-style-type: none"> <li>The school or district has established standards and expectations for learning, teaching, and leadership, but they may not be understood and used consistently.</li> <li>The school or district is moving to use more capacity-building strategies such as viewing performance appraisal as a vehicle for growth rather than an evaluation.</li> <li>Data are used more transparently and incorporates measures of organizational health as well as student performance, but the process may not yet be trusted by everyone or used consistently.</li> </ul>	<ul style="list-style-type: none"> <li>The school or district establishes and promotes professional standards and practices, including performance appraisal.</li> <li>Data are used transparently and with expertise to improve the learning process at all levels.</li> <li>Measures of organizational health, student performance, and well-being are monitored. Indicators of organizational health include staff retention rates, leadership turnover rates, teacher absenteeism rates, number of crisis-related incidents, degree of collaboration, and levels of trust. Indicators of student performance and well-being include performance data as well as student sense of control over destiny and engagement in learning.</li> </ul>

*Taking Action Guide: Building Coherence in Schools, Districts and Systems, Fullan, Adam & Quinn, 2015*

“

**“The product of true labor-management cooperation is not civility; it is educational improvement. Collaboration is not an end in itself. Labor-management collaboration is successful when it produces agreements that make education better.”**

—Julia E. Koppich & Charles Taylor Kerchner,  
*Negotiating What Matters Most*, EducationWeek

## 6.B. ENSURE SUSTAINABILITY

**Sustaining labor-management partnerships requires intentionality and dedicated effort, starting with the original participants.**

However, sustainability can only be achieved if systems are in place that will last beyond the current leaders engaged in the partnership building process. Key strategies for sustaining collaborative practices include embedding and institutionalizing collaborative labor-management teams into district operations and adopting their processes as district policy. In addition, expanding labor-management collaboration across the organization, including at the site level, and supporting the creation of Labor Management Learning Teams throughout the district can build momentum, develop collaborative leaders across the organization and support enduring organizational culture change.

### WHY?

- Institutionalize labor-management partnership work to ensure that it is not just based on relationships of a few current leaders.
- Affirm and broaden support for labor-management collaboration among the board, district and union leaders, staff members and community.
- Sustain continued labor-management partnership practices through leadership transitions.

### HOW?

- Adopt policies and negotiate contract language that memorialize the work of the labor-management partnership. Position student achievement as a central focus of labor-management collaboration.
- Expand the labor-management work beyond the founding committee and communicate expectations to all committees and across the organization.
- Adopt practices that embed collaboration and sustainability strategies in everyday operations
- Incorporate labor-management collaboration principles into professional development and training for all staff.
- Build labor-management champions throughout the organization by being transparent and sharing information about the work, the progress and the challenges.

### Insights from the CA LMI Team

Be inclusive and transparent. Encourage all members of the district labor-management team to promote the vision, the work and the outcomes with their co-workers and constituents.

Hire management personnel with a personal commitment to and track record of leading collaborative processes, with a focus on trust, equity and communications.

Train staff in the tools and processes of labor-management partnership, distributive leadership and collaboration.

Include collaborative culture standards in position descriptions and in performance assessments. Using the CPSELs to lift up collaboration for all staff is an effective way to clarify expectations.

The School board has a critical role in hiring a superintendent who has a track record and interest in building labor-management partnerships. Once in place the board should include an evaluation component for the superintendent based on metrics for building a collaborative culture. The board should regularly agendaize and discuss sustaining collaborative culture across the district including resourcing professional development to support it.

### Links to CA Professional Standards for Educational Leaders (CPSEL)

- **Standard 1: Development and Implementation of A Shared Vision**
  - » Element 1B-3: Build shared accountability to achieve the vision by distributing leadership roles and responsibilities among staff and community.
- **Standard 2: Instructional Leadership**
  - » Element 2A: Leaders promote a culture in which staff engages in individual and collective professional learning that results in their continuous improvement and high performance.
  - » Element 2A-4: Strengthen staff trust, shared responsibility, and leadership by instituting structures and processes that promote collaborative inquiry and problem solving..
- **Standard 3: Management and Learning Environment**
  - » Element 3B-3: Set clear working agreements that support sharing problems, practices and results within a safe and supportive environment.
  - » Element 3B-4: Engage stakeholders in using problem solving and decision-making processes and distributed leadership to develop, monitor, evaluate and revise plans and programs.

## 6.B. Resource overview and implementation suggestions

It is vital to institutionalize labor-management partnership work to ensure that it is not just based on the relationships of a few current leaders. Look for opportunities across the work of the organization and embed partnership and collaborative processes into planning, process and policy documents whenever possible. Collaborative processes that are clearly identified as connected to the priority of building collaborative cultures at every level help create clear messaging and direction. Two contract examples in this section help provide ideas for describing both the intent and structure for partnership. An additional tool, the Inventory of Committees and Structures helps teams to reduce redundancy and the proliferation of committees often made up of the same individuals. Mapping out existing committees and structures can offer the opportunity to streamline and consolidate efforts. Clarity on the purpose and role of each committee and structure can help develop organizational coherence.

Guiding Questions	Progress Points
What practices can be shared across the organization that prioritize collaboration and partnership?	Staff development is created with labor and management input and staff is trained in the tools and processes of labor-management partnership, distributive leadership and collaboration.
Which district labor-management partnership priorities are reflected in your budget and LCAP? Which are not?	District funds and plans are incorporated into the LCAP and have a dedicated budget line item that allows for staff training and reflection to support partnership.
How have one time or ongoing funds been used for professional development in support of labor-management collaboration?	The district labor-management partnership participates in CA LMI trainings and convenings supported by funds from the district budget.
<b>Trust:</b> How does your team thoughtfully consider sustaining trust within your labor-management team? How does your board, cabinet, leadership teams, union leadership teams foster trust?	Professional development includes training all staff in trust building activities. Staff meetings regularly visit the issue and monitor the level of trust among teams. Staff climate surveys gather data on the level of trust among staff.
<b>Equity:</b> How might your labor-management team take up issues of equity to ensure every single individual in the workplace has the specific support they need to succeed and grow?	District and school site policies and administrative regulations echo the equity principles practiced by your labor-management team.
<b>Communication:</b> How might your team institutionalize your joint communication protocols and increase transparency?	Easily accessible places exist for storing all of the information about labor-management work. This should include the vision, professional development tools, project implementation tools, project decisions, self-assessment information, celebrations of accomplishments and work to be done, minutes, strategic and work plans

- *Leadership Structures: Reviewing Purpose and Voice*

## Collective Bargaining Contract between San Juan Unified School District and San Juan Teachers Association 2019-2021 Article 24

### \*A note about the following example contract language from San Juan, CA and Montgomery County Maryland:

The contract language shown from these two agreements is not meant to be used as a cut and paste approach or to necessarily represent best practices that would apply to your specific situation. We show these two examples to give labor-management teams some ideas that they might contextualize and learn from as ways in which various education systems have codified and institutionalized their labor-management partnerships. Developing board policy or contract language is not an early stage endeavor. Building trust and developing real labor-management partnerships takes more than a policy or getting something in the contract. However, we hope this gives you some ideas of what highly developed systems are doing to institutionalize their partnerships.

### Article 24. CREATING AND SUSTAINING A COLLABORATIVE CULTURE (Excerpt)

#### 24.01 Statement of Intent

The District and Association agree to take responsibility and be held accountable for the improvement of the quality of teaching and learning which represents an expanded role in public education. It is in the best interest of the San Juan Schools that the District and the Association cooperatively engage in activities and communication which demonstrate mutual respect for all stakeholders and results in the improvement of student achievement through the development of common goals, a cooperative, trusting environment, and teamwork. It is the belief that actively and constructively involving all relevant stakeholders contributes significantly toward achieving these goals. Shared responsibility and accountability for results are at the core of a continuous improvement model. Joint responsibility for student success means that educators share in celebrating what works and share in identifying together areas that are not working and are in need of improvement.

#### 24.02 Recognition of Mutual Accountability

24.02.1 Recognizing the importance of mutual collaboration, the District and the Association acknowledge that they are both responsible for sustaining a culture to support the continuous improvement model. The District and the Association must continually meet, articulate core values, reinforce the vision, and demonstrate their commitment to a new way of doing business. The parties also acknowledge that they must strive to model collaboration for district leaders, district departments, school sites, leadership teams, site departments and teachers. The continuous improvement process requires that the District and the Association support the needs of students, those who work in the classrooms and school administrators by providing the resources required for the planning, critiquing, and assessment of the work of teaching and learning. It is the shared responsibility of the District and the Association to build the capacity of each school to function as a learning community in which professional development is job-embedded and is supported with sufficient time and resources.

## Contract Agreement Between Montgomery County Education Association (MCEA) and Montgomery County Public Schools, Rockville, Maryland for the School Years 2018-2020

(pages 12-21)

### Article 6: Collaboration (Excerpt)

#### A. Introduction

MCPS is committed to creating organizational structures and processes that solidify the collaborative relationship between MCPS and the teachers' representative organization, MCEA, so that all parties will work together to do what is best for students. We define collaboration as a process in which partners work together in a meaningful way and within a time frame that provides a real opportunity to shape results. The purpose of the process is to work together respectfully to resolve problems, address common issues, and identify opportunities for improvement. To be successful, the collaborative process must be taken seriously and be valued by both parties. The process must be given the time, personal involvement and commitment, hard work, and dedication that are required to be successful. The partners will identify and define issues of common concern, propose and evaluate solutions, and agree on recommendations.

**B. The Board of Education and the superintendent agree to meet with the Association's Board of Directors at mutually agreed upon times to discuss matters of interest and concern.** The Association's Board of Directors will submit items to be included on the agenda five working days prior to the meeting. The Association's Board of Directors will meet with the superintendent at least once a month during the term of this agreement to review and discuss matters of mutual concern and administration of this Agreement

#### C. Organizational Culture of Respect

The parties are committed to fostering an organizational culture of respect throughout the school system (see Appendix B for the entire document). This culture is built on the belief that all employees are essential for the school system to attain equity and excellence for all students. To accomplish this there must be a SYSTEMWIDE commitment to foster this organizational culture of respect and there must be accountability at all levels of the organization. The parties recognize this collective bargaining relationship is essential to enhance this culture. The organizational culture of respect is based on the following principles:

- Trust in each other and the process
- Use of collaborative and interest-based processes
- Recognition of every employee's contributions
- High expectations for all staff and students that are reasonable, clear, and transparent
- Open, honest contributions without fear of retribution
- Open and effective communication
- Respect for various points of view
- Civility in all our interactions
- Team building and working together as teams

The parties will work together to ensure all employees understand that in order to create this culture, all parties must take responsibility for their own behavior and follow these principles. Managers and supervisors must model this behavior, and all employees are expected to exhibit this behavior at all times.

One way to ensure this culture exists throughout MCPS is through the full implementation of the Teachers Professional Growth System. Professional development plans and employee recognition are important components of this system. In addition, all employees are expected to provide and receive feedback constructively and respectfully. There will be a commitment to resolving issues and problems at the lowest level possible without applying blame.

## Contract Agreement Between Montgomery County Education Association (MCEA) and Montgomery County Public Schools, Rockville, Maryland for the School Years 2018-2020

(pages 12-21, continued)

---

### D. Commitment to Equitable Practices in the Workplace

The Board of Education and the Association are committed to equitable practices for the achievement of all students. Our commitment to equitable practices and diversity is reflected in the school system's core values and beliefs. In order to be successful, the parties expect all staff to respect individual and group differences and to recognize that diverse opinions, perspectives, experiences, and backgrounds help MCPS attain the high expectations we have for all students.

It is our shared responsibility to assume that each student and adult has unlimited potential and has the ability to achieve at high levels. Equitable practices require the commitment to high expectations for all students and employees and the provision of supports that build capacity to meet the diversity of their needs. All employees are committed to cultural competence and positive relationships with all students, staff, parents, and community members, regardless of race, ethnicity, or background.

### E. Collaboration among the Leadership of MCEA, Other MCPS Unions, and MCPS Leadership

1. The parties are committed to working collaboratively with representatives of the other employee organizations in a variety of structures and processes that have been created to address the priorities of MCPS. They include the following:
  - a. Associations/Deputy Superintendents/Chief Operating Officer (ADC)—A joint committee that provides for regular, ongoing discussions and decision making on matters germane to the employee organizations and management. The membership of ADC includes the president and executive director of each of the employee organizations, the deputy superintendent, and the chief operating officer. The charge of the ADC shall include but not be limited to the following:
    - Discussing matters of mutual interest or concern
    - Identifying opportunities to address shared interests
    - Developing guidelines and processes for implementing collaboration throughout the school system
    - Creating an organizational expectation for collaboration
    - Identifying supports and resources to sustain collaboration
    - Serving as a coordinating body and resource to facilitate the use of collaboration throughout MCPS
    - Reviewing and assessing the effectiveness of collaboration between MCPS and the associations
    - Determining how to align the three professional growth systems
    - Resolving problems arising from the interpretation or implementation of collaborative decisions
    - Supporting the implementation of the Organizational Culture of Respect throughout the system
    - Identifying how decisions that are made with other employee organizations will impact unit members and how all parties will be involved in these decisions so that the impact of any decision will be known before the decision is made
    - Discussing decisions that impact the members of multiple associations
    - Working together to identify opportunities and initiatives to improve the wellness of MCPS employees
    - Arranging for online publication of Time Impact Statements

### About CDE Foundation

---

**The Californians Dedicated to Education Foundation (CDE Foundation)** works as a trusted partner with state education leaders and entities to create, resource, and implement solutions that result in a strong and valued public education system that serves every student in California. Agility and creativity drive the organization's ability to navigate change on behalf of a statewide community of people and organizations while it supports capacity-building efforts at the California Department of Education. The CDE Foundation implements the following programs: the California Labor Management Initiative (CA LMI), the California STEAM Symposium, the California Teacher Residency Lab and District Innovation and Leadership in Early Education (DIAL EE).

The CDE Foundation is anchored by a small professional staff, a highly engaged Board of Directors, a complement of highly skilled and effective consultants, strong partnerships with the California Department of Education (CDE) and other education coalition members, foundations and corporations, and a network of individuals, educational institutions, and nonprofits across the state who share our commitment to public education and California's students.

We are proud to partner with our closest collaborator, the California Department of Education (CDE). As the fiscal manager for CDE, we manage private donations to invest directly in a public education system that serves nearly 6.2 million students. Our team supports the CDE mission to provide a world-class education for all students, from early childhood to adulthood. The Department of Education serves our state by innovating and collaborating with educators, schools, parents, and community partners. Together, as a team, we prepare students to live, work, and thrive in a multicultural, multilingual, and highly connected world.

State Superintendent Tony Thurmond and his team have set forward a bold vision, and we are honored to work and support them. As a response to the COVID-19 pandemic, CDE Foundation partnered with CDE to manage the CA Bridging the Digital Divide Fund, through which \$18.4 million, plus in-kind donations, were used to equip students with computing devices and connectivity. We are administering over \$1.5 million in grants that support new racial justice initiatives at CDE, which will support capacity-building within school districts to assess and address implicit bias. We believe that CDE Foundation has a responsibility to address structural racism in the education system, engage in ongoing learning and listening as an organization, and authentically partner with districts, counties, nonprofits and partners across the state.

## Videos

Title	Description
<b>From the Virtual Summit, June 2020</b> (continued)	
<a href="#">Keynote with Dr. Pedro Noguera</a>	Join us in hearing from The keynote address from Dr. Pedro Noguera, at the keynote speaker for the 2020 CA LMI Virtual Summit. A respected expert in the socioemotional needs of students, families and staff, his research is critical in developing tactics to navigate the realities of the COVID-19 pandemic and the safe reopening of schools. June 2020
<a href="#">Dinuba Unified District Story</a>	Dinuba Unified is a rural district in the Central Valley whose student population is 34% English Learner and 84% free/reduced lunch. Socio-economically disadvantaged. Participants will hear about Dinuba share their labor management partnership from the adversarial beginning of their engagement with the CA LMI five years ago to their organizational culture change using collaborative practices. The team will discuss their efforts to what they are currently doing to address the Covid pandemic and school reopening, as well as their collaborative mission to end generational poverty through education.
<a href="#">Mountain View School District Story</a>	Mountain View Elementary School District has 6300 students with 94% free/reduced meals and 55% English Learners. Located in LA County, the district has participated with CA LMI for two years. The speakers workshop will share their labor-management collaboration strategies and practices including how their partnership has impacted their Covid closure and reopening efforts.
<a href="#">Elk Grove Unified School District Story</a>	Elk Grove Unified is the 5th largest school district in California. With 55% free/reduced lunch disadvantaged students, EGUSD is in Sacramento County and started participating with the CA LMI in 2015. Their labor management team discusses their extensive efforts to build labor-management partnerships and focus on staff and student relationships through Outward Mindset trainings for all employees.
<a href="#">ABC Unified District Story</a>	ABC Unified is a national leader in labor-management partnership. Since a divisive strike over 20 years ago the labor-management team at ABC has built one of the most studied and comprehensive systems for partnership and collaboration. Hear from the ABC team about their system. their transition since the March closings and their extensive planning framework for reopening. ABC Unified is a 20,000-student district in LA County.
<a href="#">Staff Wellbeing &amp; Self-Compassion</a>	This workshop offers new insight into ways to strengthen labor-management relationships by addressing educator compassion fatigue, educational inequities, and encouraging self-care and self-compassion.
<a href="#">Coherence &amp; Collaboration: Interdisciplinary, Problem-Based Learning</a>	Explore strategies to design learning experiences that incorporate literacy skills, critical thinking, and topics relevant to students' lives outside of school. Face to face, distance learning and a hybrid approach are considerations in lesson design and pedagogical approaches.
<a href="#">School Planning, Equity &amp; SEL Strategies for Reopening</a>	Reopening schools following the pandemic in the fall takes imagination, creativity, collaboration, and most of all flexibility. Given the number of unknowns, schools must be agile, yet prepared for the worst-case scenario. This workshop highlights key questions and considerations for school leaders as they think about reopening schools amid a global pandemic.
<a href="#">Collaborating in a Crisis</a>	This workshop video builds on the guidance from the National Labor Management Partnership's Collaborating in a Crisis document and offers some steps for how to get started collaborating and addressing the issues of most urgency to your district and communities related to the safe re-opening of school buildings.
<a href="#">Three Box Framework: Planning to Action in the Era of Covid-19</a>	This workshop video provides viewers with the tools to ensure productive collaborative planning of parent support as part of COVID19 response. The 3-Box Framework and accompanying tools for structuring effective Labor-Management collaboration are introduced through the lens of building strategies and explore how best to develop intentional strategies for helping parents/families support learning at home.
<a href="#">Moving from Crisis to Opportunity: A presentation by Simon Breakspear</a>	Simon Breakspear shares insights on how schools can respond and learn from the pandemic experience., and what education might look like on the other side. Amid all the tension and unknowns, leaders need to explore the opportunities for innovation and transformation that are emerging from the Covid-19 crisis.
