

Change from 2019 to 2021 in Percent of Districts with Self-Rating of "Full Implementation" or "Full Implementation and Sustainability" as reported on the California School Dashboard

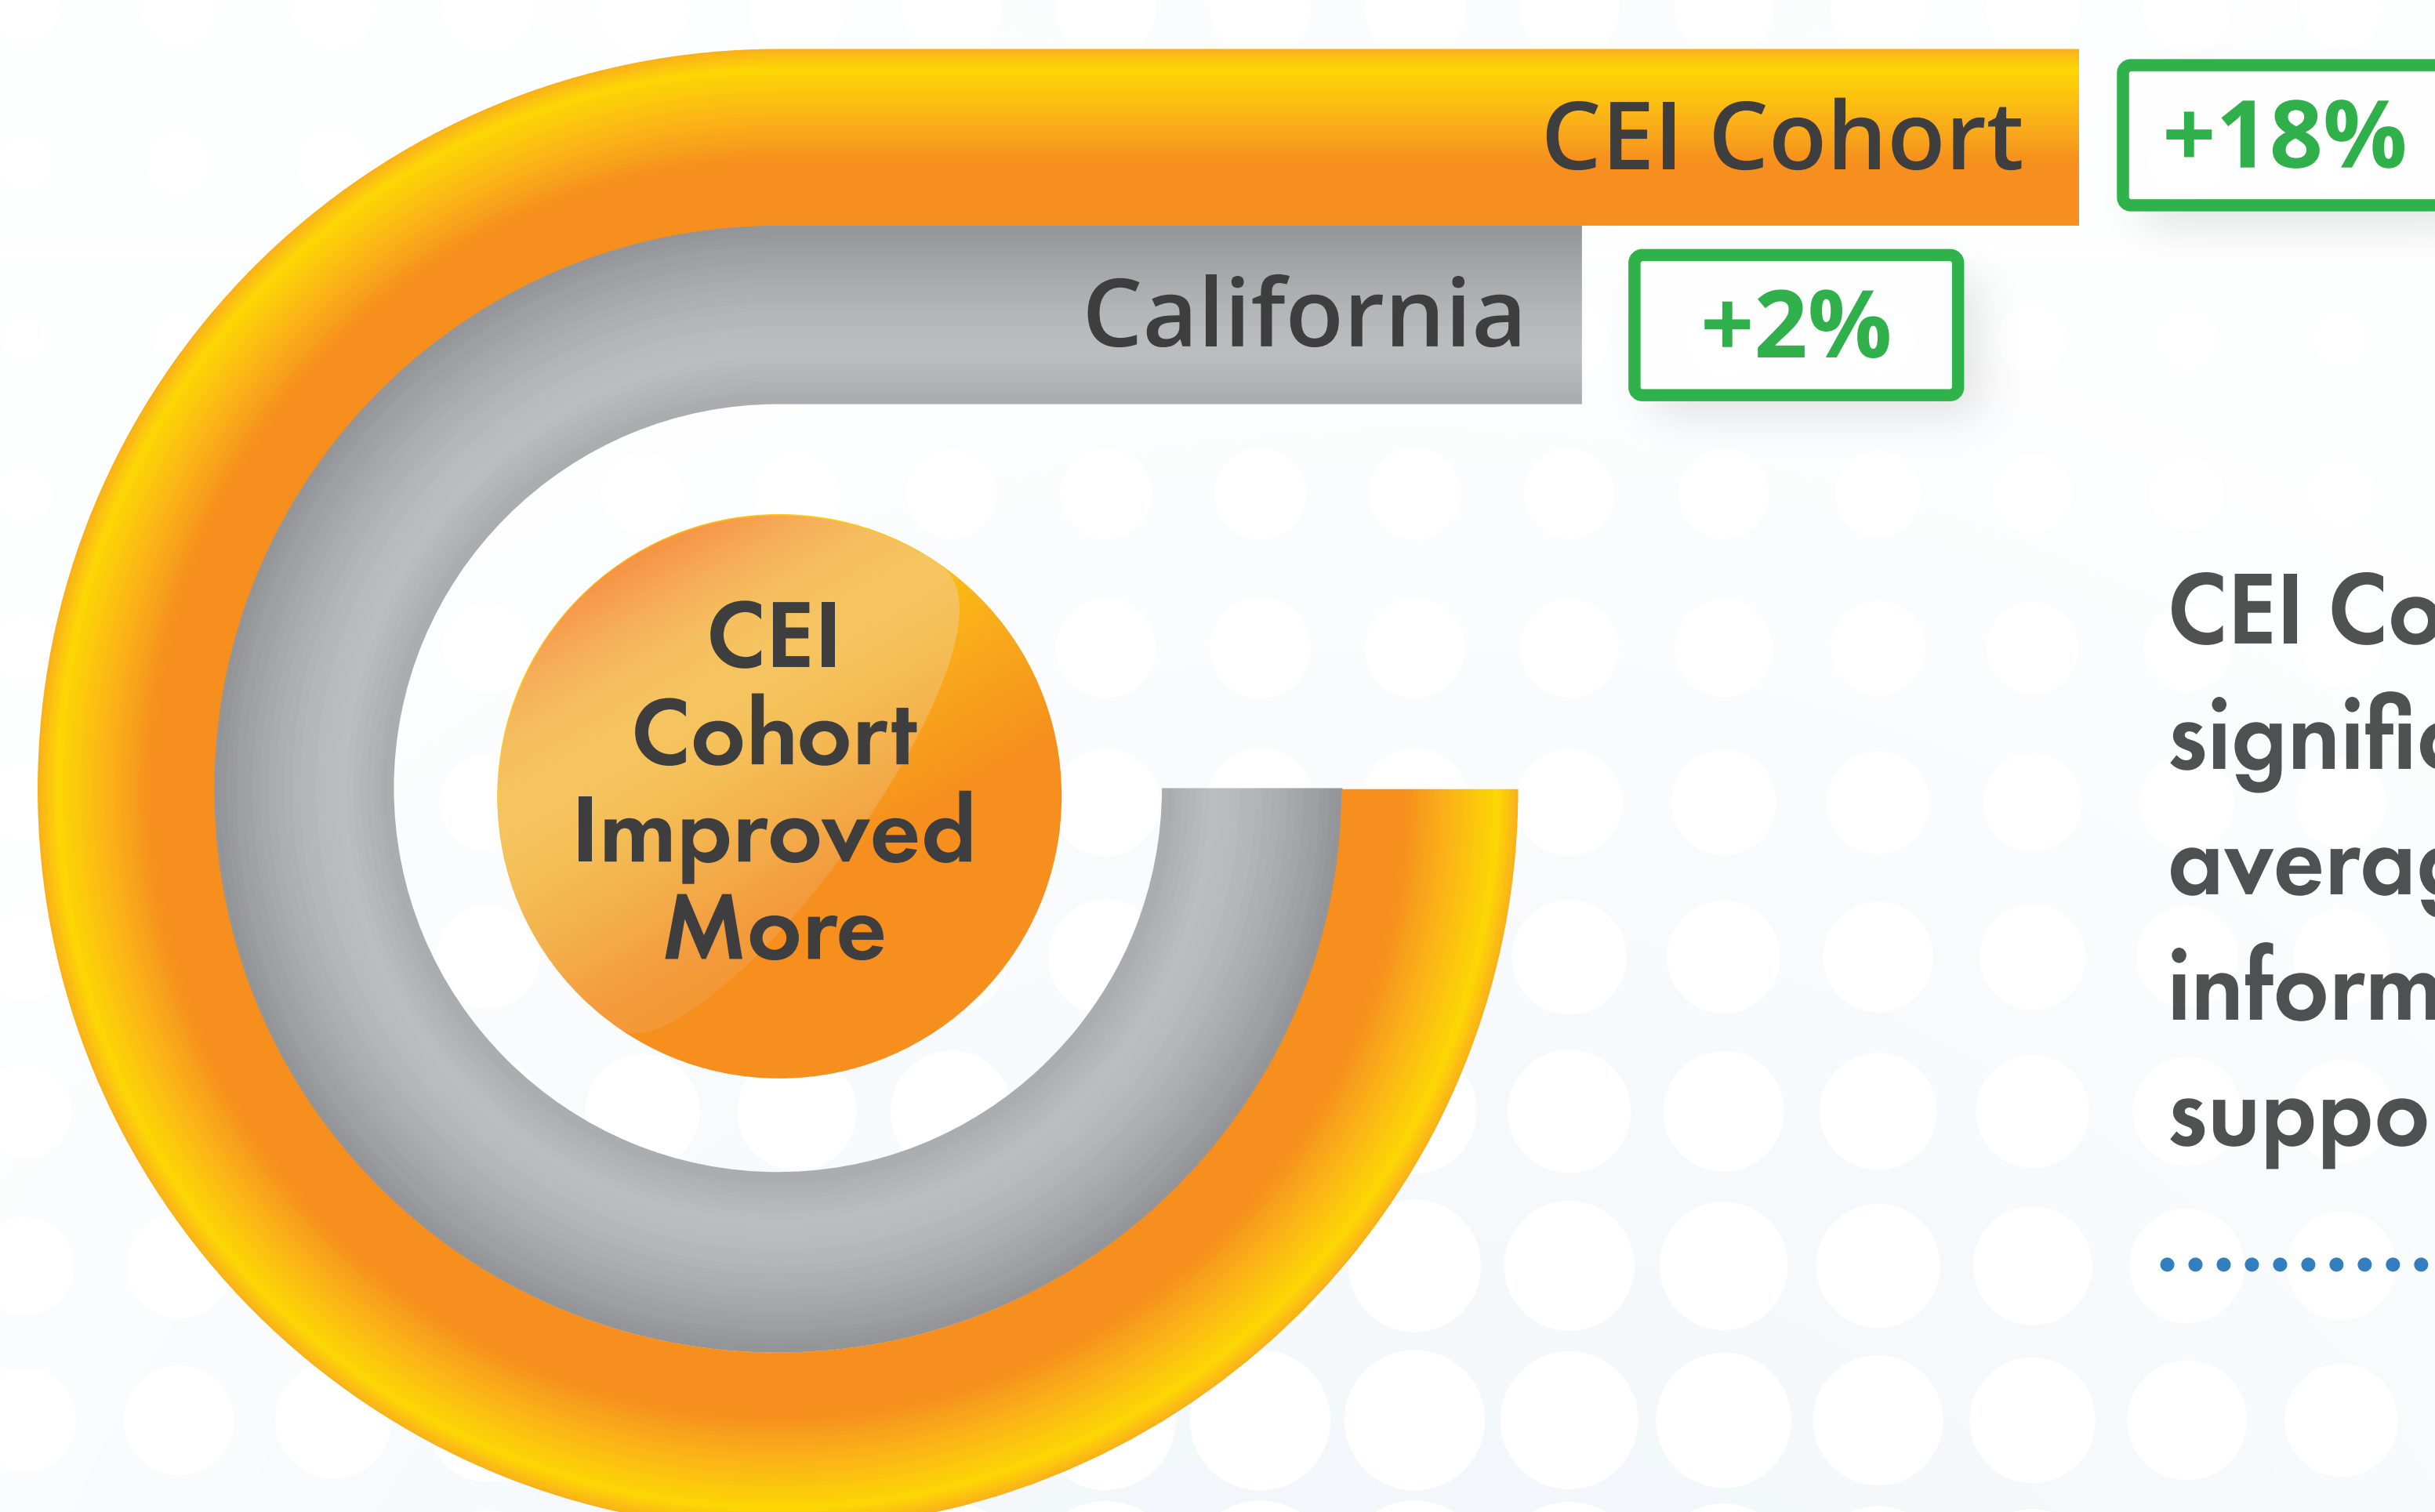

## Providing Professional Learning

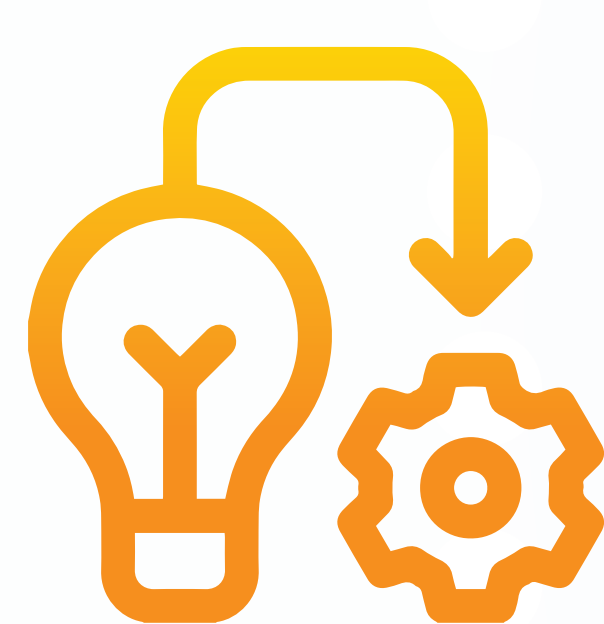

CEI Cohort districts and the State average saw no change in providing professional learning and support to improve capacity to partner with families.

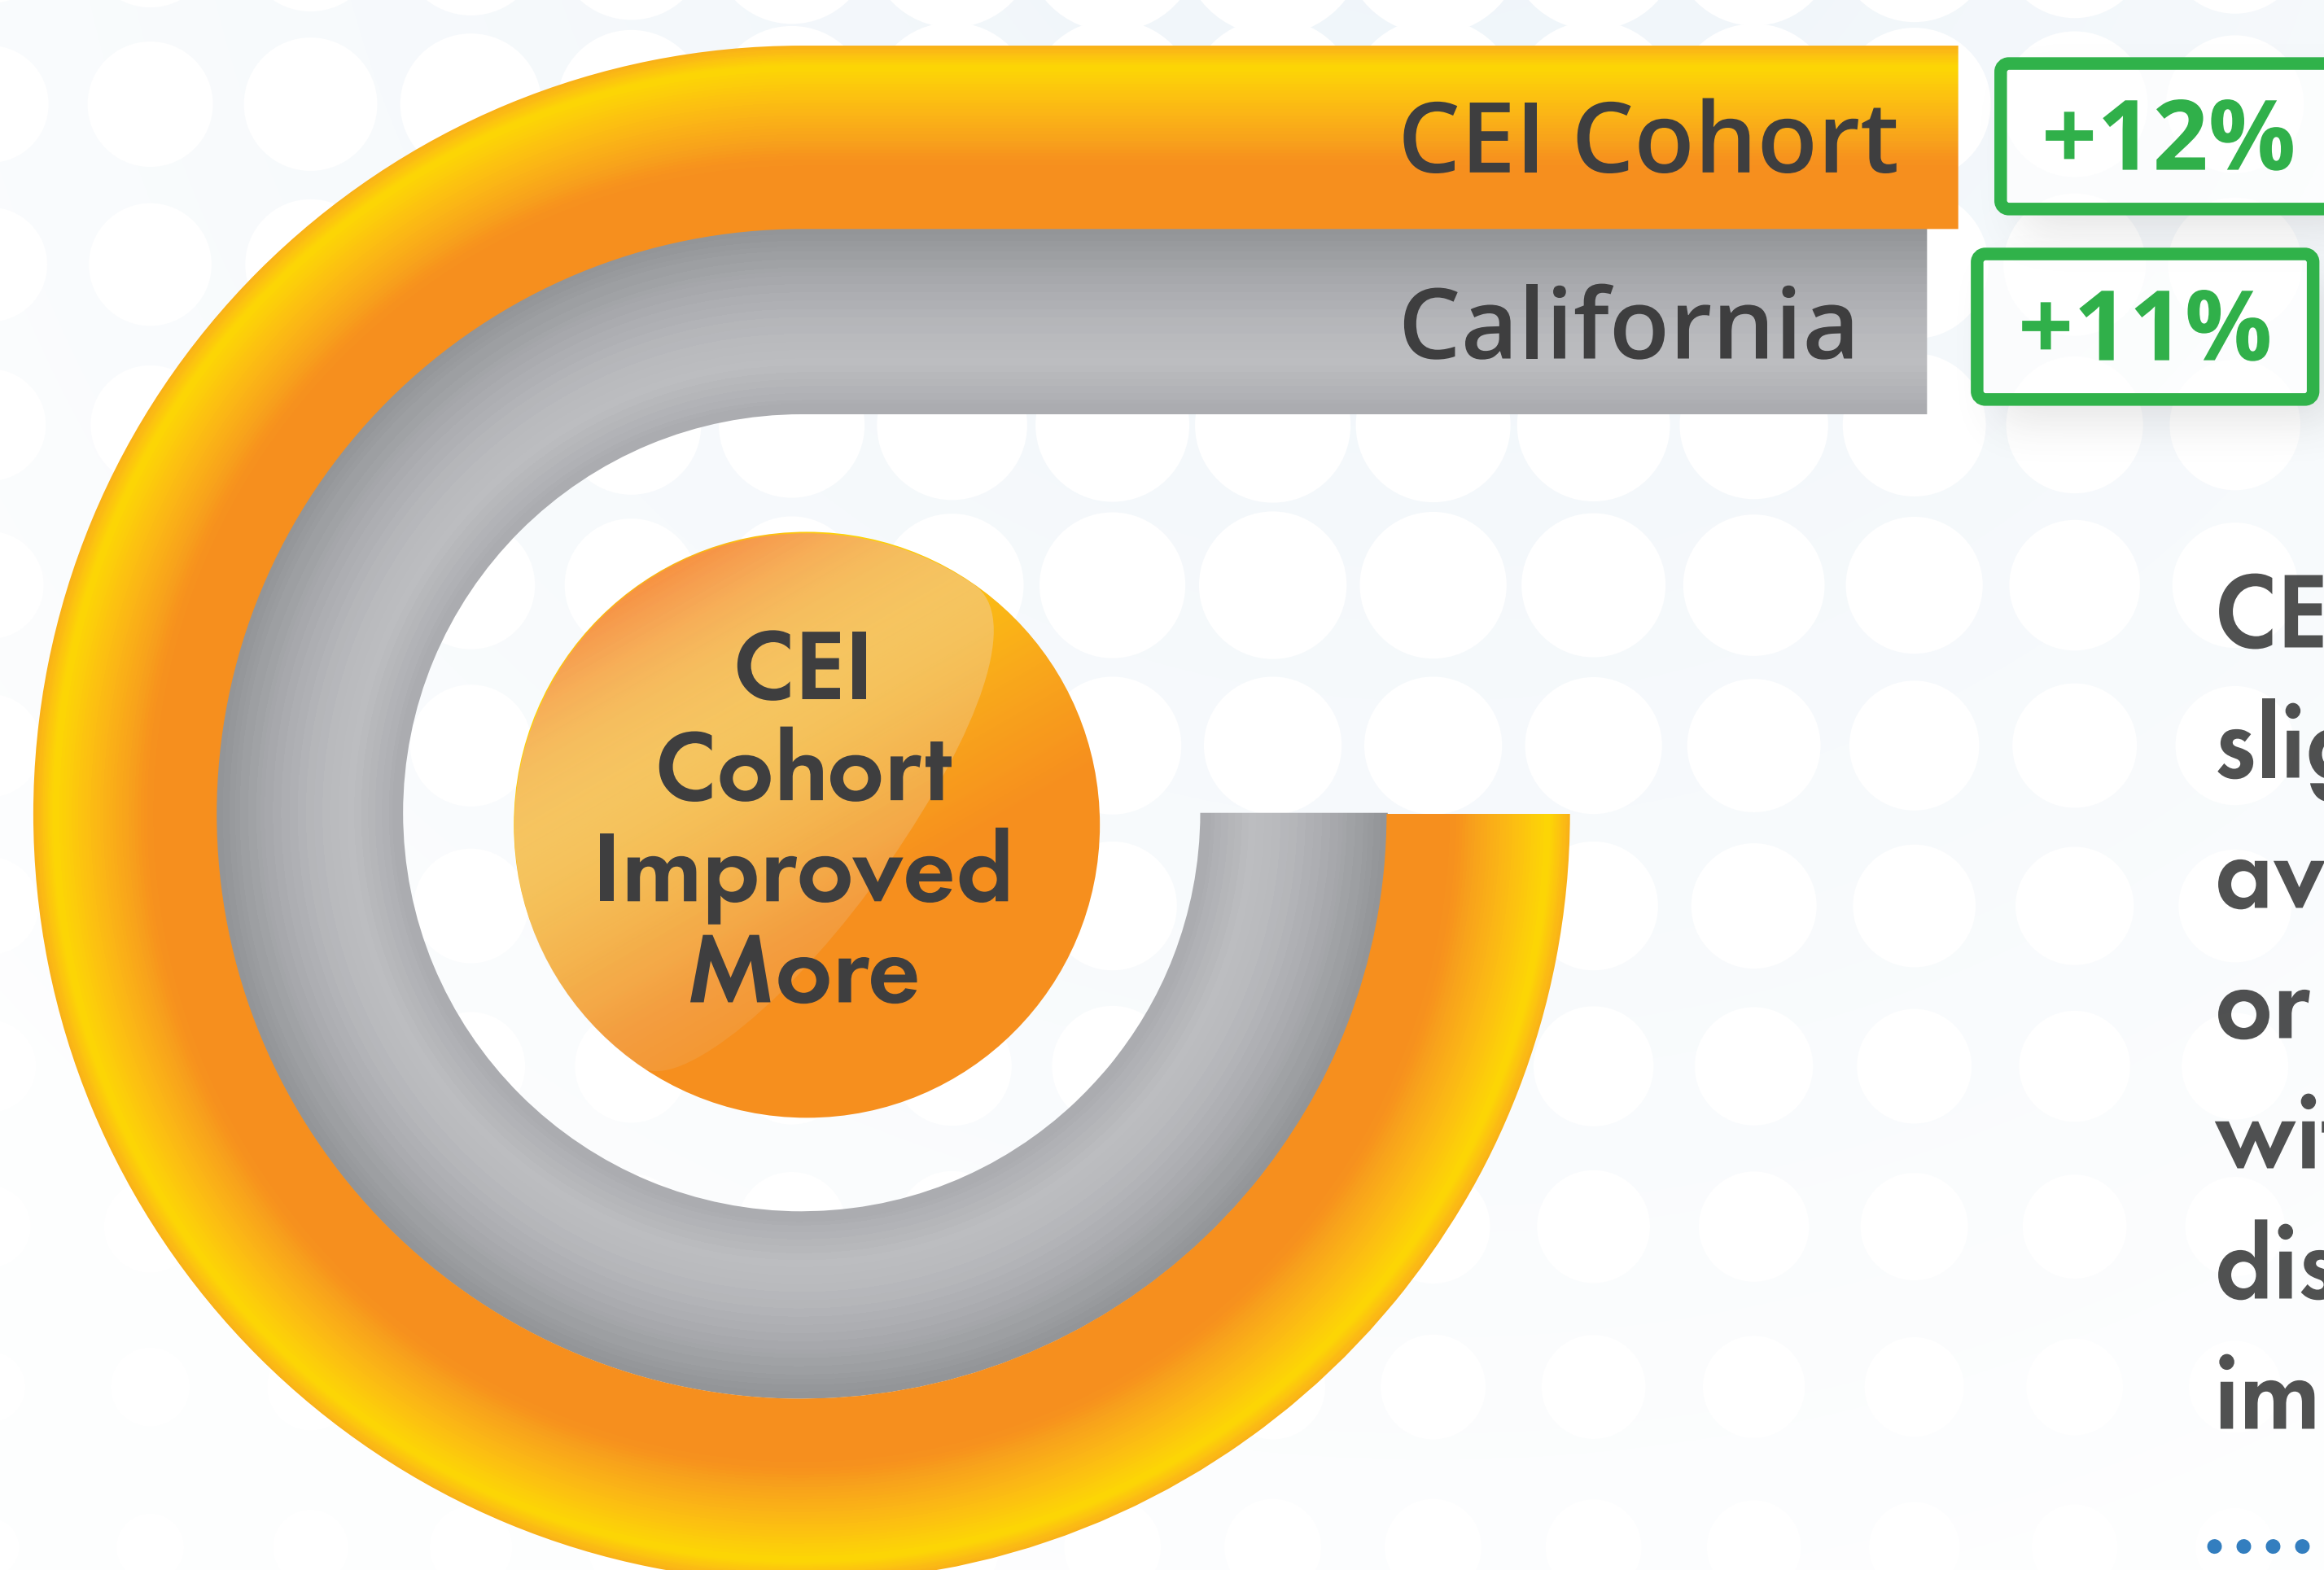

## Providing Families with Resources

CEI Cohort districts improved significantly more than the State average at providing families with information and resources to support students in the home.

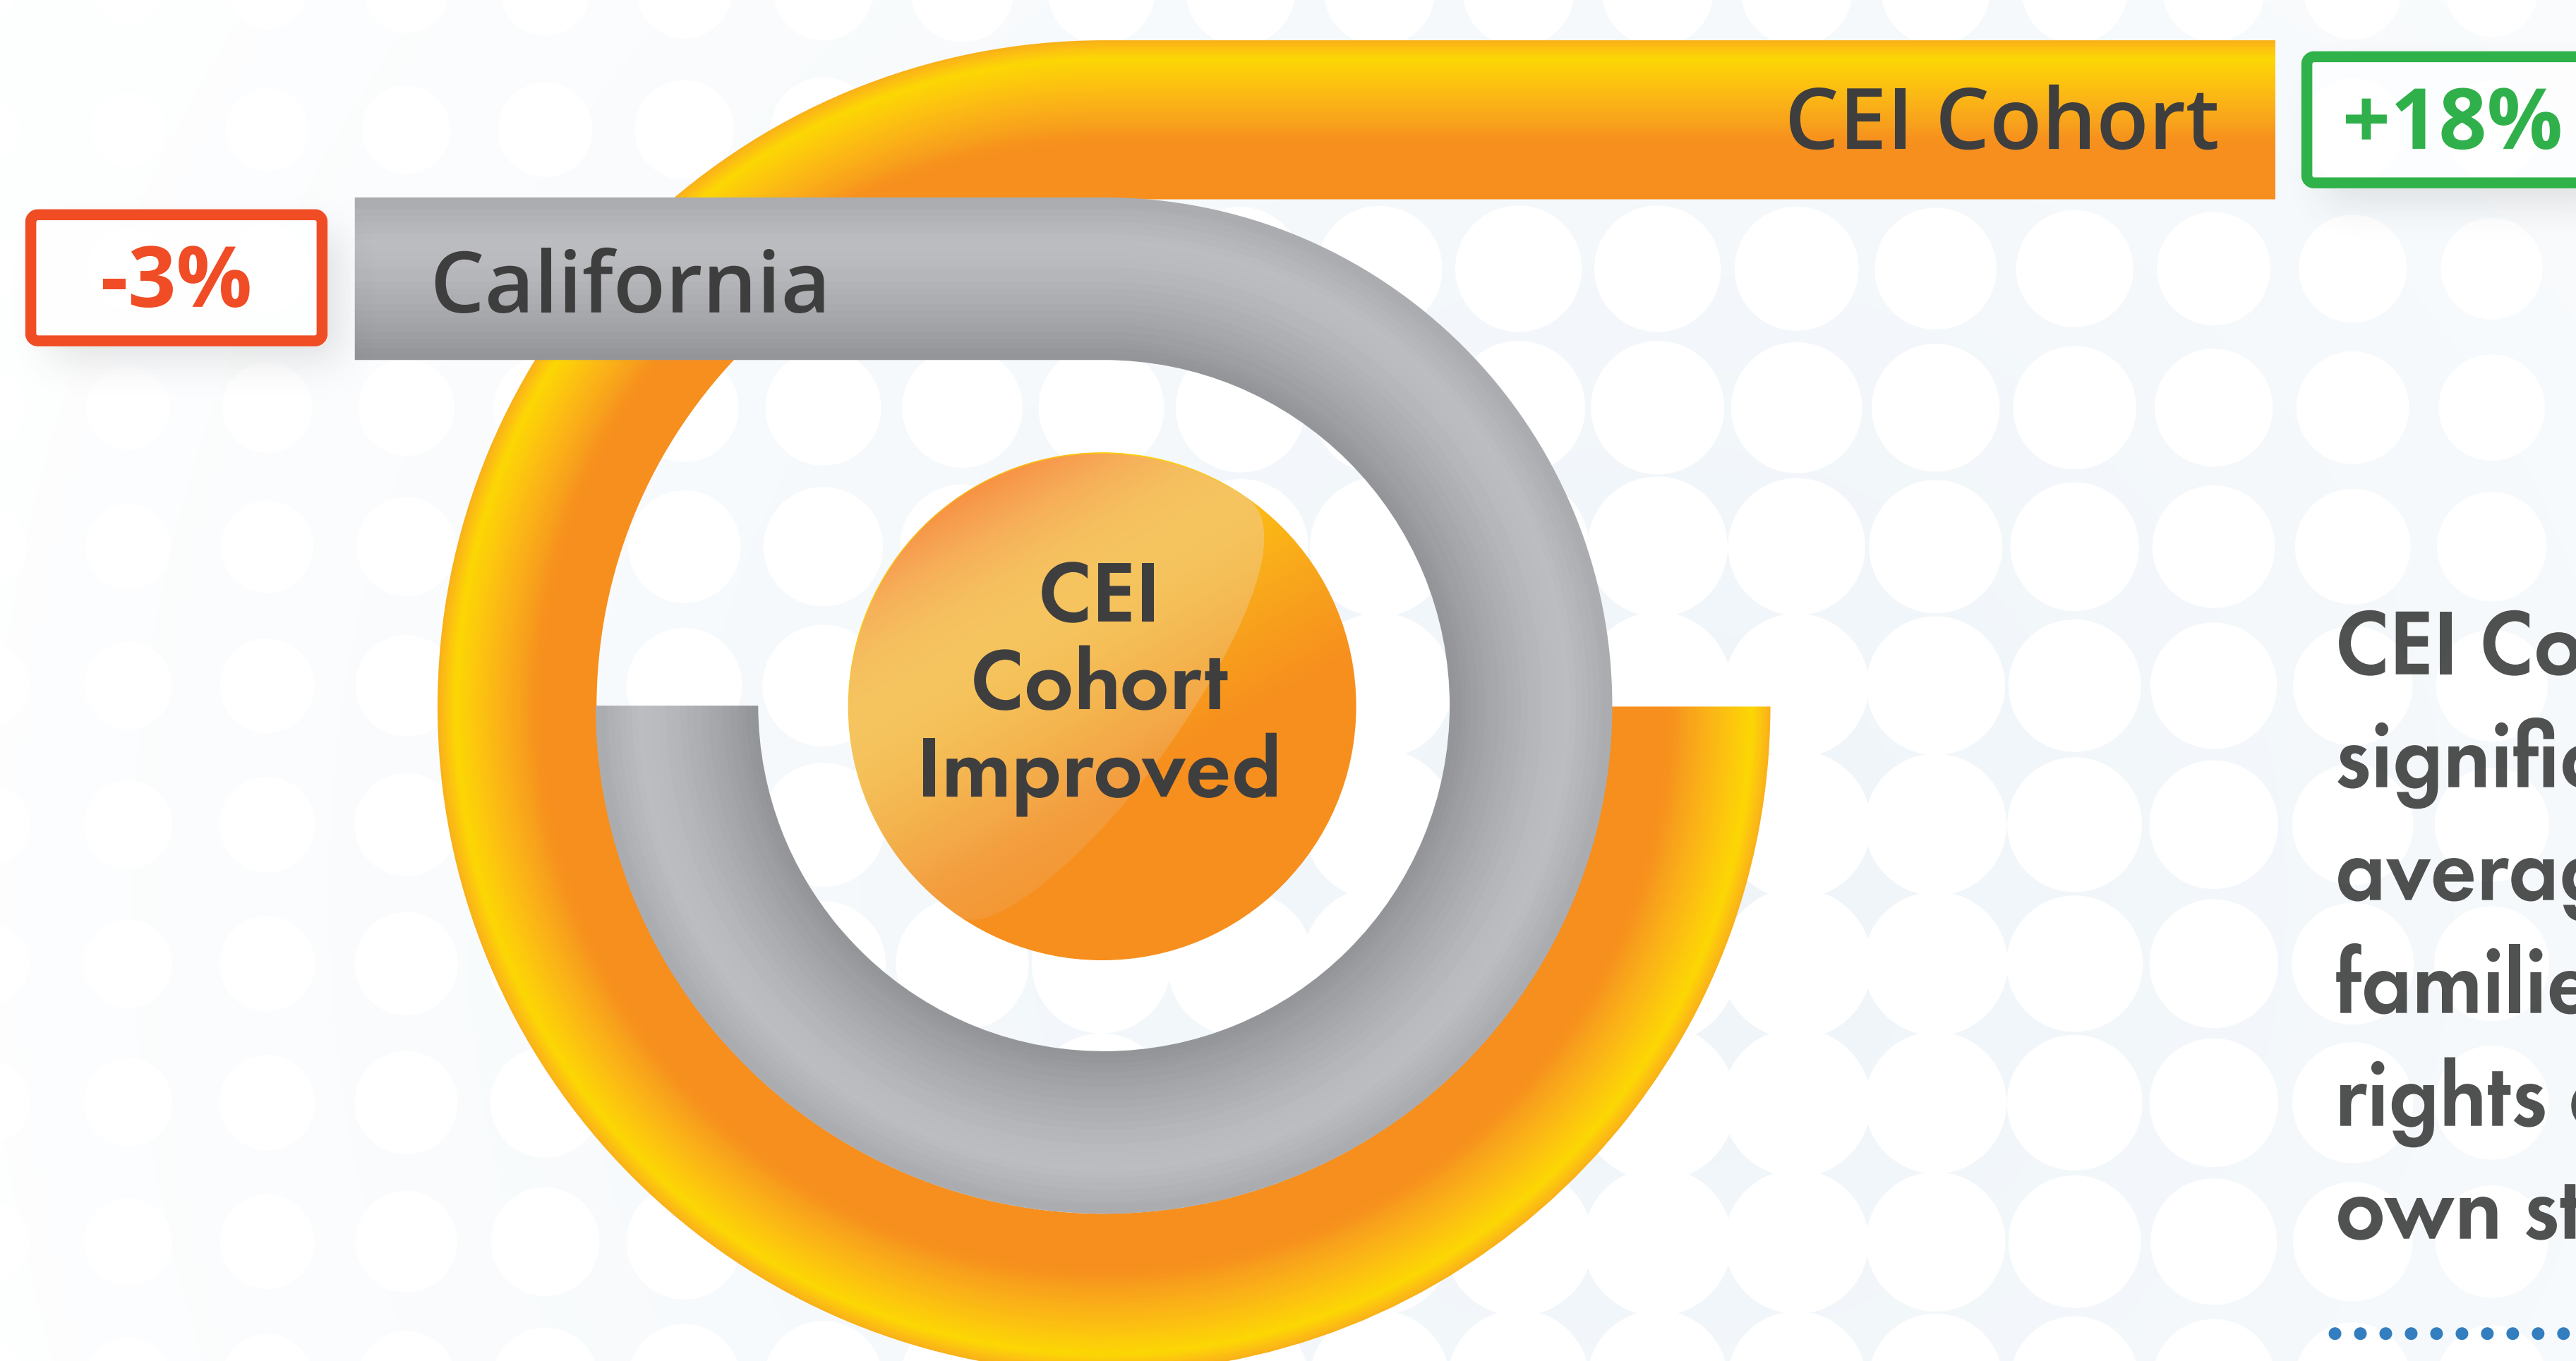

## Implementing Policies & Programs

CEI Cohort districts improved slightly more than the State average in implementing policies or programs for teachers to meet with students and families to discuss progress and support improved outcomes.

## Supporting Families as Advocates

CEI Cohort districts improved significantly while the State average declined in supporting families to exercise their legal rights and advocate for their own students, and all students.

Average ratings based on 2019 and 2021 California School Dashboard Local Indicators self-ratings using the 1-5 scale with 1- Exploration and Research Phase; 2 - Beginning Development; 3 Initial Implementation; 4 - Full Implementation; and 5 - Full Implementation and Sustainability"
