

# DATA LITERACY & LEADERSHIP ACADEMY

*Are you new to California's K-12 data environment? Or are you a data leader who wants to hone how you communicate data to teachers, principals, district administrators, parents, and the community to drive instructional change? Whether you're a data novice or a data wiz, CCEE's Data Literacy & Leadership Academy has a course for you!*

## COURSES CONNECTED TO PRACTICE

### Surveying the K-12 Data Landscape

- Understand the California data landscape and how it connects to your district/school's data systems throughout the school year
- Connect the knowledge and skills gained to your job-embedded tasks from the start of the school year to end of year

### Data Analysis to Drive Instructional Change

- Self-assess the readiness of you and your data team to support instructional decision-making with an equity-oriented perspective
- Engage in a guided data project that addresses a specific problem of practice tailored to your local context through continuous improvement cycles

## LEARNING NETWORK

As an emerging data leader, you will have the opportunity to connect with other leaders from across the state who are embarking on their own learning journeys. CCEE's Learning Network model provides a dedicated space for leaders to learn from and reflect with others around common data and assessment problems of practice that occur across the academic school year. The Data Leaders Learning Network complements the asynchronous coursework with a dynamic learning ecosystem to share knowledge, examine data, and identify emerging practices to improve student outcomes.

## EXPERT FACULTY

The Data Literacy & Leadership Academy also offers opportunities for emerging leaders to access content experts at the state and national levels such as Center for Assessment and Attendance Works among others. In addition, leaders will connect with our Data Research Learning Network Fellows who may have applicable lessons learned and best practices to share from a variety of California district contexts. From data monitoring and implementation to communicating data results, you'll be in a community among other data and assessment leaders.
