

# COVID-19 Updates and Public Schools: A Conversation with State Public Health Leaders

November 19, 2020

# Presenters

---

Dr. Mark Ghaly

Secretary,  
California Health & Human Services

Dr. Erica Pan

Acting State Public Health Officer,  
California Department of Public Health

# Setting the Context

---

What is the Science?

Supporting Educators & Equity

Ongoing Engagement & Future Sessions

Can you speak to the science in regards to the spread of the virus with younger students and the importance of small cohorts?

What is the science that allows schools that have been open and are mitigating the virus with the appropriate safeguards and response, to stay open in the purple tier?

What are effective prevention measures that LEAs can take?

If you could provide one clear message that you would like educators to know as they make or further develop plans for in-person instruction, what would it be?
