# **STRENGTHEN YOUR SYSTEM WITH UNIVERSAL DESIGN FOR LEARNING**

**Tuesday, July 22<sup>nd</sup>, 2025**

## **How Might You Respond?**

Our local data shows that approximately 80% of our students require "Tier II interventions and supports".

# Activity Directions

- Mill around the room and greet one another with a high five, fist bump, hug or greeting of your choice.
- When the music stops, each take turns sharing your response to:

"Our local data shows that approximately 80% of our students require Tier II interventions and supports".

# Session Facilitators

**Christine Olmstead**

Direct Technical  
Assistance Lead

**James McKenna**

# Why Tier I Matters

The Case for Best First Instruction

# Would You Rather...?

## Activity Directions:

- Make a choice.
- Move to the side of the room that matches your choice.
- Be ready to reflect and share why!

Source: Catlin Tucker's ["Would You Rather: Designing With Choice in Mind" Activity \(slides\)](#)

# Would you rather...?

Read an article

Listen to a podcast

# Would you rather...?

Engage in a small group discussion

Participate in an asynchronous online discussion

# Would you rather...?

Work alone

Work in pairs or small groups

# Would you rather...?

Complete a writing task to make connections between concepts

Complete a concept map to show connections between concepts

# Would you rather...?

Conduct online research

Interview a family member or friend

# Would you rather...?

Pen and paper practice or  
review

Practice or review with an  
online program

# Would you rather...?

Watch a video and complete an  
Edpuzzle lesson

Participate in teacher-led, small  
group instruction

# Would you rather...?

Take notes or annotate

Draw sketchnotes

# Would you rather...?

Record a verbal explanation

Submit a written explanation

**What Did You  
Notice?**

# **Multi-Tiered System of Support (MTSS)**

# Why Tier 1 Matters

## Tier 1 = First, Best Instruction

*It's for ALL students. It's the foundation of MTSS.*

When Tier 1 is Weak...	When Tier 1 is Strong...
<ul style="list-style-type: none"><li>• More students flagged for Tier 2</li><li>• Overloaded systems</li><li>• Students fall behind</li></ul>	<ul style="list-style-type: none"><li>• Fewer students need intervention</li><li>• Equity is built into the core</li><li>• Students are engaged, successful, included from the start</li></ul>

# Universal Design for Learning (UDL)

UDL is the *design framework* that makes Tier 1 work – for *everyone*.

Shifts our thinking:

- From *remediation* → to **proactive planning**
- From *student deficit* → to **instructional barrier**
- From *one-size-fits-all* → to **flexible inclusive design**

**UDL = Designing from the margins in**

# Why Your Data Matters for Tier 1

Data isn't just for identifying who's struggling... It helps us reflect on how Tier 1 is landing.

What is your data telling you about:

- *Access?*
- *Inclusion?*
- *Engagement?*
- *Design?*

# The Curb-Cut Effect

# Let's Revisit Our Opening Scenario...

*"Our local data shows that approximately 80% of our students require "Tier II interventions and supports".*

That's not a  
Tier 2 problem.  
That's a **Tier 1 signal**.

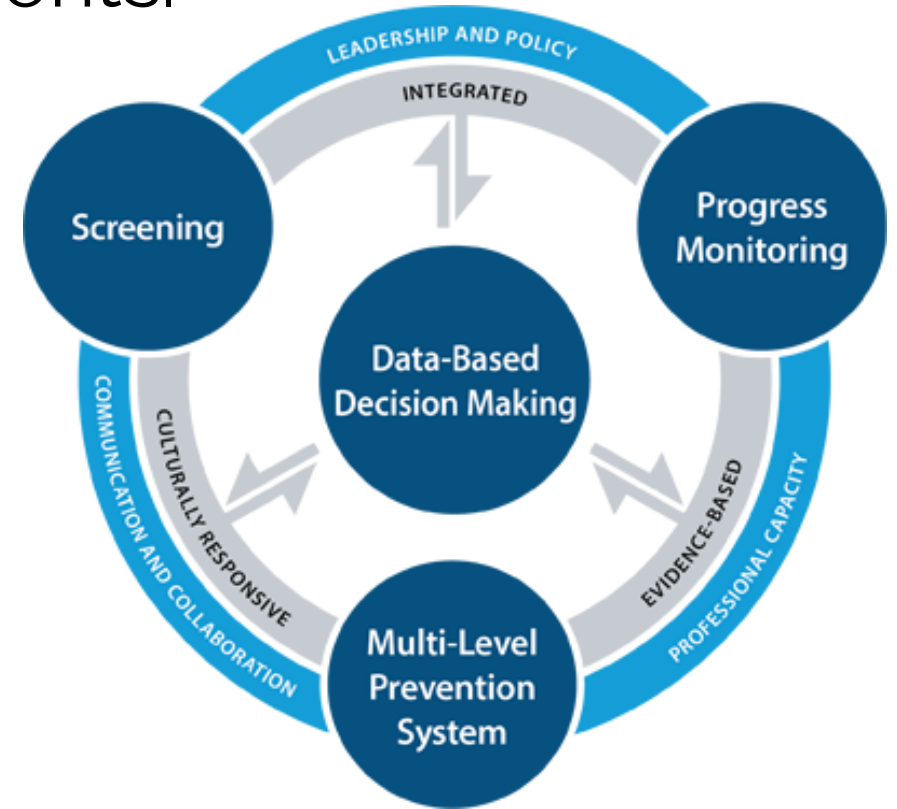

Question to ask:  
**What did our  
design miss?**

# Tier 1 Data is a Feedback Loop

Don't just use data to diagnose students.  
Use it to **diagnose instruction**.

Look beyond scores:

- Who's opting out?
- Who's disengaged?
- Who's repeatedly redirected?
- What patterns are we seeing?

Source: [AIR's Essential Components of MTSS](#)

# What We're Aiming For

A strong Tier 1 – grounded in **UDL** & informed by **real-time data** – helps us:

- Reach more students up front
- Reduce over-referrals
- Strengthen equity through design
- Empower educators to make adjustments early

It's not just about tracking deficits—it's about improving design.

***How might we design to the margins?***

# California MTSS Continuum of Support

Universal Design for Learning and differentiated instruction are integrated and implemented at all levels of the continuum of support to ensure the academic, behavior, social-emotional, and mental health development of ALL students in the most inclusive and equitable learning environment.

## ALL STUDENTS

### UNIVERSAL SUPPORT

Evidence-based practices are accessible by ALL students where the integration and implementation of Universal Design for Learning and differentiated instruction support academic, behavior, social-emotional, AND mental health development.

## SOME STUDENTS

### SUPPLEMENTAL SUPPORT

Additional services are provided to some students to support academic, behavior, social-emotional, and/or mental health through the integration and implementation of Universal Design for Learning and differentiated instruction. Supplemental supports are provided in addition to, not in place of universal supports, and available to all students regardless of identification for specialized services based on need through the use of diagnostic and progress monitoring assessments.

## FEW STUDENTS

### INTENSIFIED SUPPORT

Targeted supports are provided to students with greater needs to support academic, behavior, social-emotional, and/or mental health through the integration and implementation of Universal Design for Learning and differentiated instruction. Intensified supports are provided in addition to, not in place of universal supports, via specialized service providers, and available to all students regardless of identification for specialized services based on need through the use of diagnostic and progress monitoring assessments.

# Asking the right questions...

Our local data shows that approximately 80% of our students require "Tier II interventions and supports".

- What else could the data be telling us?

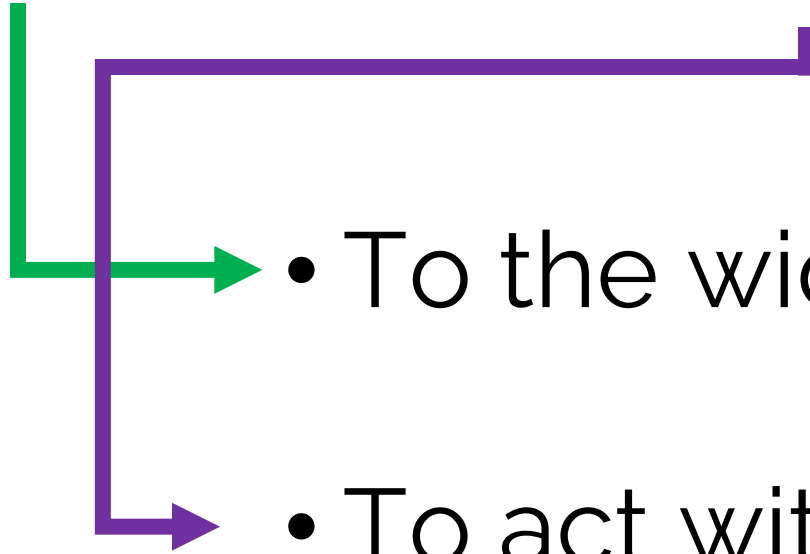

# **Framework Overview**

**Universal Design for  
Learning**

# Universal Design for Learning

- To the widest extent

- To act with intent

- Enduring behavior change

# UDL Principles

Design Multiple Means of  
Engagement

WHY

Design Multiple Means of  
Representation

WHAT

Design Multiple Means of  
Action & Expression

HOW

**Ability:** The knowledge, skills, and expertise educators need to succeed.

**Belief:** The mindset and confidence to persevere and innovate.

**Capacity:** The resources, systems, and conditions that enable growth.

# Reflect & Discuss

- Reflect on past improvement efforts through the lens of ability, belief, and capacity?
  - To what extent were all three present and supported?
  - How did that support (or lack thereof) affect impact of the effort?

# Firm Goals, Flexible Means

# Example

- Write an argumentative essay (W.7.1)

- Finding/Citing sources
- Organizing information
- Writing style
- Keyboarding

- Curated sources & sample citations
- Graphic organizers
- Worked examples and frames
- Voice-to-text

**Barriers exist in  
*environments,*  
not *people.***

**Hold only those  
*expectations*  
you intend to  
*support.***

**Time for a  
Break!**

# California MTSS FRAMEWORK

The California MTSS Framework includes 5 Domains and 11 Features. The needs of the Whole Child are successfully met when ALL Domains and Features are effectively implemented with fidelity.

## Whole Child Domain

**Inclusive Academic Instruction  
Features**

**Inclusive Behavior Instruction  
Features**

**Inclusive Transformative  
Social-Emotional Instruction and  
Mental Health Support Features**

## Essential Domains and Features to Support the Whole Child

### **Administrative Leadership Domain**

Strong & Engaged Site  
Leadership Features

Strong Educator Support  
System Features

### **Integrated Supports Domain**

Organizational Structure  
Features

Strong & Positive School  
Culture Features

### **Family and Community Engagement Domain**

Trusting Family Partnerships  
Features

Trusting Community  
Partnerships Features

### **Inclusive Policy Structure and Practice Domain**

Strong LEA / School  
Relationship Features

LEA Policy Framework  
Features

# Magic Wand Activity

**5 Minutes**

If you had a magic wand and could transform your classroom, school, or district to make **Universal Supports (Tier 1)** both *more rigorous and more inclusive*, what would you change or create — for academics, behavior, SEL, and mental health to seamlessly work together? Think UDL.

# Magic Wand Activity

## **BARRIERS**

**5 Minutes**

For each idea, write the barriers that exist that keep you from making these transformations. (Refer to CA MTSS Placemat—are there any barriers in the supporting domains? Think UDL.)

# Magic Wand Activity

**5 Minutes**

For each idea+ barrier, identify what abilities, beliefs, and/or capacities that are needed to make these transformations? Refer to the CA MTSS placemat. Think UDL.

# Magic Wand Activity

**10 Minutes**

As a group, sort and categorize your brainstorming..

# Magic Wand Activity

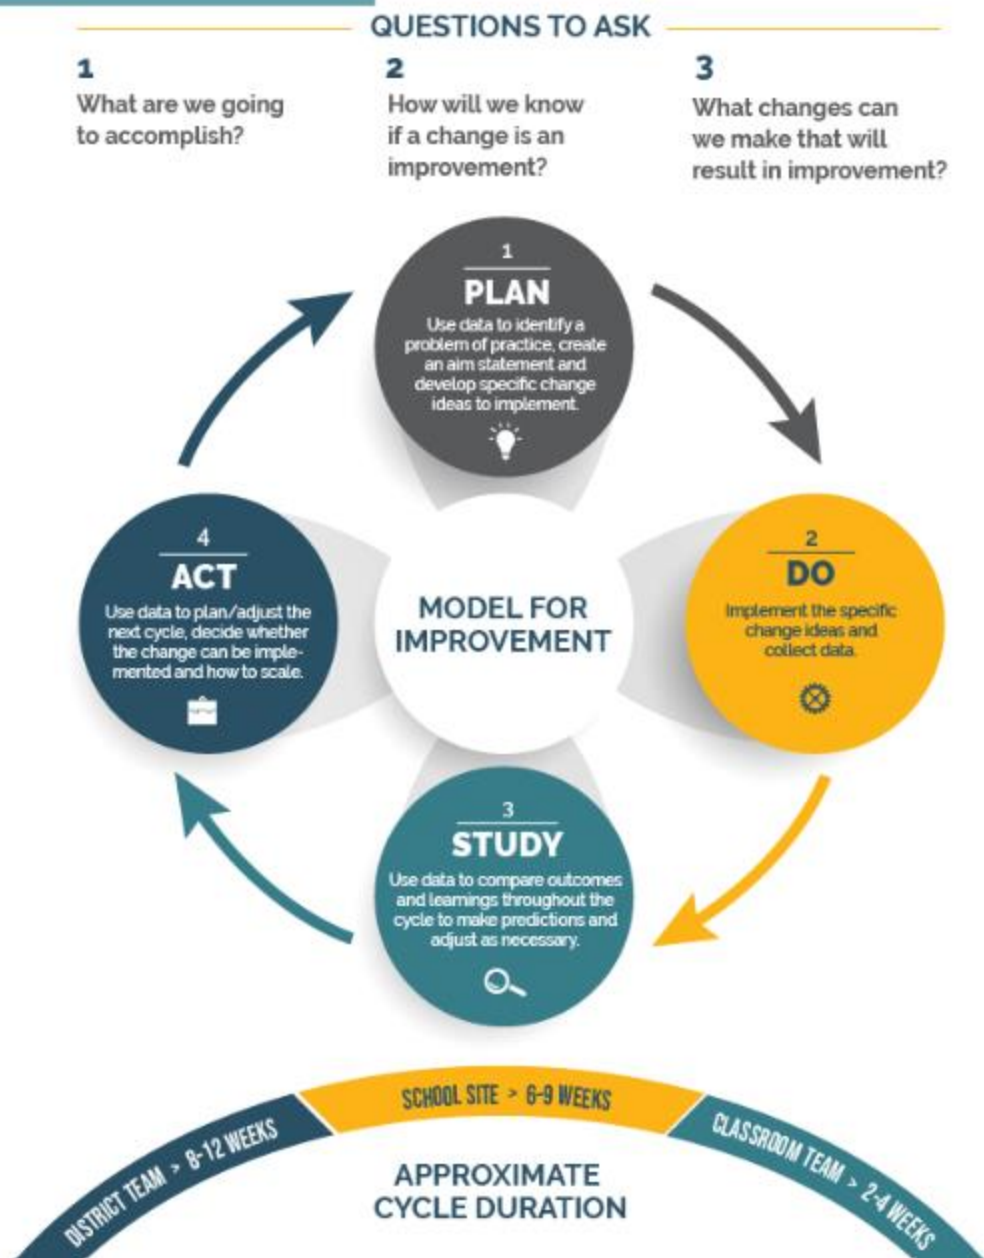

## Choose 1 Idea

Using your collective capacity chart:

What would it take to make your idea work *across all tiers* of MTSS for adults and students?"

Where could your system start to take one step toward this vision?

**15 minutes**

## Leveraging the PDSA Cycle

**Continuous improvement** is an ongoing effort to improve products, services or processes. These efforts can seek “incremental” improvement over time or “breakthrough” improvement all at once.

- The PDSA Cycle is a four-step process used to drive continuous improvement.
- Focused on testing small changes, learning from them, and applying improvements in a systematic way.

# Revisiting Goals

# Closing Commitments

What's the next step you're going to take in your pursuit of more universally designed instruction for all students?

# Thank You!
