

California Math Network

Part of the CA Statewide System of Support

Sec. 90, Chapter 8, AB 121

The California Collaborative for Educational Excellence (CCEE) was awarded \$7.5 million to convene the Statewide Math Network. The network convenes mathematics leads to support statewide implementation of evidence-based practices aligned to the Mathematics Framework adopted by the State Board of Education and the use of data to support effective instruction.

GOAL 2

Consult with mathematics experts to curate a user-friendly clearinghouse for evidence-based mathematics resources for use by local educational agencies seeking to implement evidence-based practices to improve mathematics outcomes.

GOAL 1

Consult with the State Department of Education and convene existing state-funded entities to support implementation of mathematics-related initiatives and ensure best practices and findings from assistance are integrated into the Statewide System of Support.

GOAL 3

Study, highlight, and disseminate information about high performing local educational agencies and best practices.

California Math Network Vision Statement

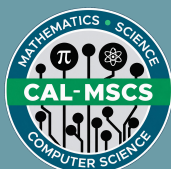

California envisions a mathematics system that helps every learner see themselves as a capable mathematician and experience mathematics as meaningful, creative, and empowering. Guided by the California Preschool/Transitional Kindergarten Learning Foundations, Common Core State Standards for Mathematics, and the 2023 Mathematics Framework for California Public Schools, instruction is organized around coherent “Big Ideas” that connect concepts across grade levels, enabling students to build knowledge through developmental progressions rather than isolated skills. Grounded in the Standards for Mathematical Practice, educators provide all students with rich, grade-level mathematics instruction through rigorous, equitable, research-based learning experiences to develop students’ conceptual understanding, reasoning, problem-solving, and real-world application skills. Through culturally responsive, student-centered teaching, educators challenge deficit thinking and foster mathematical identity, ensuring every student develops the knowledge, confidence, and agency needed for lifelong success.

OUR NETWORK PARTNERS:

Math Professional Learning Partnership Grant
2024-2028

Count, Play, Explore
2021-2027

California Mathematics, Science, Computer Science
Partnership
2022-2027

California Mathematics Project
Since 1988 and Ongoing

Learning Acceleration System Grant
2021-2028

OUR EVALUATION & CLEARINGHOUSE PARTNERS:

CCEE issued Requests for Proposals (RFPs) to identify partners to support in the development of a user-friendly clearinghouse, and research and evaluation. CCEE awarded AIR to assist in clearinghouse development. WestEd was selected to support the research of high-performing local educational agencies and evaluation of the Networks.

Advancing Evidence.
Improving Lives.
