

REFLECTION TOOL

After you try using a tool, use this framework to reflect on and learn from that practice with your students (or other learners):

Congratulations! You found the right tool for your formative assessment need. Keep experimenting in different scenarios to expand your comfort and efficacy with additional tools. If you're interested in trying additional tools, check out Quizlet, Kahoot, and Gimkit.

NOTES

Was there a misalignment between your purpose and the kind of data generated by the tool? What's your evidence? Consider going back to the planning process and using a different assessment tool.

Did the tool not function as you expected? What's your evidence? Consider watching the additional tutorial videos available from the vendor's website.

Did the assessment take too long to create, distribute, and process? What's your evidence? Stick with it and apply learnings to find process improvements! You'll get better each time you use the tool.

Did your audience find the tool too complicated to use? Try completing a run through beforehand so that you can anticipate potential challenges.
